**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee.

The Plan's Department of Pharmacy maintains a process by which a member or healthcare provider can request a formulary exception for specific drugs, drugs used for an off-label purpose, and biologicals and medications not included in the Health Plan's drug formulary. Members and healthcare providers can initiate requests for a formulary exception by contacting Pharmacy Services by phone, fax, or written request.

Formulary exception requests will be evaluated, and a determination of medical necessity made utilizing all the following criteria:

1. Member's eligibility to receive requested services (enrollment in the plan, prescription drug coverage, specific exclusions in member's contract).
2. Utilization of the requested agent for a clinically proven treatment indication or diagnosis.
3. Therapeutic failure, intolerance, or contraindication to use of formulary agents and/or agents designated as therapeutically equivalent.
4. Appropriateness of the nonformulary agent compared with available formulary agents (including but not limited to):
    A. Safety.
    B. Efficacy.
    C. Therapeutic advantage as demonstrated by head to head clinical trials.
    D. Meets Health Plan criteria for drug or drug class formulary exception.
5. Additional policies that may be referenced as part of a coverage decision include:
    A. Policy 9.0 Brand
    B. Policy 296.0 Triptan Quantity Limit Exceptions
    C. Policy 469.0 Statin Quantity Limit Exceptions
    D. Policy 487.0 Quantity Limit Exceptions

| Geisinger | POLICY NUMBER: 3.0 |
|---|---|
| POLICY AND PROCEDURE<br>**PHARMACY**<br>MANUAL | **SECTION: Commercial Drug**<br>**SUBJECT: Geisinger Health Plan (GHP) Formulary Exception** |

**PURPOSE/OBJECTIVE:**

The purpose of the Formulary Exception process is to provide a mechanism whereby an exception can be made for coverage of medications as noted above when a member or healthcare provider initiates such a request for coverage. Medications that are benefit exclusions are not eligible for review through the exception process.

This policy will be maintained in compliance with the standards of NCQA and any other applicable state and federal regulatory entities.

Member confidentiality will be maintained as outlined in the Health Plan Administrative Policy #02, Privacy and Confidentiality.

**RESPONSIBILITY**

Geisinger Health Plan Pharmacy Department
Geisinger Health Plan Medical Directors
Geisinger Health Plan Advisory Committee

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary ("Drug Formulary")*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***FDA*** – Food and Drug Administration.
3. ***Formulary (Drug Formulary) products*** – prescription medications that meet criteria for Formulary inclusion.
4. ***Nonformulary products*** – those medications which are not included in the Formulary.
5. ***Healthcare Provider*** - a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
6. ***Specialist*** – a healthcare provider whose practice is not limited to primary health care services and who has additional post-graduate or specialized training, has board

certification or practices in a licensed specialized area of health care and is actively practicing (i.e., Gynecology, Neurology).

7. ***NCQA*** – National Committee for Quality Assurance.
8. ***GHP*** – Geisinger Health Plan or "Plan."
9. ***New drugs (medications)*** – those medications that have been FDA-approved and available on the market for a period of six months or less.
10. ***P&T Committee*** – Pharmacy and Therapeutics Committee.
11. ***Urgent Care Claim*** – care for which a request to extend a course of treatment beyond the initially approved period of time or number of treatments must be decided, and notification made, within not more than 24 hours (provided that the claim is made at least 24 hours prior to the expiration of the initial approval period); or a claim for care that, if subjected to normal timeframes, could seriously jeopardize the life or health of the claimant (or his or her ability to regain maximum function), or subject the claimant to severe pain that cannot be managed adequately.
12. ***Pre-Service Claim*** – any claim for benefits that, under the terms of the plan, must be approved (either in whole or part) before medical care is obtained.
13. ***Post-Service Claim*** – any claim for benefits that is not a pre-service claim.
14. ***Adverse benefit determination*** – a denial, reduction, or termination of benefits or a failure to provide or pay for benefits.
15. ***Date received (received, receipt)*** – date and time received by Geisinger Health Plan, regardless of which department receives it.
16. ***PAHub –*** electronic solution that is used by Geisinger Health Plan to track, monitor, and complete all requests for pharmacy medication reviews. This includes an activity log capturing the dates and times of all actions completed for each request.
17. ***Written notification date*** – date and time the written notification leaves Geisinger Health Plan via mail or fax.
18. ***CPhT –*** Certified pharmacy technician
19. ***LPN –*** Licensed practical nurse

**PREREQUISITES**

Plan Members with a prescription drug rider, including all lines of business, unless a specific limitation or exception exists.

**PROCEDURE:**

1. A member or their healthcare provider may initiate a request for a formulary exception in accordance with the following:
    A. Requests should be directed to the Department of Pharmacy Services (as communicated in writing through the member handbook, provider guide, on-line pharmacy service, the formulary and written communication to members and providers).
    B. Information needed for an exception include, but is not limited to, the following:
        (1) Caller's name and telephone number;

(2) Member's medical record number and insurance identification number;
(3) Prescribing healthcare provider's name and telephone number;
(4) The exception requested;
(5) Clinical rationale including medical records, laboratory data, past treatment history and other documentation, as determined by the Plan to be relevant.

2. Requests for exception are reviewed and a determination of coverage made within a timeframe in accordance with the following:
   A. When the request for coverage is related to an Urgent Care Claim, a determination of coverage will be made within 24 hours of receipt of the necessary information.
   B. When the request for coverage is deemed to be a Pre-Service or Post-Service claim, a determination of coverage will be made within 48 hours of the receipt of the necessary information.
   C. All requests for GHP Kids members will be reviewed within 24 hours of receipt of the necessary information.
3. Requests for exception will be reviewed as follows:
   A. A Certified Pharmacy Technician (CPhT) or Licensed Practical Nurse (LPN), under the supervision of a Health Plan Pharmacist, will perform an initial review of medical record documentation and treatment history to recommend approval or denial of cases where there are explicit utilization management criteria and no clinical judgement is required.
      (1) If the request for exception is approved, no further action will be required on the part of the Health Plan Pharmacist or the Licensed Physician.
      (2) If the CPhT or LPN recommends denial upon initial review, the case will be forwarded to a Health Plan Pharmacist for review.
   B. For all cases where clinical judgement is required, explicit utilization management criteria do not exist, or those which a CPhT or LPN recommends denial, a Health Plan Pharmacist will perform an initial review of medical record documentation and treatment history to recommend approval or denial.
      (1) If the request for exception is approved, no further action will be required on the part of the Licensed Physician.
      (2) If the Health Plan Pharmacist recommends denial upon initial review, the case will be forwarded to a Licensed Physician for review.
   C. A Licensed Physician shall make the final decision in all instances where a Health Plan Pharmacist recommends denial based on medical necessity and appropriateness.

4. Based on the determination of coverage made, one of the following will occur:
    A. If the formulary exception is approved:
        (1) An electronic override will be entered into the pharmacy claims adjudication system.
            a. The Member (or Member's authorized representative) and Healthcare Provider will be verbally notified of the determination of coverage within 24 hours of the request if the request is urgent or two business days of the request if the request is not urgent.
            b. At the time of notification, the Plan will indicate the coverage provided in the amount disclosed by the Plan for the service requested.
        (2) A written confirmation of the approval will be sent to the provider and Member (or Member's authorized representative) within 24 hours of the request if the request is urgent or two business days of the request if the request is not urgent.
    B. If the request for a formulary exception is denied, resulting in an adverse benefit determination, the following will occur:
        (1) The Healthcare Provider and Member (or Member's authorized representative) will be verbally notified of the adverse determination within 24 hours of the request if the request is urgent or two business days of the request if the request is not urgent.
        (2) This verbal notification will include instructions on how to initiate a Grievance and/or Appeal Process. (For additional information on appeals see Policy 4.0.)
        (3) The prescribing healthcare provider will be offered the opportunity to discuss the determination of coverage with a Plan Pharmacist or a Plan Medical Director.
        (4) The Member (or Member's authorized representative) and Healthcare Provider will be sent a written confirmation of the adverse benefit determination within 24 hours of the request if the request is urgent or two business days of the request if the request is not urgent. The written notification shall include the specific reason for the determination, the basis and clinical rationale utilized in rendering the determination of coverage (if applicable), any internal policy or criterion applied (if applicable) as well as instructions regarding initiation of the Grievance and/or Appeal Process.
5. Documentation of the determination of coverage and the notifications will take place in PAHub.

**Continuity of Care – Classes of Clinical Concern**

For initial requests, Geisinger Health Plan will not require members to meet prior authorization or step therapy criteria if they are currently taking a medication in one of the following drug classes:

- Immunosuppressants (for prophylaxis of organ transplant rejection)
- Antidepressants
- Antipsychotics
- Anticonvulsants
- Antiretrovirals
- Antineoplastics
- Tumor Necrosis Factor Blockers
- Multiple Sclerosis
- Attention Deficit Hyperactivity Disorder/Attention Deficit Disorder

If members are currently receiving one of these medications requests for coverage will be approved as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

**Continuity of Care – All Others**

Requests for continuity of care for all other medications will be at the discretion of the reviewer and may be considered if being used for a medically acceptable indication and the member is stable on therapy.

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 8.0**

**SECTION: Commercial Drug**
**SUBJECT: Ramelteon, Doxepin (generic Silenor), and Sublingual Zolpidem**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for ramelteon, doxepin (generic Silenor), and sublingual zolpidem for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.

5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:
    A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
    B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
    C. In accordance with current standards of medical practice;
    D. Not primarily for the convenience of the Member, or the Member's Provider; and
    E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of ramelteon or doxepin (generic Silenor) may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of chronic insomnia, defined as a history of insomnia greater than or equal to two (2) months **AND**
- Medical record documentation of failure on, intolerance to, or contraindication to use of formulary agents zolpidem (including controlled-release forms) **AND** eszopiclone **AND** zaleplon

A formulary exception for coverage of Sublingual Zolpidem (generic Intermezzo) may be made for members who meet the following criteria:

- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to two of the following: eszopiclone **OR** zaleplon **OR** zolpidem immediate-release **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to zolpidem CR

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If a formulary exception is approved ramelteon, doxepin (generic Silenor), or sublingual zolpidem will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

eszopiclone, estazolam, temazepam, zolpidem, zolpidem CR, zaleplon

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of a branded (formulary) medication, for which there is an AB-rated generic, may be made for members who meet the following criteria:

- Medical record documentation of therapeutic failure on or intolerance to the generic formulary agent(s) **OR**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to the inactive ingredients of the generic formulary agent(s)

**AND**

- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to up to three (3) formulary alternatives, if available

If an exception is made, the branded medication will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

AB-rated generics as listed in the Formulary

5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

6. ***VRE*** – Vancomycin-resistant *Enterococcus*
7. ***MRSA*** – Methicillin resistant *Staphylococcus aureus*
8. ***MSSA*** – Methicillin susceptible *Staphylococcus aureus*

**PROCEDURE:**

A formulary exception for coverage of linezolid may be made for members who meet the following criteria:

- Medical record documentation of Vancomycin-Resistant *Enterococcus* (VRE) *faecium* infection which has been diagnosed and documented with Infectious Disease consultation **OR**
- Medical record documentation of a diagnosis of nosocomial pneumonia caused by *Staphylococcus aureus* (MSSA and MRSA) or *Streptococcus pneumoniae* which has been diagnosed and documented with Infectious Disease consultation **OR**
- Medical record documentation of a diagnosis of complicated skin and structure infections, without concomitant osteomyelitis, caused by *Staphylococcus aureus* (MSSA and MRSA), *Streptococcus pyogenes*, or *Streptococcus agalactiae* which has been diagnosed and documented with Infectious Disease consultation **OR**
- Medical record documentation of a diagnosis of uncomplicated skin and skin structure infections caused by *Staphylococcus aureus* (MSSA only) which has been diagnosed and documented with Infectious Disease consultation **OR**
- Medical record documentation of a diagnosis of community acquired pneumonia caused by *Streptococcus pneumonia* or *Staphylococcus aureus* (MSSA only) which has been diagnosed and documented with infectious disease consultation

**AND**

- Medical record documentation of culture and sensitivity showing the member's infection is not susceptible to alternative antibiotic treatments **OR**

- Medical record documentation of previous intolerance to or contraindication to other antibiotics shown to be susceptible on the culture and sensitivity **OR**
- Medical record documentation that linezolid therapy was started during an inpatient setting

**For linezolid oral tablet requests exceeding 56 days of therapy in 180 days:**

- Medical record documentation of an infectious disease consultation documenting continued need of linezolid therapy

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

**AUTHORIZATION DURATION:** 28 days

If a formulary exception is approved linezolid will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**SUBJECT: Edarbi and Edarbyclor**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Edarbi and Edarbyclor for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

6. ***ACE –*** angiotensin converting enzyme
7. ***HCT –*** hydrochlorothiazide

**PROCEDURE:**

An exception for coverage of Edarbi or Edarbyclor may be made for individuals who meet the following criteria:

- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three (3) preferred formulary angiotensin receptor blockers

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: one tablet per day

If a formulary exception is approved Edarbi or Edarbyclor will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

**ARB:** candesartan, losartan, irbesartan, olmesartan, telmisartan, valsartan
**ARB/diuretic combinations:** candesartan/hctz, irbesartan/hctz, losartan/hctz, olmesartan/hctz, telmisartan/hctz, valsartan/hctz
**ACE inhibitors:** benazepril, captopril, enalapril, fosinopril, lisinopril, moexipril, quinapril, trandolapril, ramipril

**ACE inhibitors/diuretic combinations:** captopril/hctz, benazepril/hctz, enalapril/hctz, lisinopril/hctz, moexipril/hctz

**PHARMACY**
MANUAL

**POLICY NUMBER: 29.0**

**SECTION: Commercial Drug**
**SUBJECT: Human Growth Hormone**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for human growth hormone for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

Coverage for human growth hormone is available for members of Geisinger Health Plan who meet the following criteria:

**For Norditropin:**

- Medical record documentation of use for a Food and Drug Administration (FDA) approved indication

**For all other Growth Hormone Agents:**

- Medical record documentation of use for a Food and Drug Administration (FDA) approved indication **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Norditropin* (if applicable)

**MEDISPAN AUTHORIZATION LEVEL:**

- Norditropin GPI-14 (enter all): 3010002000D212, 3010002000D230, 3010002000D240, 3010002000D260
- Genotropin, Humatrope, Ngenla, Nutropin AQ, Saizen, Serostim, Skytrofa, Sogroya, Zomacton: GPI-12
- Omnitrope GPI-12 (enter all): 301000200021, 970510501063

**AUTHORIZATION DURATION:**

Authorization for Growth Hormone will be for a time period of one year. Continuation of coverage will be provided based on medical record documentation to determine if there is appropriate follow up care with the physician, if any endpoint criteria are met, or if any major change in clinical status has occurred.

**FDA Approved Indications:**
**Pediatric Growth Hormone Deficiency:** Norditropin, Genotropin, Humatrope, Ngenla, Nutropin AQ, Omnitrope, Saizen, Skytrofa, Sogroya, Zomacton

**Prader-Willi syndrome:** Norditropin, Genotropin, Omnitrope

**Small for Gestational Age (SGA):** Norditropin, Genotropin, Humatrope, Omnitrope, Zomacton

**Turner syndrome:** Norditropin, Genotropin, Humatrope, Nutropin AQ, Omnitrope, Zomacton

**Idiopathic short stature:** Norditropin, Genotropin, Humatrope, Nutropin AQ, Omnitrope, Zomacton

**Short stature homeobox-containing gene (SHOX) deficiency:** Humatrope, Zomacton

**Noonan syndrome:** Norditropin

**Growth Failure Secondary to Chronic Kidney Disease:** Nutropin AQ

**Adult Growth Hormone Deficiency:** Norditropin, Genotropin, Humatrope, Nutropin AQ, Omnitrope, Saizen, Sogroya, Zomacton

**HIV patients with wasting or cachexia:** Serostim

**Short bowel syndrome**: Zorbtive

If an exception is made, human growth hormone will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**
Norditropin*

3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

Coverage of compounded prescriptions is available if the following criteria are met:

- The compounded medication does not contain any excluded active ingredients **AND**
- The safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature **AND**
- Medical record documentation of therapeutic failure on, contraindication to, or intolerance to formulary alternatives

****An authorization should only be entered for approved, non-excluded compound ingredients.**

****If the compound contains ingredients that are excluded from coverage, the dispensing pharmacy has the ability to enter submission clarification code (SCC) 08 in order to be reimbursed for all covered products.**

****If none of the ingredients being compounded requires a prescription to be dispensed, the compounded prescription is excluded from coverage. ****

****Compounds of products that have not received FDA approval or for a diagnosis for which there is no FDA approved treatment indication are excluded from coverage (i.e., natural hormones).****

****Certain compounds will require a prior authorization if a certain cost threshold is met.****

MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Itraconazole**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for itraconazole for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

**Coverage of itraconazole for the treatment of onychomycosis is not a covered service under the prescription benefit.**

**Itraconazole** coverage is available if **all** of the following criteria are met:

- Medical record documentation of **one or a combination** of the following diagnoses:
  - Dermatomycoses due to tinea corporis, tinea cruris, tinea pedis, or pityriasis versicolor
  - Invasive pulmonary aspergillosis
  - Noninvasive pulmonary aspergillosis
  - Extrapulmonary aspergillosis
  - Oral candidiasis
  - Oral/esophageal candidiasis
  - Chronic pulmonary histoplasmosis
  - Cutaneous sporotrichosis
  - Lymphatic sporotrichosis
  - Paracoccidioidomycosis
  - Chromomycosis
  - Blastomycosis **AND**
- Medical record documentation of a positive culture substantiating the diagnosis and/or diagnoses

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If an exception is made, itraconazole will be paid for under the member’s prescription drug benefit.

Geisinger

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 36.0**

**SECTION: Commercial Drug**
**SUBJECT: Dexlansoprazole & Omeprazole/ Sodium Bicarbonate Capsules**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for dexlansoprazole and omeprazole/sodium bicarbonate capsules for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for the coverage of **dexlansoprazole** may be made for members who meet the following criterion:

- Electronic step therapy of on-line prescription drug claims history showing 15 days use of omeprazole **AND** pantoprazole **AND** lansoprazole **AND** rabeprazole **AND** esomeprazole, within the previous 180 days. If this electronic step is met, the claim will automatically adjudicate **OR**

- Medical record documentation of a contraindication to, intolerance to, or therapeutic failure on the maximal doses of omeprazole, pantoprazole, lansoprazole, rabeprazole, and esomeprazole

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 capsule per day

An exception for the coverage of **Omeprazole/Sodium Bicarbonate Capsules** may be made for members who meet the following criterion:

- Medical record documentation of a contraindication to, intolerance to, or therapeutic failure on the maximal doses of omeprazole, pantoprazole, lansoprazole, rabeprazole, dexlansoprazole*, and esomeprazole

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If an exception is made, dexlansoprazole or omeprazole/sodium bicarbonate capsules will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

omeprazole, pantoprazole, lansoprazole, rabeprazole, esomeprazole

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 41.0**

**SECTION: Commercial Drug**
**SUBJECT: Enbrel**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Enbrel for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**
New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

**For treatment of adult rheumatoid arthritis:**
An exception for coverage of Enbrel (which is self-administered) may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of moderate to severe rheumatoid arthritis (made in accordance with the American College of Rheumatology Criteria for the Classification and Diagnosis of Rheumatoid Arthritis) **AND**
- Medical record documentation that Enbrel is prescribed by a rheumatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of an inadequate response to a minimum 3 month trial of methotrexate or other disease modifying anti-rheumatic drug (DMARD) if methotrexate is not tolerated or contraindicated **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy **AND**
- Medical record documentation that Enbrel is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, number of claims authorized = 1, enter for 1 month duration

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 50 mg syringe/pen: 4 mL per 28 days
  - 25 mg syringe: 4 mL per 28 days
  - 25 mg vial: 8 vials per 28 days

**RE-AUTHORIZATION CRITERIA:** Enbrel is configured as a prior authorization for new starts only. Enbrel will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

azathioprine, cyclosporine, hydroxychloroquine, methotrexate, sulfasalazine, leflunomide, Depen, Ridaura

**For treatment of polyarticular juvenile idiopathic arthritis or juvenile rheumatoid arthritis:**
An exception for coverage of Enbrel (which is self-administered) may be made for members who meet the following criteria:

- Medical record documentation of age greater than or equal to 2 years **AND**
- Medical record documentation that Enbrel is prescribed by a rheumatologist **AND**
- Medical record documentation of a diagnosis of moderate to severely active polyarticular juvenile idiopathic arthritis or juvenile rheumatoid arthritis **AND**
- Medical record documentation of an inadequate response to a minimum 3 month trial of both NSAID therapy **AND** methotrexate or other DMARD if methotrexate therapy is contraindicated **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy **AND**
- Medical record documentation that Enbrel is <u>not</u> being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**RE-AUTHORIZATION CRITERIA:** Enbrel is configured as a prior authorization for new starts only. Enbrel will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, number of claims authorized = 1, enter for 1 month duration

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 50 mg syringe/pen: 4 mL per 28 days
  - 25 mg syringe: 4 mL per 28 days
  - 25 mg vial: 8 vials per 28 days

**FORMULARY ALTERNATIVES:**
methotrexate, sulfasalazine

**For the treatment of Psoriatic Arthritis:**
An exception for coverage of Enbrel (which is self-administered) may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of moderately to severely active psoriatic arthritis which must include documentation of either active psoriatic lesions or a documented history of psoriasis **AND**
- Medical record documentation that Enbrel is prescribed by a rheumatologist or dermatologist **AND**
- Medical record documentation that Enbrel is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent **AND**
- Medical record documentation of one of the following:
    - For peripheral disease: Medical record documentation of an intolerance to, contraindication to, or therapeutic failure on methotrexate **AND** an adequate trial of at least two (2) formulary nonsteroidal anti-inflammatory drugs (NSAIDs) **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy **OR**
    - For axial disease: Medical record documentation of an intolerance to, contraindication to, or therapeutic failure to an adequate trial of at least two (2) formulary nonsteroidal anti-inflammatory drugs (NSAIDs) **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy

**RE-AUTHORIZATION CRITERIA:** Enbrel is configured as a prior authorization for new starts only. Enbrel will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, number of claims authorized = 1, enter for 1 month duration

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
    - 50 mg syringe/pen: 4 mL per 28 days
    - 25 mg syringe: 4 mL per 28 days
    - 25 mg vial: 8 vials per 28 days

**FORMULARY ALTERNATIVES:**

methotrexate, celecoxib, choline magnesium salicylate, diclofenac, diclofenac extended release, diflunisal, etodolac, etodolac extended release, fenoprofen, flurbiprofen, ibuprofen, indomethacin, indomethacin sustained release, ketoprofen, ketorolac, meclofenamate, meloxicam, nabumetone, naproxen, naproxen sodium, naproxen EC, oxaprozin, piroxicam, salsalate, sulindac, tolmetin

**For the treatment of Juvenile Psoriatic Arthritis:**
An exception for coverage of Enbrel (which is self-administered) may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of moderately to severely active psoriatic arthritis **AND**
- Medical record documentation that Enbrel is prescribed by a rheumatologist or dermatologist **AND**
- Medical record documentation of age greater than or equal to 2 years **AND**
- Medical record documentation that Enbrel is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent **AND**
- Medical record documentation of one of the following:
    - For peripheral disease: Medical record documentation of an intolerance to, contraindication to, or therapeutic failure on methotrexate **AND** an adequate trial of at least two (2) formulary nonsteroidal anti-inflammatory drugs (NSAIDs) **OR** medical record documentation of therapeutic failure on or intolerance to prior biologic therapy **OR**
    - For axial disease: Medical record documentation of an intolerance to, contraindication to, or therapeutic failure to an adequate trial of at least two (2) formulary nonsteroidal anti-inflammatory drugs (NSAIDs) **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy **AND**
- Medical record documentation that the prescribed dosing is appropriate for member's weight

**RE-AUTHORIZATION CRITERIA:** Enbrel is configured as a prior authorization for new starts only. Enbrel will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, number of claims authorized = 1, enter for 1 month duration

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
    - 50 mg syringe/pen: 4 mL per 28 days
    - 25 mg syringe: 4 mL per 28 days
    - 25 mg vial: 8 vials per 28 days

**FORMULARY ALTERNATIVES:**

methotrexate, celecoxib, diclofenac, diclofenac extended release, ibuprofen, etodolac extended release (Children ≥6 years weighing at least 20 kg), indomethacin, indomethacin sustained release (adolescents ≥15 years), ketorolac, meclofenamate (Adolescents ≥14 years), meloxicam, naproxen, naproxen sodium, naproxen EC, oxaprozin (children ≥6 years), piroxicam, sulindac, tolmetin

**For the treatment of ankylosing spondylitis:**
An exception for coverage of Enbrel (which is self-administered) may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of ankylosing spondylitis **AND**
- Medical record documentation that Enbrel is prescribed by a rheumatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Physician documentation of a therapeutic failure on, contraindication to, or intolerance to an adequate trial of at least two (2) nonsteroidal anti-inflammatory drugs (NSAIDS) **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy **AND**
- Medical record documentation that Enbrel is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**RE-AUTHORIZATION CRITERIA:** Enbrel is configured as a prior authorization for new starts only. Enbrel will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, number of claims authorized = 1, enter for 1 month duration

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 50 mg syringe/pen: 4 mL per 28 days
  - 25 mg syringe: 4 mL per 28 days
  - 25 mg vial: 8 vials per 28 days

**FORMULARY ALTERNATIVES:**
celecoxib, choline magnesium salicylate, diclofenac, diclofenac extended release, diflunisal, etodolac, etodolac extended release, fenoprofen, flurbiprofen, ibuprofen, indomethacin, indomethacin sustained release, ketoprofen, ketorolac, meclofenamate, meloxicam, nabumetone, naproxen, naproxen sodium, naproxen EC, oxaprozin, piroxicam, salsalate, sulindac, tolmetin

**For the treatment of moderate to severe Plaque Psoriasis:**
An exception for coverage of Enbrel (which is self-administered) may be made for members who meet the following criteria:

- Medical record documentation that Enbrel is prescribed by a dermatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of moderate to severe plaque psoriasis characterized by greater than or equal to 5% of body surface area involved or disease involving crucial body areas such as the hands, feet, face, or genitals **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to topical corticosteroids **AND** at least two to three months of systemic therapy (including but not limited to methotrexate and/or cyclosporine) or phototherapy **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy **AND**
- Medical record documentation that Enbrel is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**RE-AUTHORIZATION CRITERIA:** Enbrel is configured as a prior authorization for new starts only. Enbrel will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT:**

- **Initial Request for Enbrel 50 mg syringe/pen, 25 mg syringe**
  - Add treat as "include" process modifier, ignore misc handler, max scripts 3, max script quantity 8, with a duration of 3 months
    - QL FOR LETTER: Loading dose: 8 mL per 28 days; Maintenance dose: 4 mL per 28 days
- **Initial Request for Enbrel 25 mg vial**
  - Add treat as "include" process modifier, ignore misc handler, max scripts 3, max script quantity 16, with a duration of 3 months
    - QL FOR LETTER: Loading dose: 16 mL per 28 days; Maintenance dose: 8 mL per 28 days
- **Renewal Requests** – *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*
  - QL FOR LETTER ONLY:
    - 50 mg syringe/pen: 4 mL per 28 days

- 25 mg syringe: 4 mL per 28 days
- 25 mg vial: 8 vials per 28 days

**FORMULARY ALTERNATIVES:**

cyclosporine, methotrexate

**Low-potency topical corticosteroids:** alclometasone dipropionate 0.5% cream and ointment (Aclovate); desonide 0.05% cream, ointment and lotion (Desowen); fluocinolone acetonide 0.01% cream, solution, body and scalp oil (Synalar/Derma-Smoothe); hydrocortisone 1% and 2.5% cream, ointment, and lotion (Hytone)

**Medium-potency topical corticosteroids:** betamethasone valerate 0.1% cream and lotion (Valisone); fluocinolone acetonide 0.025% cream and ointment (Synalar); flurandrenolide 0.05% cream, ointment, and lotion (Cordran); fluticasone propionate 0.05% cream and lotion (Cutivate); hydrocortisone butyrate 0.1% cream, ointment and solution (Locoid); hydrocortisone valerate 0.2% cream and ointment (Westcort); mometasone 0.1% cream (Elocon); prednicarbate 0.1% cream and ointment (DermAtop); triamcinolone acetonide 0.025% cream, ointment and lotion (Kenalog); triamcinolone 0.1% cream, ointment and lotion (Kenalog); triamcinolone acetonide 0.147 mg/g aerosol (Kenalog Spray)

**High-potency topical corticosteroids:** amcinonide 0.1% cream, ointment and lotion (Cyclocort); augmented betamethasone dipropionate 0.05% cream (Diprolene AF); betamethasone dipropionate 0.05% cream, ointment and lotion (Diprolene); betamethasone valerate 0.1% ointment (Valisone); betamethasone valerate 0.12% foam (Luxiq); desoximetasone 0.25% cream, ointment and 0.05% cream, gel, ointment (Topicort/Topicort LP); ); diflorasone 0.05% cream (Florone/Psorcon); fluocinonide 0.05% cream, ointment, gel and solution (Lidex); fluticasone 0.005% ointment (Cutivate); mometasone 0.1% ointment (Elocon); triamcinolone 0.5% cream and ointment (Kenalog)

**Very high-potency topical corticosteroids:** augmented betamethasone dipropionate 0.05% ointment, gel and lotion (Diprolene); clobetasol 0.05% cream, ointment, scalp lotion, shampoo, foam, spray (Temovate/Clobex/Olux) diflorasone diacetate 0.05% ointment (ApexiCon/Psorcon E), fluocinonide 0.1% cream (Vanos), halobetasol 0.05% cream and ointment (Ultravate)

**For the treatment of pediatric Plaque Psoriasis:**
An exception for coverage of Enbrel (which is self-administered) may be made for members who meet the following criteria:

- Medical record documentation that Enbrel is prescribed by a dermatologist **AND**
- Medical record documentation of age greater than or equal to 4 years **AND**
- Medical record documentation of a diagnosis of moderate to severe plaque psoriasis characterized by greater than or equal to 5% of body surface area involved or disease involving crucial body areas such as the hands, feet, face, or genitals **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to two (2) topical corticosteroids **AND**
- Medical record documentation that Enbrel is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**RE-AUTHORIZATION CRITERIA:** Enbrel is configured as a prior authorization for new starts only. Enbrel will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 45.0**

**SECTION: Commercial Drug**
**SUBJECT: Pulmozyme**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Pulmozyme for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Pulmozyme may be made for members who meet all of the following criteria:

- Medical record documentation of a diagnosis of cystic fibrosis (CF) **AND**
- Medical record documentation that Pulmozyme is prescribed by a pulmonologist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Pulmozyme will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.

5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:
    A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
    B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
    C. In accordance with current standards of medical practice;
    D. Not primarily for the convenience of the Member, or the Member's Provider; and
    E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of darifenacin ER, Gemtesa, Oxytrol, tolterodine ER, fesoterodine ER, or trospium XR may be made for members who meet the following criteria:

- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to use of oxybutynin, oxybutynin XL or tolterodine **AND** solifenacin

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, if request is for darifenacin ER, fesoterodine ER, tolterodine ER, or trospium XR include generic only.

If a formulary exception is approved darifenacin ER, Gemtesa, Oxytrol, tolterodine ER, fesoterodine ER, or trospium XR will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

oxybutynin, oxybutynin XL, solifenacin, tolterodine, Myrbetriq

MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Antihemophilic Agents for Hemophilia B**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for antihemophilic agents for hemophilia B for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of self-administered antihemophilic agents for hemophilia B may be made for members who meet all of the following criteria:

- Medical record documentation of a diagnosis of hemophilia B (a documented Factor IX deficiency) **AND**
- Medical record documentation that the antihemophilic agent will be for outpatient use **AND**
- Medical record documentation that the antihemophilic agent will be used for routine prophylaxis, on-demand treatment/control of bleeding episodes, **OR** perioperative management of bleeding

| | Routine Prophylaxis | On-Demand/ Perioperative |
|---|---|---|
| Alphanine SD | | X |
| Alprolix | X | X |
| Bebulin | | X |
| BeneFIX | | X |

Geisinger

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 67.0**

**SECTION: Commercial Drug**
**SUBJECT: Pimecrolimus Cream**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for pimecrolimus cream for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of pimecrolimus cream may be made for members who meet **all** of the following criteria:

- Medical record documentation of a diagnosis of atopic dermatitis **AND**
- Medical record documentation of contraindication to, intolerance to, or therapeutic failure on tacrolimus ointment **AND**
- Medical record documentation of contraindication to, intolerance to or therapeutic failure on at least two formulary topical corticosteroids unless deemed inadvisable due to potential risks such as (a) use on sensitive skin areas (face, axillae, or groin) **or** (b) patient is between 2 and 15 years of age

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If a formulary exception is approved, pimecrolimus cream will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

tacrolimus ointment
**Low-potency topical corticosteroids:** alclometasone dipropionate 0.5% cream and ointment (Aclovate); desonide 0.05% cream, ointment and lotion (Desowen); fluocinolone acetonide 0.01% cream, solution, body and scalp oil (Synalar/Derma-Smoothe); hydrocortisone 1% and 2.5% cream, ointment, and lotion (Hytone)
**Medium-potency topical corticosteroids:** betamethasone valerate 0.1% cream and lotion (Valisone); fluocinolone acetonide 0.025% cream and ointment (Synalar); flurandrenolide

0.05% cream, ointment, and lotion (Cordran); fluticasone propionate 0.05% cream and lotion (Cutivate); hydrocortisone butyrate 0.1% cream, ointment and solution (Locoid); hydrocortisone valerate 0.2% cream and ointment (Westcort); mometasone 0.1% cream (Elocon); prednicarbate 0.1% cream and ointment (DermAtop); triamcinolone acetonide 0.025% cream, ointment and lotion (Kenalog); triamcinolone 0.1% cream, ointment and lotion (Kenalog); triamcinolone acetonide 0.147 mg/g aerosol (Kenalog Spray)
**High-potency topical corticosteroids:** amcinonide 0.1% cream, ointment and lotion (Cyclocort); augmented betamethasone dipropionate 0.05% cream (Diprolene AF); betamethasone dipropionate 0.05% cream, ointment and lotion (Diprolene); betamethasone valerate 0.1% ointment (Valisone); betamethasone valerate 0.12% foam (Luxiq); desoximetasone 0.25% cream, ointment and 0.05% cream, gel, ointment (Topicort/Topicort LP); ); diflorasone 0.05% cream (Florone/Psorcon); fluocinonide 0.05% cream, ointment, gel and solution (Lidex); fluticasone 0.005% ointment (Cutivate); mometasone 0.1% ointment (Elocon); triamcinolone 0.5% cream and ointment (Kenalog)
**Very high-potency topical corticosteroids:** augmented betamethasone dipropionate 0.05% ointment, gel and lotion (Diprolene); clobetasol 0.05% cream, ointment, scalp lotion, shampoo, foam, spray (Temovate/Clobex/Olux) diflorasone diacetate 0.05% ointment (ApexiCon/Psorcon E), fluocinonide 0.1% cream (Vanos), halobetasol 0.05% cream and ointment (Ultravate)

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY NUMBER: 71.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Kineret**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Kineret for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

**For Rheumatoid Arthritis:**

A formulary exception for coverage of Kineret may be made for members who meet all of the following criteria:

- Medical record documentation of a diagnosis of moderate to severe rheumatoid arthritis made in accordance with the American College of Rheumatology Criteria for the Classification and Diagnosis of Rheumatoid Arthritis **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation that Kineret is prescribed by a rheumatologist **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to a minimum 3 month trial of two (2) preferred formulary biologics for the treatment of rheumatoid arthritis
- Medical record documentation that Kineret is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *QLs must be entered within the authorization. Start date is the same for both authorizations.*

1. Add PE, OQL, DS max quantity dispensed 0.67, min day supply 28, max day supply 28
    - QL FOR LETTER: 0.67 ml per day, 28 day supply per fill

**AUTHORIZATION DURATION:** Approval will be given for a duration of twelve (12) months. For continuation of coverage, medical record documentation of clinical improvement or lack of progression in signs and symptoms of rheumatoid arthritis on Kineret therapy is required.

**FORMULARY ALTERNATIVES:**

Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Enbrel*, Rinvoq*, Xeljanz*

*prior authorization required

**For Neonatal-Onset Multisystem Inflammatory Disease**
A formulary exception for coverage of Kineret may be made for members who meet all of the following criteria:

- Medical record documentation of diagnosis of Neonatal-Onset Multisystem Inflammatory Disease (NOMID) **AND**
- Medical record documentation that Kineret is prescribed by an immunologist, rheumatologist, or allergist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**AUTHORIZATION DURATION:** Approval will be given for a duration of twelve (12) months. For continuation of coverage, medical record documentation of clinical improvement or lack of progression in signs and symptoms of Neonatal-Onset Multisystem Inflammatory Disease on Kineret therapy is required.

**FORMULARY ALTERNATIVES:**
none

**For Cryopyrin-Associated Periodic Syndrome (CAPS)**
A formulary exception for coverage of Kineret may be made for members who meet all of the following criteria:

- Medical record documentation of diagnosis of Cryopyrin–Associated Periodic Syndrome (CAPS), including Familial Cold Autoinflammatory Syndrome (FCAS), and Muckle-Wells Syndrome (MWS) supported by documentation of genetic testing to identify the CIAS1/NLRP-3 gene mutation **AND**
- Medical record documentation that Kineret is prescribed by an immunologist, rheumatologist, or allergist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**AUTHORIZATION DURATION:** Approval will be given for a duration of twelve (12) months. For continuation of coverage, medical record documentation of clinical improvement or lack of progression in signs and symptoms of Cryopyrin-Associated Periodic Syndrome on Kineret therapy is required.

**FORMULARY ALTERNATIVES:**
none

**For Deficiency of Interleukin-1 Receptor Antagonist (DIRA)**
A formulary exception for coverage of Kineret may be made for members who meet all of the following criteria:

- Medical record documentation of a diagnosis of Deficiency of Interleukin-1 Receptor Antagonist (DIRA) supported by documentation of a homozygous or compound heterozygous mutation in IL1RN (Interleukin 1 Receptor Antagonist gene) **AND**
- Medical record documentation that Kineret is prescribed by or in consultation with a rheumatologist, geneticist, dermatologist, or a physician specializing in the treatment of autoinflammatory disorders

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**AUTHORIZATION DURATION:** Approval will be given for a duration of twelve (12) months. For continuation of coverage, medical record documentation of clinical improvement or lack of progression in signs and symptoms of Deficiency of Interleukin-1 Receptor Antagonist on Kineret therapy is required.

**FORMULARY ALTERNATIVES:**
none

If a formulary exception is approved, Kineret will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**POLICY NUMBER: 72.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Actimmune**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Actimmune for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Actimmune may be made for members who meet the following criterion:

- Medical record documentation of a diagnosis of chronic granulomatous disease **OR** osteopetrosis

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Actimmune will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Sirolimus**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for sirolimus for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of sirolimus may be made for members who meet **all** of the following criteria:

**Renal Transplant**

- Medical record documentation of age greater than or equal to 13 years **AND**
- Medical record documentation of a renal transplant

**Lymphangioleiomyomatosis**

- Medical record documentation of a diagnosis of lymphangioleiomyomatosis

**Graft vs. Hose Disease Prophylaxis**

- Medical record documentation of use for graft versus host disease prophylaxis **AND**
- Medical record documentation of treatment with a calcineurin inhibitors **AND** one of the following:
    - Medical record documentation of therapeutic failure on, intolerance to, or contraindication to methotrexate or mycophenolate mofetil **OR**
    - Use of triple therapy with a calcineurin inhibitor, methotrexate or mycophenolate mofetil, and sirolimus

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, generic only

If an exception is made, sirolimus will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Renal Transplant: azathioprine, cyclosporine, mycophenolate, tacrolimus
Graft versus Host Disease: methotrexate, mycophenolate mofetil

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 84.0**

**SECTION: Commercial Drug**
**SUBJECT: Humira, Adalimumab-FKJP, Hadlima, and Yusimry**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Humira, adalimumab-FKJP, Hadlima and Yusimry for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

**For Adult Rheumatoid Arthritis**

An exception for coverage of **BIWEEKLY (every other week) administration** of Humira, adalimumab-FKJP, Hadlima, or Yusimry may be made for members who meet all the following criteria:

- Medical record documentation of a diagnosis of moderate to severe rheumatoid arthritis (made in accordance with the American College of Rheumatology Criteria for the Classification and Diagnosis of Rheumatoid Arthritis) **AND**
- Medical record documentation that adalimumab is prescribed by a rheumatologist **AND**
- Medical record documentation of an inadequate response to a minimum 3 month trial of methotrexate or other disease modifying anti-rheumatic drug (DMARD) if methotrexate is not tolerated or contraindicated **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation that adalimumab is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

An exception for coverage of **WEEKLY administration** of Humira, adalimumab-FKJP, Hadlima, or Yusimry may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of moderate to severe rheumatoid arthritis (made in accordance with the American College of Rheumatology Criteria for the Classification and Diagnosis of Rheumatoid Arthritis) **AND**
- Medical record documentation that adalimumab is prescribed by a rheumatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of an inadequate response to a minimum 3 month trial of methotrexate or other disease modifying anti-rheumatic drug (DMARD) if methotrexate is not tolerated or contraindicated **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy **AND**
- Medical record documentation that the member has been compliant with BIWEEKLY administration of adalimumab **AND**
- Medical record documentation of a contraindication to, intolerance to, or therapeutic failure on BIWEEKLY (every other week) administration of adalimumab **AND**
- Medical record documentation that adalimumab is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**RE-AUTHORIZATION CRITERIA:** Adalimumab is configured as a prior authorization for new starts only. Adalimumab will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**MEDISPAN AUTHORIZATION LEVEL:** Select GHPHUMIRA Quick Code, no MediSpan authorization level required

**QUANTITY LIMIT:** *QLs must be entered within the authorization.*

- **Biweekly Dosing**
    1. In NCRX: Add PA, max script 1, enter for the remainder of the calendar year
    2. In PA Hub: Add OQL, max quantity dispensed 2, with an end date of 12/31/2099
        - QL for letter: 2 per 28 days
- **Weekly Dosing –**
    1. In NCRX: Add PA, max script 1, enter for the remainder of the calendar year
    2. In PA Hub: Add OQL, max quantity dispensed 4, with an end date of 12/31/2099
        - QL FOR LETTER: 4 per 28 days

**FORMULARY ALTERNATIVES:**

azathioprine, cyclosporine, hydroxychloroquine, methotrexate, sulfasalazine, leflunomide, Depen, Ridaura

**For treatment of polyarticular juvenile idiopathic arthritis or juvenile rheumatoid arthritis**
An exception for coverage of **BIWEEKLY (every other week) administration** of Humira, adalimumab-FKJP, Hadlima, or Yusimry may be made for members who meet all the following criteria:

- Medical record documentation of age greater than or equal to 2 years **AND**
- Medical record documentation that adalimumab is prescribed by a rheumatologist **AND**
- Medical record documentation of a diagnosis of active polyarticular juvenile idiopathic arthritis or juvenile rheumatoid arthritis **AND**
- Medical record documentation of an inadequate response to a minimum 3 month trial of both nonsteroidal anti-inflammatory drug (NSAID) therapy **AND** methotrexate or other disease modifying anti-rheumatic drug (DMARD) if methotrexate therapy is contraindicated **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy **AND**
- Medical record documentation that adalimumab is being dosed at a maximum of 40 mg every other week **OR** medical record documentation of peer-reviewed literature citing well-designed clinical trials to indicate that the member's healthcare outcome will be improved by dosing that exceeds Food and Drug Administration (FDA) approved labeling **AND**
- Medical record documentation that adalimumab is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**RE-AUTHORIZATION CRITERIA:** Adalimumab is configured as a prior authorization for new starts only. Adalimumab will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**MEDISPAN AUTHORIZATION LEVEL:** Select GHPHUMIRA Quick Code, no MediSpan authorization level required

**QUANTITY LIMIT:** *QLs must be entered within the authorization.*

- **Biweekly Dosing**
    1. In NCRX: Add PA, max script 1, enter for the remainder of the calendar year
    2. In PA Hub: Add OQL, max quantity dispensed 2, with an end date of 12/31/2099
        - QL FOR LETTER: 2 per 28 days

**FORMULARY ALTERNATIVES:**

methotrexate, sulfasalazine

**For Psoriatic Arthritis**

An exception for coverage of **BIWEEKLY (every other week) administration** of Humira, adalimumab-FKJP, Hadlima, or Yusimry may be made for members who meet all the following criteria:

- Medical record documentation of a diagnosis of moderately to severely active psoriatic arthritis which must include documentation of either active psoriatic lesions or a documented history of psoriasis **AND**
- Medical record documentation that adalimumab is prescribed by a rheumatologist or dermatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- **For peripheral disease**: Medical record documentation of an intolerance to, contraindication to, or therapeutic failure on methotrexate **AND** an adequate trial of at least two (2) formulary nonsteroidal anti-inflammatory drugs (NSAIDs) **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy **OR**
- **For axial disease**: Medical record documentation of an intolerance to, contraindication to, or therapeutic failure to an adequate trial of at least two (2) formulary nonsteroidal anti-inflammatory drugs (NSAIDs) **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy **AND**
- Medical record documentation that adalimumab is being dosed at a maximum of 40 mg every other week **OR** medical record documentation of peer-reviewed literature citing well-designed clinical trials to indicate that the member's healthcare outcome will be improved by dosing that exceeds Food and Drug Administration (FDA) approved labeling **AND**
- Medical record documentation that adalimumab is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**RE-AUTHORIZATION CRITERIA:** Adalimumab is configured as a prior authorization for new starts only. Adalimumab will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**MEDISPAN AUTHORIZATION LEVEL:** Select GHPHUMIRA Quick Code, no MediSpan authorization level required

**QUANTITY LIMIT:** *QLs must be entered within the authorization.*

- **Biweekly Dosing**
    1. In NCRX: Add PA, max script 1, enter for the remainder of the calendar year
    2. In PA Hub: Add OQL, max quantity dispensed 2, with an end date of 12/31/2099
        - QL FOR LETTER: 2 per 28 days

**FORMULARY ALTERNATIVES:**
methotrexate, celecoxib, choline magnesium salicylate, diclofenac, diclofenac extended release, diflunisal, etodolac, etodolac extended release, fenoprofen, flurbiprofen, ibuprofen, indomethacin, indomethacin sustained release, ketoprofen, ketorolac, meclofenamate, meloxicam, nabumetone, naproxen, naproxen sodium, naproxen EC, oxaprozin, piroxicam, salsalate, sulindac, tolmetin

**For Ankylosing Spondylitis**
An exception for coverage of **BIWEEKLY (every other week) administration** of Humira, adalimumab-FKJP, Hadlima, or Yusimry may be made for members who meet all the following criteria:

- Medical record documentation that adalimumab is prescribed by a rheumatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of ankylosing spondylitis **AND**
- Physician documentation of a therapeutic failure on, contraindication to, or intolerance to an adequate trial of at least two (2) nonsteroidal anti-inflammatory drugs (NSAIDS) **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy **AND**
- Medical record documentation that adalimumab is being dosed at a maximum of 40 mg every other week **OR** medical record documentation of peer-reviewed literature citing well-designed clinical trials to indicate that the member's healthcare outcome will be improved by dosing that exceeds Food and Drug Administration (FDA) approved labeling **AND**
- Medical record documentation that adalimumab is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**RE-AUTHORIZATION CRITERIA:** Adalimumab is configured as a prior authorization for new starts only. Adalimumab will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**QUANTITY LIMIT:** *QLs must be entered within the authorization.*

- **Biweekly Dosing**
    1. In NCRX: Add PA, max script 1, enter for the remainder of the calendar year
    2. In PA Hub: Add OQL, max quantity dispensed 2, with an end date of 12/31/2099
        - QL FOR LETTER: 2 per 28 days

**FORMULARY ALTERNATIVES:**

celecoxib, choline magnesium salicylate, diclofenac, diclofenac extended release, diflunisal, etodolac, etodolac extended release, fenoprofen, flurbiprofen, ibuprofen, indomethacin, indomethacin sustained release, ketoprofen, ketorolac, meclofenamate, meloxicam, nabumetone, naproxen, naproxen sodium, naproxen EC, oxaprozin, piroxicam, salsalate, sulindac, tolmetin

**For Crohn's Disease**
An exception for coverage of **BIWEEKLY (every other week) administration** of Humira, adalimumab-FKJP, Hadlima, or Yusimry may be made for members who meet all the following criteria:

- Medical record documentation that adalimumab is prescribed by a gastroenterologist **AND**
- Medical record documentation of age greater than or equal to 6 years **AND**
- Medical record documentation of a diagnosis of moderately or severely active Crohn's disease **AND**
- Medical record documentation of one of the following:
    - Medical record documentation of therapeutic failure on, intolerance to, or contraindication to corticosteroids **AND** immunomodulators (e.g. azathioprine and 6-mercaptopurine) **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy **OR**
    - Medical record documentation of moderate/high risk patient as defined by age at initial diagnosis less than 30 years, extensive anatomic involvement, perianal and/or severe rectal disease, deep ulcers, prior surgical resection, and structuring and/or penetrating behavior **AND**
- Medical record documentation that adalimumab is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

An exception for coverage of **WEEKLY administration** of Humira, adalimumab-FKJP, Hadlima, or Yusimry may be made for members who meet the following criteria:

- Medical record documentation that adalimumab is prescribed by a gastroenterologist **AND**
- Medical record documentation of age greater than or equal to 6 years **AND**
- Medical record documentation of a diagnosis of moderately or severely active Crohn's disease **AND**
- Medical record documentation of one of the following:
    - Medical record documentation of therapeutic failure on, intolerance to, or contraindication to corticosteroids **AND** immunomodulators (e.g. azathioprine and 6-mercaptopurine) **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy **OR**
    - Medical record documentation of moderate/high risk patient as defined by age at initial diagnosis less than 30 years, extensive anatomic involvement, perianal and/or severe rectal disease, deep ulcers, prior surgical resection, and structuring and/or penetrating behavior **AND**

- Medical record documentation that adalimumab is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent **AND**
- Medical record documentation of a contraindication to, intolerance to, or therapeutic failure on BIWEEKLY (every other week) administration of adalimumab **AND**
- Medical record documentation that the member has been compliant with BIWEEKLY administration of adalimumab **AND**
- Medical record documentation of inadequate drug trough level (less than 7.5mcg/mL) to support weekly dosing, per American Gastroenterological Association (AGA) guidelines

**NOTE:**

- For patients with an adequate drug trough, American Gastroenterological Association (AGA) does not recommend antibody levels to guide therapy. Patients should be switched to another agent.
- For patients with an inadequate drug trough & undetectable antibodies, a dose increase may be warranted.
- For patients with an inadequate drug trough & detectable antibodies, a switch to another agent is recommended. However, patients with low antibody levels may be considered for a dose increase, in hopes of overcoming antibody level and achieving response.

**RE-AUTHORIZATION CRITERIA:** Adalimumab is configured as a prior authorization for new starts only. Adilimumab will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**MEDISPAN AUTHORIZATION LEVEL:** Select GHPHUMIRA Quick Code, no MediSpan authorization level required

**QUANTITY LIMIT:**

- **Adults and pediatrics > 40 kg: 160 mg on day 1, 80 mg 2 weeks later, then 40 mg biweekly –** *Two authorizations must be entered.*
    1. In NCRX: Add PA, OQL, max quantity 6, max day supply 28, max script 1 for a 3 week authorization duration
    2. In PA Hub: Add OQL, max quantity dispensed 2, with an end date of 12/31/2099. Start date of this authorization is 3 weeks after approval date.
        - QL FOR LETTER: Loading dose: 160 mg on day 1, 80 mg 2 weeks later; Maintenance dose: 40 mg every other week (2 pens/syringes per 28 days)
- **Pediatrics < 40 kg: 80 mg on day 1, 40 mg 2 weeks later, then 20 mg biweekly –** *Two authorizations must be entered.*
    1. In NCRX: Add PA, max script 1, enter for the remainder of the calendar year
    2. In PA Hub: Add OQL, max quantity dispensed 2, with an end date of 12/31/2099. Start date of this authorization is 3 weeks after approval date.
        - QL FOR LETTER: Loading dose: 80 mg on day 1, 40 mg 2 weeks later; Maintenance dose: 20 mg every other week (2 pens/syringes per 28 days)
- **Weekly Dosing –** *QL must be entered within the authorization.*
    1. In NCRX: Add PA, max script 1, enter for the remainder of the calendar year
    2. In PA Hub: Add OQL, max quantity dispensed 4, with an end date of 12/31/2099
        - QL FOR LETTER: 4 per 28 days

**FORMULARY ALTERNATIVES:**
Corticosteroids: prednisone, budesonide
Immunomodulators: azathioprine, 6-mercaptopurine

**For the treatment of moderate to severe Plaque Psoriasis**
An exception for coverage of **BIWEEKLY (every other week) administration** of Humira, adalimumab-FKJP, Hadlima, or Yusimry may be made for members who meet all the following criteria:

- Medical record documentation that adalimumab is prescribed by a dermatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of moderate to severe plaque psoriasis characterized by greater than or equal to 5% of body surface area involved or disease involving crucial body areas such as the hands, feet, face, or genitals **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to topical corticosteroids **AND** at least two to three months of systemic therapy (including but not limited to methotrexate and/or cyclosporine) or phototherapy **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy **AND**
- Medical record documentation that adalimumab is being dosed at a maximum of 40 mg every other week **OR** medical record documentation of peer-reviewed literature citing well-designed clinical trials to indicate that the member's healthcare outcome will be improved by dosing that exceeds Food and Drug Administration (FDA) approved labeling **AND**
- Medical record documentation that adalimumab is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**RE-AUTHORIZATION CRITERIA:** Adalimumab is configured as a prior authorization for new starts only. Adalimumab will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**MEDISPAN AUTHORIZATION LEVEL:** Select GHPHUMIRA Quick Code, no MediSpan authorization level required

**QUANTITY LIMIT:** *Two authorizations must be entered.*

- **80 mg on day 1, then 40 mg biweekly**
    1. In NCRX: Add PA, OQL, max quantity 4, max day supply 28, max script 1 for a 3 week authorization duration
    2. In PA Hub: Add OQL, max quantity dispensed 2, with an end date of 12/31/2099. Start date of this authorization is 3 weeks after initial approval date.
        - QL FOR LETTER: Loading dose: 80 mg on day 1; Maintenance dose: 40 mg every other week (2 pens/syringes per 28 days)

**FORMULARY ALTERNATIVES:**

cyclosporine, methotrexate

**Low-potency topical corticosteroids:** alclometasone dipropionate 0.5% cream and ointment (Aclovate); desonide 0.05% cream, ointment and lotion (Desowen); fluocinolone acetonide 0.01% cream, solution, body and scalp oil (Synalar/Derma-Smoothe); hydrocortisone 1% and 2.5% cream, ointment, and lotion (Hytone)

**Medium-potency topical corticosteroids:** betamethasone valerate 0.1% cream and lotion (Valisone); fluocinolone acetonide 0.025% cream and ointment (Synalar); flurandrenolide 0.05% cream, ointment, and lotion (Cordran); fluticasone propionate 0.05% cream and lotion (Cutivate); hydrocortisone butyrate 0.1% cream, ointment and solution (Locoid); hydrocortisone valerate 0.2% cream and ointment (Westcort); mometasone 0.1% cream (Elocon); prednicarbate 0.1% cream and ointment (DermAtop); triamcinolone acetonide 0.025% cream, ointment and lotion (Kenalog); triamcinolone 0.1% cream, ointment and lotion (Kenalog); triamcinolone acetonide 0.147 mg/g aerosol (Kenalog Spray)

**High-potency topical corticosteroids:** amcinonide 0.1% cream, ointment and lotion (Cyclocort); augmented betamethasone dipropionate 0.05% cream (Diprolene AF); betamethasone dipropionate 0.05% cream, ointment and lotion (Diprolene); betamethasone valerate 0.1% ointment (Valisone); betamethasone valerate 0.12% foam (Luxiq); desoximetasone 0.25% cream, ointment and 0.05% cream, gel, ointment (Topicort/Topicort LP); ); diflorasone 0.05% cream (Florone/Psorcon); fluocinonide 0.05% cream, ointment, gel and solution (Lidex); fluticasone 0.005% ointment (Cutivate); mometasone 0.1% ointment (Elocon); triamcinolone 0.5% cream and ointment (Kenalog)

**Very high-potency topical corticosteroids:** augmented betamethasone dipropionate 0.05% ointment, gel and lotion (Diprolene); clobetasol 0.05% cream, ointment, scalp lotion, shampoo, foam (Temovate/Clobex/Olux); diflorasone diacetate 0.05% ointment (ApexiCon/Psorcon E); fluocinonide 0.1% cream (Vanos); halobetasol 0.05% cream and ointment (Ultravate)

**For Ulcerative Colitis**
An exception for coverage of **BIWEEKLY (every other week) administration** of Humira, adalimumab-FKJP, Hadlima, or Yusimry may be made for members who meet all the following criteria:

- Medical record documentation of a diagnosis of moderate to severe ulcerative colitis **AND**
- Medical record documentation that adalimumab is prescribed by a gastroenterologist **AND**
- Medical record documentation of age greater than or equal to 5 years **AND**
- Medical record documentation of therapeutic failure on, intolerance to, at least one conventional therapy: corticosteroids, aminosalicylates, or immunomodulators (azathioprine or 6-mercaptopurine (6-MP)) **AND**
- Medical record documentation that adalimumab is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

An exception for coverage of **WEEKLY administration** of Humira, adalimumab-FKJP, Hadlima, or Yusimry may be made for members who meet all the following criteria:

- Medical record documentation of a diagnosis of moderate to severe ulcerative colitis **AND**
- Medical record documentation that adalimumab is prescribed by a gastroenterologist **AND**
- Medical record documentation of age greater than or equal to 5 years **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to at least one conventional therapy: corticosteroids, aminosalicylates, or immunomodulators (e.g., 6-mercaptopurine or azathioprine) **AND**
- Medical record documentation that adalimumab is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent **AND**
- Medical record documentation of one of the following:
    - For an adult:
        - Medical record documentation of a contraindication to, intolerance to, or therapeutic failure on BIWEEKLY (every other week) administration of adalimumab **AND**
        - Medical record documentation that the member has been compliant with BIWEEKLY administration of adalimumab **AND**
        - Medical record documentation of inadequate drug trough level (less than 7.5mcg/mL) to support weekly dosing, per American Gastroenterological Association (AGA) guidelines

      **OR**

        - Medical record documentation that weekly dosing was initiated prior to the member turning 18 years and the member is well-controlled on this dose
    - For a member less than or equal to 18 years of age:
        - Medical record documentation that the member is less than 18 years of age and receiving an appropriate dose based on body weight

**NOTE:**

- For patients with an adequate drug trough, American Gastroenterological Association (AGA) does not recommend antibody levels to guide therapy. Patients should be switched to another agent.
- For patients with an inadequate drug trough & undetectable antibodies, a dose increase may be warranted.
- For patients with an inadequate drug trough & detectable antibodies, a switch to another agent is recommended. However, patients with low antibody levels may be considered for a dose increase, in hopes of overcoming antibody level and achieving response.

**RE-AUTHORIZATION CRITERIA:** Adalimumab is configured as a prior authorization for new starts only. Adalimumab will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**MEDISPAN AUTHORIZATION LEVEL:** Select GHPHUMIRA Quick Code, no MediSpan authorization level required

**QUANTITY LIMIT:**

- **Adults: 160 mg on day 1, 80 mg 2 weeks later, then 40 mg biweekly –** *Two authorizations must be entered.*
    1. In NCRX: Add PA, OQL, max quantity 6, max day supply 28, max script 1 for a 3 week authorization duration
    2. In PA Hub: Add OQL, max quantity dispensed 2, with an end date of 12/31/2099. Start date of this authorization is 3 weeks after approval date.
        - QL FOR LETTER: Loading dose: 160 mg on day 1, 80 mg 2 weeks later; Maintenance dose: 40 mg every other week (2 pens/syringes per 28 days)

- **Adult Weekly Dosing –** *QL must be entered within the authorization.*
    1. In NCRX: Add PA, max script 1, enter for the remainder of the calendar year
    2. In PA Hub: Add OQL, max quantity dispensed 4, with an end date of 12/31/2099
        - QL FOR LETTER: 4 per 28 days
- **Pediatrics 20 kg to 40 kg: 80 mg on day 1, 40 mg on day 8 and day 15, then 40 mg every other week –** *Two authorizations must be entered.*
    1. In NCRX: Add PA, max script 1, enter for the remainder of the calendar year
    2. In PA hub: Add OQL, max quantity dispensed 4, with an end date of 12/31/2099. Start date of this authorization is 3 weeks after approval date.
        - QL FOR LETTER: Loading dose: 80 mg on day 1, 40 mg on day 8 and day 15; Maintenance dose: 40 mg every other week (2 pens/syringes per 28 days)
- **Pediatrics greater than 40 kg: 160 mg on day 1, 80 mg on day 8 and day 15, then 40 mg every week –** *Two authorizations must be entered.*
    1. In NCRX: Add PA, max script 1, enter for the remainder of the calendar year
    2. In PA hub: Add OQL, max quantity dispensed 4, with an end date of 12/31/2099. Start date of this authorization is 3 weeks after approval date.
        - QL FOR LETTER: Loading dose: 160 mg on day 1, 80 mg on day 8 and day 15; Maintenance dose: 40 mg every week (4 pens/syringes per 28 days)

**FORMULARY ALTERNATIVES:**
azathioprine, 6-mercaptopurine

**For Hidradenitis Suppurativa (HS)**
An exception for coverage of **WEEKLY administration** of Humira, adalimumab-FKJP, Hadlima, or Yusimry may be made for members who meet all the following criteria:

- Medical record documentation that adalimumab is prescribed by a dermatologist **AND**
- Medical record documentation of age greater than or equal to 12 years **AND**
- Medical record documentation of a diagnosis of moderate to severe hidradenitis suppurativa (HS), defined as Stage II or III on the Hurley staging system* **AND**
- Medical record documentation of at least 3 abscesses or inflammatory nodules **AND**
- Medical record documentation of concomitant use of oral or systemic antibiotics **AND**
- Medical record documentation that the member has received counseling on weight management (if overweight) and smoking cessation (if the member is an active smoker) **AND**
- For members 12 to 18 years of age weighing 30 to less than 60 kg: medical record documentation of adalimumab being dosed at a maximum dose of 40 mg every other week **AND**
- Medical record documentation that adalimumab is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

*Hurley staging system:
- Stage I: A single lesion without sinus tract formation.
- Stage II: More than one lesion or area, but with limited tunneling.
- Stage III: Multiple lesions, with more extensive sinus tracts and scarring.

**RE-AUTHORIZATION CRITERIA:** Adalimumab is configured as a prior authorization for new starts only. Adalimumab will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.
- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**MEDISPAN AUTHORIZATION LEVEL:** Select GHPHUMIRA Quick Code, no MediSpan authorization level required

**QUANTITY LIMIT FOR INITIAL APPROVALS:**

- **Adults & Age 12 – 18 years weighing ≥ 60 kg: 160 mg on day 1, 80 mg 2 weeks later, then 40 mg weekly –** *Two authorizations must be entered.*
    1. In NCRX: Add PA, OQL, max quantity 6, max day supply 28, max script 1 for a 3 week authorization duration
    2. In PA Hub: Add OQL, max quantity dispensed 4, with an end date of 12/31/2099. Start date of this authorization is 3 weeks after approval date.
        - QL FOR LETTER: Loading dose: 160 mg on day 1, 80 mg 2 weeks later; Maintenance dose: 40 mg every week (4 pens/syringes per 28 days)
- **Adults & Age 12 – 18 years weighing ≥ 60 kg: 160 mg on day 1, 80 mg 2 weeks later, then 80 mg biweekly –** *Two authorizations must be entered.*
    1. In NCRX: Add PA, max script 1, enter for the remainder of the calendar year
    2. In PA Hub: Add OQL, max quantity dispensed 2, with an end date of 12/31/2099. Start date of this authorization is 3 weeks after approval date.
        - QL FOR LETTER: Loading dose: 160 mg on day 1, 80 mg 2 weeks later; Maintenance dose: 80 mg every other week (2 pens/syringes per 28 days)
- **Age 12 – 18 years weighing 30 to < 60 kg: 80 mg on day 1, then 40 mg biweekly –** *Two authorizations must be entered.*
    1. In NCRX: Add PA, max script 1, enter for the remainder of the calendar year
    2. In PA Hub: Add OQL, max quantity dispensed 2 with an end date of 12/31/2099. Start date of this authorization is 3 weeks after initial approval date.
        - QL FOR LETTER: Loading dose: 80 mg on day 1; Maintenance dose: 40 mg every other week (2 pens/syringes per 28 days)

**FORMULARY ALTERNATIVES:**

none

**For the treatment of Non-Infectious Intermediate, Posterior and Panuveitis**
An exception for coverage of **BIWEEKLY (every other week) administration** of Humira, adalimumab-FKJP, Hadlima, or Yusimry may be made for members who meet all the following criteria:

- Medical record documentation that adalimumab is prescribed by an ophthalmologist or rheumatologist **AND**
- Medical record documentation of age greater than or equal to 2 years **AND**
- Medical record documentation of a diagnosis of non-infectious intermediate, posterior or panuveitis **AND**
- Medical record documentation of:
    - Therapeutic failure on, intolerance to, or contraindication to local/systemic corticosteroids **AND** an immunosuppressant (methotrexate, azathioprine, mycophenolate, cyclosporine, or tacrolimus) **OR**
    - For members 2-18 years of age: therapeutic failure on, intolerance to, or contraindication to local/systemic corticosteroids **AND** methotrexate **AND**
- For members 2-18 years of age: medical record documentation that adalimumab is being given in combination with methotrexate **OR** medical record documentation of contraindication to methotrexate **AND**
- Medical record documentation that member is receiving appropriate dose of adalimumab based on weight and age **AND**
- Medical record documentation that adalimumab is <u>not</u> being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**RE-AUTHORIZATION CRITERIA:** Adalimumab is configured as a prior authorization for new starts only. Adalimumab will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**MEDISPAN AUTHORIZATION LEVEL:** Select GHPHUMIRA Quick Code, no MediSpan authorization level required

**QUANTITY LIMIT FOR INITIAL APPROVALS:** *Two authorizations must be entered.*

- **Adult 80 mg on day 1, then 40 mg biweekly –** *Two authorizations must be entered.*
    1. In NCRX: Add PA, OQL, max quantity 4, max day supply 28, max script 1 for a 3 week authorization duration
    2. In PA Hub: Add OQL, max quantity dispensed 2, with an end date of 12/31/2099. Start date of this authorization is 3 weeks after initial approval date.
        - QL FOR LETTER: Loading dose: 80 mg on day 1; Maintenance dose: 40 mg every other week (2 pens/syringes per 28 days)
- **Pediatric Uveitis –** *Two authorizations must be entered.*
    1. In NCRX: Add PA, max script 1, enter for the remainder of the calendar year
    2. In PA Hub: Add OQL, max quantity dispensed 2with an end date of 12/31/2099.
        - QL FOR LETTER: 2 per 28 days

**FORMULARY ALTERNATIVES:**

Immunosuppressants: methotrexate, azathioprine, mycophenolate, cyclosporine, tacrolimus

Steroids: prednisone, methylprednisolone, dexamethasone, prednisolone, budesonide

If an exception is made, Humira, adalimumab-FKJP, Hadlima, or Yusimry will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Signed: Jamie Miller

|---|---|
| **POLICY AND PROCEDURE**<br>**PHARMACY**<br>MANUAL | **SECTION: Commercial Drug**<br>**SUBJECT: Voriconazole** |

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for voriconazole for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of voriconazole may be made for members who meet **ALL** of the following criteria:

- Medical record documentation of age greater than or equal to 12 years **AND**
- Medical record documentation of a diagnosis of invasive aspergillosis, esophageal candidiasis, or fungal infection caused by *Scedosporium apiospermum* or fungal infection caused by *Fusarium* species with an Infectious Disease consult, preferably with a culture report to back the diagnosis **OR**
- Medical record documentation of a diagnosis of candidemia in a non-neutropenic patient or disseminated candida infections of the skin, abdomen, bladder wall, kidney and wounds with failure on, intolerance to, or contraindication to IV amphotericin B and/or fluconazole as determined by Infectious Disease consult, preferably with a culture to back the diagnosis **AND**
- Medical record documentation of initiation of intravenous therapy with voriconazole in the hospital

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If an exception is made, voriconazole will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

6. ***ADHD*** – attention deficit hyperactivity disorder

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Adhansia XR, Adzenys XR-ODT, methylphenidate XR (generic Aptensio XR), Azstarys, Cotempla XR-ODT, methylphenidate transdermal patch (generic Daytrana), dexmethylphenidate HCl ER, dextroamphetamine solution, Dyanavel XR, Jornay PM, Mydayis, QuilliChew ER, Quillivant XR, methylphenidate HCl ER [OSM] 45 mg, 63 mg (generic Relexxii), Xelstrym, or Zenzedi 2.5 mg, 7.5 mg tablets may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of attention deficit disorder (ADD) or attention deficit hyperactivity disorder (ADHD) **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Metadate CD$^{\Omega}$ **AND** amphetamine/dextroamphetamine SR combination

$^{\Omega}$ = **From the Metadate CD package insert, "Metadate CD may be swallowed whole with the aid of liquids, or alternately, the capsule may be opened and the capsule contents sprinkled onto a small amount (tablespoon) of applesauce and given immediately, and not stored for future use. Drinking some fluids e.g. water, should follow the intake of the sprinkles with applesauce. The capsules and the capsule contents must not be crushed or chewed."**

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, if request is for dextroamphetamine solution, methylphenidate XR (generic Aptensio XR), methylphenidate transdermal patch (generic Daytrana), methylphenidate HCl ER [OSM] 45 mg or 63 mg tablets (generic Relexxii), or dexmethylphenidate HCl ER include generic only.

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - **Adhansia XR:** 1 capsule per day
  - **Adzenys XR-ODT:** 1 tablet per day
  - **Azstarys:** 1 capsule per day
  - **Cotempla XR-ODT 8.6 and 17.3 mg tablets:** 1 tablet per day
  - **Cotempla XR-ODT 25.9 mg tablets:** 2 tablets per day
  - **Dextroamphetamine 5 mg/5 mL solution:** 60 mL per day
  - **Dyanavel XR Tablets:** 1 tablet per day
  - **Jornay PM:** 1 capsule per day
  - **Methylphenidate HCl ER [OSM] 45 and 63 mg tablets:** 1 tablet per day
  - **Mydayis:** 1 tablet per day
  - **Xelstrym:** 1 patch per day
  - **Zenzedi 2.5 and 7.5 mg tablets:** 1 tablet per day

If an exception is made, Adhansia XR, Adzenys XR-ODT, methylphenidate XR (generic Aptensio XR), Azstarys, Cotempla XR-ODT, methylphenidate transdermal patch (generic Daytrana), dexmethylphenidate HCl ER, dextroamphetamine solution, Dyanavel XR, Jornay PM, Mydayis, QuilliChew ER, Quillivant XR, methylphenidate HCl ER [OSM] 45 mg, 63 mg (generic Relexxii), Xelstrym, or Zenzedi 2.5 mg, 7.5 mg tablets will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

dextroamphetamine, dextroamphetamine/amphetamine combination, dextroamphetamine/amphetamine SR combination, methylphenidate, methylphenidate sustained-release, methylphenidate extended-release, Metadate CD, guanfacine ER, atomoxetine

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger Health Plan

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 95.0**

**SECTION: Commercial Drug**
**SUBJECT: Omnaris, Qnasl, and Zetonna**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Omnaris, Qnasl, and Zetonna for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of **Omnaris**, **Qnasl, or Zetonna** may be made for members who meet the following criteria:

- Medical record documentation of failure on, contraindication to, or intolerance to fluticasone propionate, triamcinolone acetonide, **AND** mometasone furoate

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Omnaris, Qnasl, or Zetonna will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

fluticasone propionate, triamcinolone acetonide, mometasone furoate

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY NUMBER: 96.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Lilly Insulin**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for agents to Lilly insulin for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of Lilly Insulin may be made for members who meet the following criteria:

- Medical record documentation that the requested insulin requires dilution **OR**
- Medical record documentation of a therapeutic failure on, contraindication to, or intolerance to comparable Novo Nordisk brand insulin **(with the exception of Fiasp)**

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

If a formulary exception is approved, the requested Lilly Insulin will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Novo Nordisk Insulins (vials and pens): Novolin R, Novolin N, Novolin 70/30, Novolog, NovoLog Mix 70/30, Levemir

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 99.0**

**SECTION: Commercial Drug**
**SUBJECT: Gefitinib**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for gefitinib for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

A formulary exception for coverage of gefitinib may be made for members who meet the following criteria:

- Medical record documentation that gefitinib is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of metastatic non-small cell lung cancer **AND**
- Medical record documentation of one of the following EGFR mutations as detected by an FDA approved test
    - Exon 19 deletion
    - Exon 21 (L858R) substitution

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 tablet per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Gefitinib is configured as a prior authorization for new starts only. Gefitinib will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If a formulary exception is approved gefitinib will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Gilotrif*, erlotinib*

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Somavert for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Somavert may be made for members who meet **ALL** of the following criteria:

- Medical record documentation that Somavert is prescribed by an endocrinologist **AND**
- Medical record documentation of a diagnosis of acromegaly **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of failure, intolerance to or contraindication with somatostatin analogs (octreotide or octreotide LAR)

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Somavert will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

Geisinger

**POLICY NUMBER: 105.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Teriparatide**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for teriparatide for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of teriparatide may be made for members who meet the following criteria:

- No medical record documentation of increased baseline risk of osteosarcoma [Paget's disease, open epiphyses (pediatric or young adult patients), prior radiation therapy involving the skeleton, unexplained elevations of alkaline phosphatase] **AND**
- **For women:**
  - Medical record documentation of a diagnosis of osteoporosis **AND**
  - Medical record documentation of postmenopausal status or glucocorticoid induced osteoporosis **AND**
  - Medical record documentation that member has not previously been on a parathyroid hormone analog for greater than 2 years **AND**
  - Medical record documentation of an attempt of therapy with or contraindication to bisphosphonates **OR**
  - Medical record documentation of a previous osteoporotic fracture or high risk of fracture (T-score –2.5 or below with documented risk factors)

**OR**

- **For men:**
  - Medical record documentation of a diagnosis of osteoporosis **AND**
  - Medical record documentation of an attempt of therapy with or contraindication to bisphosphonate therapy **OR**
  - Medical record documentation of a previous osteoporotic fracture or high risk of fracture (T-score less than -2.5)

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- Forteo QL FOR LETTER ONLY: 2.4 mL per 28 days
- Teriparatide QL FOR LETTER ONLY: 2.48 per 28 days

**AUTHORIZATION DURATION**: Approval will be for 2 years, or less if there is medical record documentation of a previous incomplete course of therapy with a parathyroid hormone analog. Cumulative use of parathyroid hormone analogs for more than 2 years during a patient's lifetime is not recommended.

**NOTE:** Cumulative use of parathyroid hormone analogs for more than 2 years during a patient's lifetime is not recommended.

**Risk Factors Included in the WHO Fracture Risk Assessment Model**

- Current age
- Gender
- A prior osteoporotic fracture (including morphometric vertebral fracture)
- Femoral neck BMD
- Low body mass index (kg/m2)
- Rheumatoid arthritis
- Secondary osteoporosis
- Parental history of hip fracture
- Current smoking
- Alcohol intake (3 or more drinks/d)
- Oral glucocorticoids ≥5 mg/d of prednisone for ≥3 mo (ever)

From: WHO Technical Report.8

If an exception is made, teriparatide will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

alendronate, ibandronate, risedronate, Tymlos*

*prior authorization required

Geisinger

**POLICY NUMBER: 110.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Gelclair**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Gelclair for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Gelclair may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of oral mucositis secondary to chemotherapy or radiation

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Gelclair will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

sucralfate tablets
Maalox + viscous lidocaine + (otc) Benadryl liquid = Magic Mouthwash Compound

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY NUMBER: 112.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Epsolay, Finacea Foam, and Zilxi**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Epsolay, Finacea foam, and Zilxi for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of Epsolay, Finacea foam, or Zilxi may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of rosacea with inflammatory lesions **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three (3) formulary alternatives

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14 for Epsolay, GPI-12 for Finacea foam or Zilxi.

If a formulary exception is approved, Epsolay, Finacea foam, or Zilxi will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

metronidazole (cream/gel/lotion), ivermectin 1% cream, azelaic acid gel

5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of lenalidomide may be made for members who meet the following criteria:

<u>For Myelodysplastic Syndromes (MDS)</u>

- Medical record documentation that lenalidomide is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of the treatment of a patient with myelodysplastic syndromes (MDS) associated with a deletion 5q cytogenetic abnormality with or without additional cytogenetic abnormalities

**OR**

With no deletion 5q cytogenetic abnormality:

- Medical record documentation of initial use in lower risk patient with symptomatic anemia and serum erythropoietin levels greater than 500 mU/mL and a low probability of response to immunosuppressive therapy* **OR**
- Medical record documentation of lower risk patient with symptomatic anemia and no response to initial treatment with epoetin alfa or darbepoetin alfa, hypomethylating agents, or immunosuppressive therapy

*Low probability is defined as members who lack any of the following features: age less than or equal to 60, those with hypocellular marrows, HLA-DR15 or PNH clone positivity

**OR**

For Multiple Myeloma

- Medical record documentation that lenalidomide is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of a diagnosis of multiple myeloma

**OR**

For Non-Hodgkin Lymphomas (NHL)

- Medical record documentation that lenalidomide is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of a diagnosis of NHL (relapsed, refractory, progressive disease, or members who are not candidates for high dose therapy)

**OR**

For Mantle Cell Lymphoma

- Medical record documentation that lenalidomide is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of relapsed, refractory, or progressive mantle cell lymphoma **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to one prior therapy

**OR**

For Follicular Lymphoma

- Medical record documentation that lenalidomide is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of a diagnosis of follicular lymphoma **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to at least one prior therapy **AND**
- Medical record documentation that Revlimid is being used in combination with a rituximab product

**OR**

For Marginal Zone Lymphoma

- Medical record documentation that lenalidomide is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of a diagnosis of marginal zone lymphoma **AND**

- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to at least one prior therapy **AND**
- Medical record documentation that lenalidomide is being used in combination with a rituximab product

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 2.5 mg, 5 mg, & 10 mg capsules: 1 capsule per day, 28 day supply per fill
  - 15 mg, 20 mg, & 25 mg capsules: 21 capsules per 28 days

**RE-AUTHORIZATION CRITERIA:** Lenalidomide is configured as a prior authorization for new starts only. Lenalidomide will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If a formulary exception is approved, lenalidomide will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**POLICY NUMBER: 125.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Sprycel**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Sprycel for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Sprycel may be made for members who meet the following criteria:

- Medical record documentation that Sprycel is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of the use of Sprycel to treat newly diagnosed chronic phase Philadelphia chromosome-positive (Ph+) chronic myeloid leukemia (CML) **OR**
- Medical record documentation of the use of Sprycel to treat chronic, accelerated, or myeloid/lymphoid blast phase Philadelphia chromosome-positive (Ph+) chronic myeloid leukemia (CML) with resistance or intolerance to prior therapy including imatinib **OR**
- Medical record documentation of use of Sprycel to treat Philadelphia chromosome-positive (Ph+) acute lymphoblastic leukemia (ALL) with resistance or intolerance to prior therapy **OR**
- Medical record documentation of use of Sprycel to treat newly diagnosed Philadelphia chromosome positive (Ph+) acute lymphoblastic leukemia (ALL) in pediatric patients 1 year and older in combination with chemotherapy

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 20 mg tablet: 3 tablets per day, 30 day supply per fill
  - 50 mg, 70 mg, 80 mg, 100 mg, and 140 mg tablets: 1 tablet per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Sprycel is configured as a prior authorization for new starts only. Sprycel will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If an exception is made Sprycel will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Chronic, Accelerated, or Myeloid/Lymphoid Blast Phase Ph+ CML: imatinib

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 131.0**

**SECTION: Commercial Drug**
**SUBJECT: Byetta**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Byetta for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Byetta may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of Type 2 diabetes **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Victoza **AND** either Ozempic or Rybelsus

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 5 mcg Pen: 0.04 mL per day
  - 10 mcg Pen: 0.08 mL per day

If an exception is made, Byetta will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

| POLICY AND PROCEDURE<br>**PHARMACY**<br>MANUAL | SECTION: Commercial Drug<br>SUBJECT: Sorafenib |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for sorafenib for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:
    A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
    B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
    C. In accordance with current standards of medical practice;
    D. Not primarily for the convenience of the Member, or the Member's Provider; and

E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of sorafenib may be made for members who meet all the following criteria:

- Medical record documentation of the use of sorafenib for a Food and Drug Administration (FDA) approved indication **AND**
- Medical record documentation that sorafenib is prescribed by an oncologist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 4 tablets per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Sorafenib is configured as a prior authorization for new starts only. Sorafenib will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If an exception is made, sorafenib will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

Geisinger

**POLICY NUMBER: 135.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Ranolazine ER**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for ranolazine ER for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of ranolazine ER may be made for members who meet all the following criteria:

- Medical record documentation of use for the treatment of chronic angina not adequately responding to other antianginal drugs **AND**
- Medical record documentation of use with combination of amlodipine, beta-blockers, or nitrates **AND**
- No medical record documentation of concurrent use of potent/moderately potent CYP3A4 inhibitors (diltiazem, verapamil, azoles, macrolides, etc.) or QT prolonging medications **AND**
- Medical record documentation that ranolazine ER is prescribed by a cardiologist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If an exception is made, ranolazine ER will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Beta-blockers: acebutolol, atenolol, InnoPran XL, metoprolol, nadolol, propranolol, metoprolol XL
Calcium channel blockers: felodipine, nifedipine, nifedipine SR, amlodipine, isradipine, nimodipine
Nitrates: isosorbide dinitrate, isosorbide mononitrate, nitroglycerin

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for miglustat for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of miglustat may be made for members who meet the following criteria:

- Medical record documentation of miglustat being used to treat an adult patient with mild to moderate Type 1 Gaucher disease for whom enzyme replacement therapy is not a therapeutic option (for example, due to constraints such as allergy, hypersensitivity, or poor venous access) **AND**
- Miglustat is recommended by a metabolic specialist with experience in treating Gaucher disease

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 3 capsules per day, 30 day supply per fill

If an exception is made, miglustat will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

None for pharmacy. Cerezyme and Elelyso require prior authorization under the medical benefit.

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for posaconazole suspension/tablets and Noxafil PowderMix packets for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of posaconazole may be made for members who meet the following criteria:

**Prophylaxis of Invasive Aspergillus or Candida Infections**

- Medical record documentation that posaconazole is prescribed by an oncologist, hematologist, infectious disease specialist, or transplant service provider **AND**
- Medical record documentation of use for prophylaxis of invasive Aspergillus or Candida infections in patients at high risk of developing these infections due to being severely immunocompromised **AND**
- Medical record documentation of one of the following:
    - If request is for Noxafil oral suspension: medical record documentation of age greater than or equal to 13 years **OR**
    - If request is for posaconazole delayed release tablets: medical record documentation of age greater than or equal to 2 years and documentation of weight greater than 40 kilograms
    - If request is for Noxafil PowderMix packets: medical record documentation of age greater than or equal to 2 years and less than 13 years **AND** documentation of weight greater than or equal to 10 kilograms to less than 40 kilograms

**Treatment of Invasive Aspergillosis**

- Medical record documentation that posaconazole is prescribed by an oncologist, hematologist, infectious disease specialist, or transplant service provider **AND**
- Medical record documentation of use for treatment of invasive aspergillosis **AND**
- Medical record documentation of age greater than or equal to 13 years

**Treatment of Oropharyngeal Candidiasis**

- Medical record documentation that posaconazole is prescribed by an oncologist, hematologist, infectious disease specialist, or transplant service provider **AND**
- Medical record documentation of age greater than or equal to 13 years **AND**
- Medical record documentation of treatment of oropharyngeal candidiasis with therapeutic failure on, contraindication to, or intolerance to fluconazole or itraconazole*

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14, if request is for tablets or suspension add generic only

**QUANTITY LIMIT:**

- **100 mg tablets –**
    - Initial approval: Two authorizations must be entered.
        1. In PA Hub: Add ST, PA, and PE. Start date of this authorization is one-day after loading dose ends.
        2. In Darwin: Add ST, PA, PE, OQL, enter 1 in max number of claims authorized, and max quantity dispensed 93 per 28 days with a duration of one-week.
    - Renewal: *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*
    - INITIAL QL FOR LETTER: Loading dose: 93 tablets per 30 days; Maintenance dose: 90 tablets per 30 days
    - RENEWAL QL FOR LETTER: 90 tablets per 30 days
- **200 mg/5 mL suspension –** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*
    - QL FOR LETTER: 20 mL per day
- **PowderMix Packets –**
    - Initial approval: Two authorizations must be entered.
        1. In PA Hub: Add PA. Start date of this authorization is one-day after loading dose ends.
        2. In Darwin: Add PA, OQL, enter 1 in max number of claims authorized, and max quantity dispensed 31 per 30 days with a duration of one-week.
    - Renewal: *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*
    - INITIAL QL FOR LETTER: Loading dose: 31 packets per 30 days; Maintenance dose: 30 packets per 30 days
    - RENEWAL QL FOR LETTER: 30 packets per 30 days

**AUTHORIZATION DURATION:**

- **For prophylaxis of invasive aspergillus and candida infections:** Initial approval will be for 3 months or less if the reviewing provider feels it is medically appropriate. Subsequent approvals will be for an additional 6 months or less if the reviewing provider feels it is medically appropriate. The medication will no longer be covered if the member recovers from neutropenia and/or immunosuppression.
- **For treatment of invasive aspergillus and candida infections:** 3 months or less if the reviewing provider feels it is medically appropriate
- **For oropharyngeal candidiasis:** One-time, 28 days authorization

If an exception is made, posaconazole will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

fluconazole, itraconazole*, voriconazole*

* prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Epogen, Procrit, Aranesp, and Retacrit for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Epogen, Procrit, Aranesp, or Retacrit may be made for members for the following indications when reversible or correctable conditions including but not limited to, vitamin B12 deficiency, hemolysis, iron or folate deficiency and blood loss have been ruled out and when all of the indication specific criteria are met:

Medical record documentation of:

1. Treatment of symptomatic anemia of chronic renal insufficiency, chronic renal failure, including end stage renal disease either requiring or not requiring dialysis when all of the following criteria are met:
    - Hemoglobin less than or equal to 10 g/dL for new starts or less than 11 g/dL for continuation of therapy **OR** medical record documentation that the dose will be reduced or interrupted if hemoglobin exceeds 11g/d **AND**
    - Ferritin greater than or equal to 100 ng/mL or transferrin saturation level greater than or equal to 20% or history of chelation therapy for iron

2. Treatment of symptomatic anemia in zidovudine-treated HIV infected insured individuals when all of the following criteria are met:
    - Endogenous erythropoietin levels of 500 MU/mL or less **AND**
    - Ferritin greater than or equal to 100 ng/mL or transferrin saturation level greater than or equal to 20% or history of chelation therapy for iron **AND**
    - Zidovudine doses of 4200 mg or less per week **AND**
    - Hemoglobin less than 12 g/dL for continuation therapy or less than 10 g/dL for new starts

    Treatment should not last longer than 3 months following the discontinuation of zidovudine.

3. Treatment of anemia secondary to myelosuppressive chemotherapy in non-myeloid malignancies when all of the following criteria are met:
    - Hemoglobin less than or equal to 12 g/dL for continuation therapy or less than 10 g/dL for new starts **AND**
    - Insured individual is currently on anemia-inducing chemotherapy and there is a minimum of two additional months of planned chemotherapy **AND**
    - Ferritin greater than or equal to 100 ng/mL or transferrin saturation level greater than or equal to 20% or history of chelation therapy for iron

    Non-myeloid malignancies include all types of carcinoma, sarcoma, melanoma, multiple myeloma, lymphoma, and lymphocytic leukemia.

4. Treatment of symptomatic anemia secondary to myelodysplastic syndrome (MDS) when all of the following criteria are met:
    - Hemoglobin less than or equal to 12 g/dL for continuation therapy or less than 10 g/dL for new starts **AND**
    - Ferritin greater than or equal to 100ng/dL or transferrin level saturation greater than or equal to 20% or a history of chelation therapy for iron **AND**
    - Baseline endogenous erythropoietin levels of 500 MU/mL or less (NCCN Clinical Practice Guidelines in Oncology – Myelodysplastic Syndromes v2.2010)

5. Treatment of symptomatic anemia of chronic disease (rheumatoid arthritis, inflammatory bowel disease, systemic lupus erythematosus, and hepatitis C undergoing treatment) when all of the following criteria are met:
    - Hemoglobin less than 12 g/dL for continuation therapy or less than 10 g/dL for new starts **AND**
    - Ferritin greater than or equal to 100ng/dL or transferrin level saturation greater than or equal to 20% or a history of chelation therapy for iron **AND**
    - Insured individual has a severe comorbidity (e.g. severe angina, pulmonary disease, heart failure, cerebrovascular disease causing transient ischemic attacks, lymphoma, myeloma, etc.) **AND**
    - Insured individual's anemia is manifested by impairments such as, but not limited to, exercise intolerance, tachycardia or shortness of breath with minimal activity, or inability to perform activities of daily living

6. Reduction of allogeneic blood transfusion in anemic insured individuals undergoing surgery when all of the following criteria are met:
    - Hemoglobin less than 13 g/dL **AND**
    - Ferritin greater than or equal to 100ng/dL or transferrin level saturation greater than or equal to 20% or a history of chelation therapy for iron **AND**
    - Anemia is related to chronic disease state (limited to rheumatoid arthritis, inflammatory bowel disease, systemic lupus erythematosus, and hepatitis C undergoing treatment) **AND**
    - Insured individual is scheduled to undergo elective, non-cardiac, non-vascular surgery in which anticipated blood loss is greater than 2 units and the need for allogeneic blood transfusion is anticipated.

    Authorization will be for a duration of 1 month. Request for use beyond 4 weeks will require medical record documentation indicating medical necessity.

    **Note:** Erythropoietin therapy (epoetin alfa) is not indicated for anemic patients who are able and willing to donate autologous blood.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

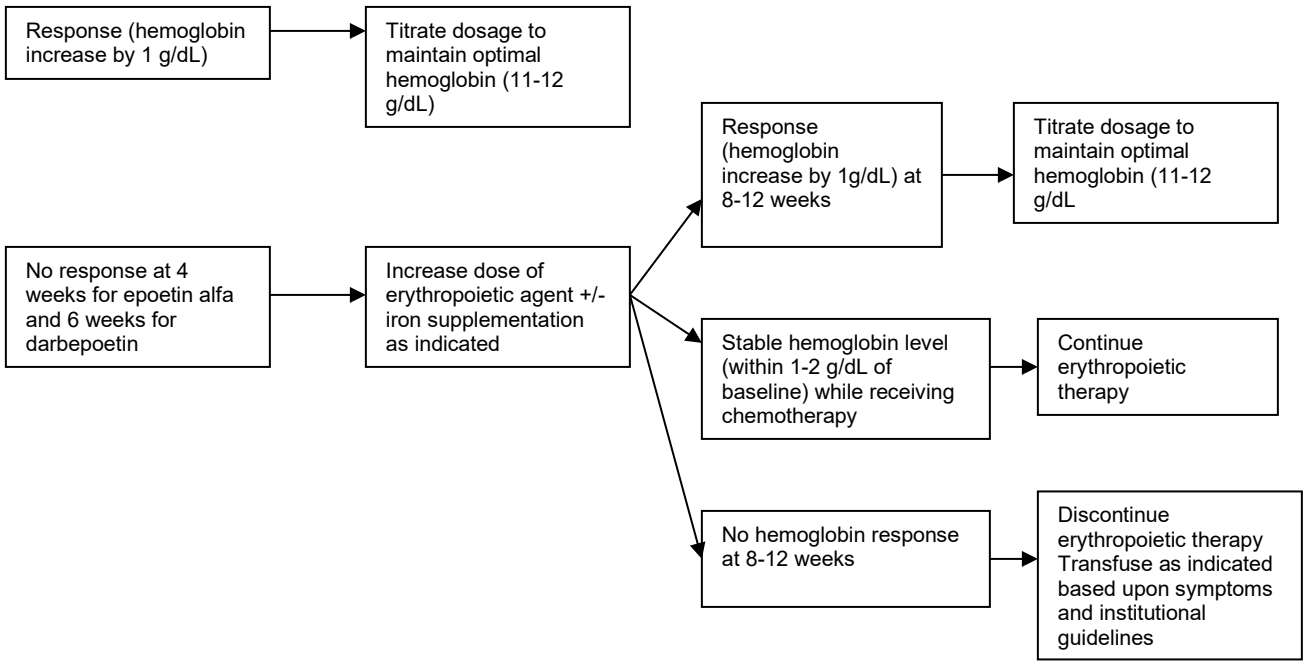
**AUTHORIZATION DURATION:**
Except for the indication for use in anemic surgical patients, approval for Epogen, Procrit, Aranesp, or Retacrit therapy will be given for an initial duration of 12 months. Subsequent authorization will be considered based on the stated criteria.

**GENERAL GUIDANCE:**

- For continuation of therapy, a repeat Hgb should be submitted after 12 months of therapy.
- In individuals whose Hgb is greater than or equal to 12g/dL or rises by 1g/dL in any two-week period, additional doses should be withheld. (In insured individuals with Hgb of greater than or equal to 12 g/dL Erythropoietin or Darbepoetin therapy will not be covered according to FDA recommendations, except when being used for reduction of allogeneic blood transfusion in anemic insured individuals undergoing surgery).
- For initiation or continuation of therapy, a ferritin level no greater than 3 months old and/ or transferrin saturation level no greater than 6 months old should be submitted.
- The member should receive supplemental iron if serum ferritin is less than 100ng/ml and transferrin saturation is less than 20 percent.

**LIMITATIONS:**
**For treatment of anemia in MDS and non-myeloid cancer (on chemotherapy)**:

**Initial Response Assessment**
**Subsequent response Assessment**



**Adapted from NCCN, Clinical Practice Guidelines in Oncology, v3, 2007**

An initial response assessment distinguishes individuals with a response (Hgb increase by 1 g/dL) from those with no response to erythropoietic therapy. In individuals with a response, erythropoietin should be continued to maintain an optimal hemoglobin (12 g/dL). Assessment of individuals with no response to therapy should be performed at 4 weeks for epoetin alfa and 6 weeks for darbepoetin. If no response is detected, a dose increase of the erythropoietic agent is recommended with or without iron supplementation as indicated. If the hemoglobin level increases by 1 g/dL at 8-12 weeks of erythropoietic therapy then a dosage titration should be performed to maintain an optimal hemoglobin level at 12 g/dL. Erythropoietic therapy should be discontinued and transfusion initiated as indicated if there is no hemoglobin response at 8-12 weeks of therapy.

**EXCLUSIONS:**
Erythropoietin and Darbepoetin therapy is not covered for the following conditions because current clinical data indicates that erythropoietin stimulating agents have been shown to impart either a deleterious effect on the underlying disease, or that the underlying disease increases the risk of adverse effects related to use of erythropoietin stimulating agents. These conditions include but are not limited to:

- Anemia of cancer not related to cancer treatment;
- Anemia related to myelosuppressive chemotherapy when the cancer treatment goal is cure (e.g. early stage breast cancer, Hodgkin lymphoma, non-Hodgkin's lymphoma, testicular cancer, Early stage non-small cell lung cancer, small cell lung cancer)
- Anemia associated only with radiotherapy;
- Anemia due to cancer treatment in insured individuals with uncontrolled hypertension;
- Anemia associated with the treatment of acute and/or chronic myelogenous leukemias (CML or AML), or erythroid cancers;
- Anemia in cancer or in cancer treatment due to folate deficiency, iron deficiency, vitamin B-12 deficiency, bleeding, hemolysis, or bone marrow fibrosis;
- Prophylactic use of erythropoietin stimulating agents to prevent chemotherapy-induced anemia;
- Prophylactic use of erythropoietin stimulating agents to reduce tumor hypoxia;
- Erythropoietin-type resistance due to neutralizing antibodies

If an exception is made, Epogen, Procrit, Aranesp, or Retacrit will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**
none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY NUMBER: 148.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Paliperidone Extended Release**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for paliperidone extended release for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of paliperidone extended release may be made for members who meet the following criteria:

- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to risperidone, olanzapine, quetiapine, **AND** aripiprazole

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If an exception is made, paliperidone extended release will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

risperidone, olanzapine, quetiapine fumarate, aripiprazole

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Zolinza for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Zolinza may be made for members who meet the following criteria:

- Medical record documentation of use of Zolinza to treat cutaneous manifestations in patients with cutaneous T-cell lymphoma **AND**
- Medical record documentation of resistance or intolerance to two prior therapies **AND**
- Medical record documentation that Zolinza is prescribed by a hematologist or oncologist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**RE-AUTHORIZATION CRITERIA:** Zolinza is configured as a prior authorization for new starts only. Zolinza will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

.

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- 4 capsules per day, 30 day supply per fill

If an exception is made, Zolinza will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**
none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

6. ***ACE Inhibitor*** – angiotensin converting enzyme inhibitor
7. ***ARB*** – angiotensin receptor blocker

**PROCEDURE:**

An exception for coverage of aliskiren may be made for members who meet the following criteria:

- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to three classes of formulary blood pressure medications, one of which must be an angiotensin converting enzyme (ACE) inhibitor and one of which must be an angiotensin receptor blocker (ARB)

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If an exception is made, aliskiren will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

**ACE inhibitors:** benazepril, captopril, enalapril, fosinopril, lisinopril, moexipril, quinapril, trandolapril, ramipril
**ACE inhibitors/Diuretics**: captopril/hctz, benazepril/hctz, enalapril/hctz, lisinopril/hctz, moexipril/hctz
**Alpha-Beta Blockers:** labetalol, carvedilol
**Antiadrenergic (Peripheral Acting):** prazosin, doxazosin, terazosin
**Antiadrenergic (Central Acting):** clonidine, methyldopa, guanfacine
**ARBs:** losartan, irbesartan, valsartan

**ARBs/Diuretics**: losartan/hctz, irbesartan/hctz, valsartan/hctz
**Beta Blockers:** acebutolol, pindolol, nadolol, atenolol, propranolol, metoprolol
**Beta Blockers/Diuretics**: bisoprolol/hctz
**Calcium Channel Blockers:** verapamil, nifedipine, diltiazem, felodipine, amlodipine, isradipine, nimodipine
**Calcium Channel Blockers/Ace Inhibitor**: amlodipine/benazepril
**Diuretics:** furosemide, hydrochlorothiazide, spironolactone, chlorthalidone, spironolactone/ hctz, triamterene/ hctz, bumetanide, metolazone, torsemide

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**SECTION: Commercial Drug**
**SUBJECT: Altabax**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Altabax for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Altabax may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of impetigo **AND**
- Medical record documentation that member's age is greater than 9 months **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to mupirocin ointment **AND** oral antibiotic therapy

**AUTHORIZATION DURATION:** 5 days, RX count 1

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Altabax will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

mupirocin ointment, gentamicin cream and ointment, cephalexin, dicloxacillin, erythromycin, clarithromycin, clindamycin, sulfamethoxazole/trimethoprim, doxycycline

|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for amlodipine/valsartan and amlodipine/valsartan/hctz for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of amlodipine/valsartan or amlodipine/valsartan/hctz may be made for members who meet the following criteria:

- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three preferred formulary angiotensin receptor blockers, one of which must be valsartan, used in combination with amlodipine

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If an exception is made, amlodipine/valsartan or amlodipine/valsartan/hctz will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

**ARB component:** candesartan (generic Atacand), losartan (generic Cozaar), irbesartan (generic Avapro), olmesartan (generic Benicar), telmisartan (generic Micardis), valsartan (generic Diovan)
**ARBs/Diuretic component:** losartan/hctz (generic Hyzaar), valsartan/hctz (generic Diovan HCT), irbesartan/hctz (generic Avapro HCT) candesartan/hctz (generic Atacand HCT), olmesartan/hctz (generic Benicar HCT), telmisartan/hctz (generic Micardis HCT), valsartan (generic Diovan)
**Calcium Channel Blocker component:** amlodipine (generic Norvasc)

| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Neupogen, Neulasta, Fulphila, Udenyca, Ziextenzo, Leukine, Zarxio, Granix, Nivestym, Releuko, Nyvepria, Fylnetra, Stimufend, and Rolvedon for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.

5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:
    A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
    B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
    C. In accordance with current standards of medical practice;
    D. Not primarily for the convenience of the Member, or the Member's Provider; and
    E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Neupogen, Neulasta, Fulphila, Udenyca, Ziextenzo, Leukine, Zarxio, Granix, Nivestym, Releuko, Nyvepria, Fylnetra, Stimufend, and Rolvedon may be made for members who meet the following criteria:

**NEUPOGEN, NEULASTA, FULPHILA, LEUKINE, UDENYCA, ZIEXTENZO, ZARXIO, GRANIX, NIVESTYM, RELEUKO, NYVEPRIA, FYLNETRA, STIMUFEND, AND ROLVEDON**

- **Medical record documentation of a diagnosis of cancer, and when any of the following FDA labeled indications or uses supported by clinical guidelines are present:**

**Primary Prophylaxis** – For the prevention of febrile neutropenia (FN) when the risk of FN due to the myelosuppressive chemotherapy regimen is 20% or greater. Those regimens include but are not limited to:

- TC (paclitaxel/cisplatin, or cyclophosphamide/docetaxel or docetaxel/cisplatin or paclitaxel/carboplatin)
- MVAC (methotrexate, vinblastine, doxorubicin, cisplatin)
- AC (doxorubicin, cyclophosphamide, docetaxel)
- AT (doxorubicin, paclitaxel)
- TIC (paclitaxel, ifosfamide, mesna, cisplatin)
- VAPEC-B (vincristine, doxorubicin, prednisolone, etoposide, cyclophosphamide, bleomycin)
- DHAP (dexamethasone, cisplatin, cytarabine)

**AND**

- For requests for Neulasta/Neulasta Onpro, medical record documentation of a therapeutic failure on, intolerance to, or contraindication to Ziextenzo, Udenyca, Nyvepria Fylnetra, Stimufend, **AND** Fulphila

**NOTE:** Regimens not specified in this document must be listed on a nationally recognized guideline stating risk of FN of greater than 20%.

**OR**

For the prevention of FN when the risk of developing FN is less than 20%, but **any** other risk factor listed below is present:

- Age 65 years or greater
- Poor performance status
- Previous history of FN
- Extensive prior radiation or chemotherapy treatment
- Poor nutritional status
- Recent surgery or open wounds or active infection
- Advanced cancer
- Persistent neutropenia
- Bone marrow involvement by tumor
- Liver dysfunction (bilirubin greater than 2.0)
- Renal dysfunction (CrCl less than 50)

**AND**

- For requests for Neulasta/Neulasta Onpro, medical record documentation of a therapeutic failure on, intolerance to, or contraindication to Ziextenzo, Udenyca, Nyvepria, Fylnetra, Stimufend, **AND** Fulphila

---

**NEUPOGEN, NEULASTA, FULPHILA, LEUKINE, UDENYCA, ZIEXTENZO, ZARXIO, NIVESTYM, RELEUKO, NYVEPRIA, FYLNETRA, STIMUFEND, AND ROLVEDON**

- **Medical record documentation of any of the following FDA labeled indications or uses supported by clinical guidelines:**

**Secondary Prophylaxis** – prevention of FN when a previous cycle of chemotherapy resulted in a neutropenic complication and for which primary prophylaxis was not received, and a dose reduction will compromise disease-free or overall survival or treatment outcome

**AND**

- For requests for Neulasta/Neulasta Onpro, medical record documentation of a therapeutic failure on, intolerance to, or contraindication to Ziextenzo, Udenyca, Nyvepria, Fylnetra, Stimufend, **AND** Fulphila

**Treatment of Febrile Neutropenia** – as an adjunct to antibiotics in high-risk individuals with FN who are at high risk for infection related complications or when **any** of the following prognostic factors are documented:

- Age 65 years or greater
- Anticipated prolonged and profound neutropenia
- Uncontrolled primary disease
- Pneumonia
- Invasive fungal infection
- Hypotension
- Multi-organ dysfunction
- Hospitalized at the time of development of the fever

**AND**

- For requests for Neulasta/Neulasta Onpro, medical record documentation of a therapeutic failure on, intolerance to, or contraindication to Ziextenzo, Udenyca, Nyvepria, Fylnetra, Stimufend, **AND** Fulphila

**Dose Dense Therapy** – specifically in the treatment of node positive breast cancer, small cell lung cancer, and diffuse aggressive non-Hodgkin's lymphoma

**AND**

- For requests for Neulasta/Neulasta Onpro, medical record documentation of a therapeutic failure on, intolerance to, or contraindication to Ziextenzo, Udenyca, Nyvepria, Fylnetra, Stimufend, **AND** Fulphila

**Stem Cell Transplantation** – when one of the following is met:

- Bone marrow transplant (BMT) –
  - Documentation of a non-myeloid malignancy undergoing myeloablative chemotherapy followed by autologous or allogenic bone marrow transplant (G-CSF is given after BMT)

**OR**

- Peripheral Blood Progenitor Cell (Mobilization)Transplant (PBPC)
  - Used for mobilization of autologous hematopoietic progenitor cells into the peripheral blood for collection by leukapheresis. (G-CSF is given prior to and throughout leukapheresis)

**AND**

- For requests for Neulasta/Neulasta Onpro, medical record documentation of a therapeutic failure on, intolerance to, or contraindication to Ziextenzo, Udenyca, Nyvepria, Fylnetra, Stimufend, **AND** Fulphila

**NOTE: Neulasta, Udenyca, Ziextenzo, Nyvepria, Fylnetra, Stimufend, and Fulphila are considered off-label for PBPC mobilization. Rolvedon is not indicated for PBPC mobilization.**

**Leukemia or Myelodysplastic Syndromes** – insured individuals with:

- Acute myeloid leukemia (AML) receiving induction or consolidation chemotherapy
- Acute lymphoblastic leukemia (ALL) after completion of the first few days of chemotherapy of the initial induction or the first post-remission course
- Myelodysplastic syndrome with less than 15% blasts in the bone marrow, or recurrent neutropenic infections are experienced

**AND**

- For requests for Neulasta/Neulasta Onpro, medical record documentation of a therapeutic failure on, intolerance to, or contraindication to Ziextenzo, Udenyca, Nyvepria, Fylnetra, Stimufend, **AND** Fulphila

**Lymphoma** – Age 65 years or greater treated with curative chemotherapy, e.g., CHOP (cyclophosphamide, doxorubicin, vincristine, prednisone)

**AND**

- For requests for Neulasta/Neulasta Onpro, medical record documentation of a therapeutic failure on, intolerance to, or contraindication to Ziextenzo, Udenyca, Nyvepria, Fylnetra, Stimufend, **AND** Fulphila

**Radiation therapy** –

- If prolonged delays secondary to neutropenia are anticipated
- As treatment for radiation injury secondary to doses of 3-10 Grays (Gy) or greater

**AND**

- For requests for Neulasta/Neulasta Onpro, medical record documentation of a therapeutic failure on, intolerance to, or contraindication to Ziextenzo, Udenyca, Nyvepria **AND** Fulphila

**NOTE: Fulphila, Ziextenzo, Nyvepria, Fylnetra, Stimufend, and Udenyca are considered off-label for radiation injury syndrome; however, the biosimilars are considered medically accepted for this use by the NCCN guidelines.**

**Rolvedon is not indicated for radiation injury syndrome.**

**ROLVEDON**

- Medical record documentation of age greater than or equal to 18 years

**NEUPOGEN, ZARXIO, NIVESTYM, and RELEUKO**

- **Medical record documentation of any of the following FDA labeled indications or uses supported by clinical guidelines:**

**Severe Chronic Neutropenia** – when the following criteria are met:

- Diagnosis of congenital, cyclic, or idiopathic neutropenia **AND**
- Documentation of an absolute neutrophil count (ANC) <500 cells/mm3 on three separate occasions during a 6 month period (for congenital or idiopathic neutropenia) **OR** five consecutive days of ANC <500 cells/mm3 per cycle (for cyclic neutropenia) **AND**
- Documentation that the member experienced a clinically significant infection, fever, or oropharyngeal ulcer during the past 12 months
- prolonged delays secondary to neutropenia are anticipated

**LEUKINE**

- **Medical record documentation of any of the following FDA labeled indications or uses supported by clinical guidelines:**

**Delayed Neutrophil Recovery or Graft Failure**

- Medical record documentation that the member has had an allogeneic or autologous bone marrow transplant and neutrophil recovery* has not occurred

*Note to reviewer: Neutrophil engraftment is defined as the first day of three consecutive days where the neutrophil count (ANC) is 500 cells/$mm^3$ or greater.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**AUTHORIZATION DURATION:** 6 months

**NEULASTA/FULPHILA/ZIEXTENZO/UDENYCA/NYVEPRIA/FYLNETRA/STIMUFEND/ ROLVEDON QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 syringe per 14 days (0.043 mL per day)

If an exception is made, Neupogen, Neulasta, Fulphila, Leukine, Udenyca, Ziextenzo, Zarxio, Granix, Nivestym, Releuko, Fylnetra, Stimufend, Rolvedon, or Nyvepria will be paid for under the member's prescription drug benefit.

**EXCLUSIONS:**
There is insufficient evidence in the published, peer reviewed medical literature to clearly establish that the use of colony stimulating factors (CSF) improves the health outcomes in any of the following indications. The use of CSF's for the following indications is considered not medically necessary and are **NOT COVERED:**

- Routine use as prophylaxis on most chemotherapy regimens; or
- Use as prophylaxis during chemotherapy regimens with a febrile neutropenia risk of less than 20% and no high risk for complications; or
- Use in insured members who are neutropenic but afebrile and not meeting any of the above criteria; or
- Use as an adjunct to antibiotics in uncomplicated febrile neutropenia; or use in relapsed or refractory myeloid leukemia; or
- Use in chemo-sensitization of myeloid leukemias; or
- Use prior to or concurrent with chemotherapy for acute myeloid leukemia; or
- Use prior to or concurrently with chemotherapy for "priming" effect; or
- Use to allow an increase in the dose-intensity of cytotoxic chemotherapy beyond the established dose ranges for these regimens; or
- Use during concomitant chemotherapy and radiation therapy; or
- Continued use if no response is seen within 45 days.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**
none

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 163.0**

**SECTION: Commercial Drug**
**SUBJECT: Neupro**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Neupro for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Neupro may be made for members who meet the following criteria:

- Medical record documentation therapeutic failure on, intolerance to, or contraindication to pramipexole **AND** ropinirole

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Neupro will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

pramipexole, ropinirole, ropinirole ER

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**POLICY NUMBER: 165.0**

**SECTION: Commercial Drug**
**SUBJECT: Sodium Oxybate (generic Xyrem)**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for sodium oxybate (generic Xyrem) for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of sodium oxybate (generic Xyrem) may be made for members who meet the following criteria:

- Medical record documentation of use for a Food and Drug Administration (FDA) approved indication **AND**
- Medical record documentation of therapeutic failure on modafinil **AND** methylphenidate immediate release or amphetamine/dextroamphetamine immediate release

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 18 mL per day, 30 day supply per fill

**AUTHORIZATION DURATION:**

Initial approval will be for 12 months or less if the reviewing provider feels it is medically appropriate. For continued coverage, the following is required:

- Medical record documentation of reduction in frequency of cataplexy attacks **OR**
- Medical record documentation of reduction in symptoms of excessive daytime sleepiness

After the initial 12 month approval, subsequent approvals will be for a duration of 12 months. Reevaluation will be every 12 months requiring the following:

- Medical record documentation of continued or sustained reduction in frequency of cataplexy attacks **OR**
- Medical record documentation of continued or sustained reduction in symptoms of excessive daytime sleepiness

If an exception is made, sodium oxybate (generic Xyrem) will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

armodafinil*, modafinil*, dextroamphetamine, dextroamphetamine/amphetamine immediate release, methylphenidate immediate release

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for sildenafil (generic Revatio) and Liqrev for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of sildenafil (generic Revatio) or Liqrev may be made for members who meet the following criteria:

- Medical record documentation that sildenafil is prescribed by a cardiologist or pulmonologist **AND**
- Medical record documentation of a diagnosis of functional class 2, 3, or 4 pulmonary arterial hypertension **AND**
- See no medical record documentation of organic nitrate therapy **AND**
- If request is for sildenafil 10 mg/mL (generic Revatio): Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Liqrev

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, if request is for generic Revatio include generic only

If an exception is made, sildenafil (generic Revatio) or Liqrev will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Ambrisentan**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for ambrisentan for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of ambrisentan may be made for members who meet the following criteria:

- Medical record documentation that ambrisentan is prescribed by a pulmonologist or cardiologist **AND**
- Medical record documentation of a diagnosis of functional class 2 or 3 pulmonary arterial hypertension **AND**
- Medical record documentation of one of the following:
  - Therapeutic failure on, intolerance to, or contraindication to sildenafil (generic Revatio) **OR**
  - Use as first line therapy in combination with tadalafil (generic Adcirca) in patients with WHO Group 1, function class II or III symptoms

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 tablet per day, 30 day supply per fill

If an exception is made, ambrisentan will be paid for under the member's prescription drug benefit

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 169.0**

**SECTION: Commercial Drug**
**SUBJECT: Ventavis**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Ventavis for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Ventavis may be made for members who meet the following criteria:

- Medical record documentation that Ventavis is prescribed by a pulmonologist or cardiologist **AND**
- Medical record documentation of a diagnosis of functional class 3 or 4 pulmonary arterial hypertension **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to sildenafil* **AND** bosentan*

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Ventavis will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

sildenafil*, Liqrev*, bosentan* oral tablet, Tracleer Soluble oral tablet*

*prior authorization required

**SECTION: Commercial Drug**
**SUBJECT: Sapropterin**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for sapropterin for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of sapropterin may be made for members who meet the following criteria:

- Medical record documentation that sapropterin is prescribed by a metabolic specialist **AND**
- Medical record documentation of a diagnosis of hyperphenylalaninemia (baseline blood Phe level greater than or equal to 360 µmol/L) **AND**
- Medical record documentation of baseline Phe level **AND**
- Medical record documentation that the member is on and compliant with a Phe-restricted diet

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, generic only

**AUTHORIZATION DURATION:** Approval for new starts will be given for an initial authorization duration of eight (8) weeks. For continuation of coverage, the following criteria is required:

- Medical record documentation of a response to sapropterin defined by a reduction in blood Phe levels from baseline **OR**
- Medical record documentation of an increase in Phe tolerance (addition of Phe in diet with stable Phe level)

After the initial 8 week approval, subsequent approvals will be for a duration of one (1) year. Reevaluation of coverage will be every one (1) year requiring the following:

- Medical record documentation of a sustained reduction in blood Phe levels **OR**
- Medical record documentation of improvement in neuropsychiatric symptoms or an increase in Phe tolerance

If an exception is made, sapropterin will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**
none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Somatuline Depot for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Somatuline Depot may be made for members who meet the following criteria:

- Medical record documentation of treatment of an acromegalic patient who has had an inadequate response to or cannot be treated with surgery and/or radiotherapy

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Somatuline Depot will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Tasigna may be made for members who meet the following criteria:

- Medical record documentation that Tasigna is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of the use of Tasigna to treat newly diagnosed (not previously treated) chronic phase Philadelphia chromosome-positive chronic myelogenous leukemia (Ph+ CML) in adult or pediatric patients greater than or equal to 1 year of age **OR**
- Medical record documentation of the use of Tasigna to treat chronic or accelerated phase Ph+ CML in adult patients with resistance to prior therapy including Gleevec (imatinib) **OR**
- Medical record documentation of the use of Tasigna to treat chronic or accelerated phase Philadelphia chromosome-positive chronic myelogenous leukemia (Ph+ CML) in pediatric patients greater than or equal to 1 year of age with resistance or intolerance to prior tyrosine-kinase inhibitor therapy

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 50 mg capsule: 4 capsules per day, 30 day supply per fill
  - 150 mg and 200 mg capsule: 4 capsules per day, 28 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Tasigna is configured as a prior authorization for new starts only. Tasigna will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If an exception is made, Tasigna will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Gleevec (imatinib), Sprycel*

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Lapatinib**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for lapatinib for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of lapatinib may be made for members who meet the following criteria:

- Medical record documentation that lapatinib is prescribed by an oncologist **AND**
- Medical record documentation of use in combination with letrozole for the treatment of postmenopausal women with hormone receptor-positive (HER2+) metastatic breast cancer **OR**
- Medical record documentation of use in combination with capecitabine for advanced or metastatic breast cancer whose tumors overexpress human epidermal growth factor receptor type 2 (HER2) and have received prior therapy including an anthracycline, a taxane, and trastuzumab (Herceptin)

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 6 tablets per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Lapatinib is configured as a prior authorization for new starts only. Lapatinib will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If a formulary exception is approved lapatinib will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Xifaxan may be made for members who meet the following criteria:

**Traveler's Diarrhea**

- Medical record documentation of use for treatment of travelers' diarrhea **AND**
- Medical record documentation of age greater than or equal to 12 years **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to azithromycin and one oral fluoroquinolone

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *QLs must be entered within the authorization.*

- Add ST, PA, PE, OQL, and 3 tablets per day, min/max day supply 3
- QL FOR LETTER: 3 tablets per day, 3 day supply per fill

**AUTHORIZATION DURATION:** 3 days, RX count 1

**Hepatic Encephalopathy**

- Medical record documentation of use for the treatment of hepatic encephalopathy **AND**
- Medical record documentation of concomitant therapy with lactulose or medical record documentation of therapeutic failure on, intolerance to, or contraindication to lactulose

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**Irritable Bowel Syndrome with Diarrhea (IBS-D)**

- Medical record documentation of a diagnosis of moderate to severe irritable bowel syndrome with diarrhea (IBS-D) **AND**
- Medical record documentation that the member is at least 18 years of age **AND**
- Medical record documentation that the correct Food and Drug Administration (FDA) approved strength/dosing is being prescribed (550 mg three times daily for 14 days) **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to dicyclomine **AND** loperamide

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *QLs must be entered within the authorization.*

- Add Treat As "Include" Process Modifier, Ignore Misc Handler, and 3 tablets per day, min/max day supply 14
- QL FOR LETTER: 3 tablets per day, 14 day supply per fill

**AUTHORIZATION DURATION:** 14 days, RX count 1

Reauthorization will require the following:

- Medical record documentation that the patient is having a recurrence of symptoms related to irritable bowel syndrome with diarrhea (IBS-D) **AND**
- Medical record documentation that the patient has not received more than two previous courses of Xifaxan treatment for irritable bowel syndrome with diarrhea (IBS-D)

**NOTE:** Patients who experience recurrence of symptoms can be retreated up to two times, for a maximum of three cycles.

**Small Intestinal Bacterial Overgrowth**

- Medical record documentation of a diagnosis of small intestinal bacterial overgrowth **AND**
- Medical record documentation that the bacteria is hydrogen predominant as evidenced by a hydrogen breath test

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *QLs must be entered within the authorization.*

- Add Treat As "Include" Process Modifier, Ignore Misc Handler, and 3 tablets per day, min/max day supply 14
- QL FOR LETTER: 3 tablets per day, 14 day supply per fill

**AUTHORIZATION DURATION:** 14 days, RX count 1

If an exception is made, Xifaxan will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Travelers Diarrhea: ciprofloxacin, azithromycin, levofloxacin
Hepatic encephalopathy: lactulose
irritable bowel syndrome with diarrhea (IBS-D): dicyclomine, loperamide
Small Intestinal Bacterial Overgrowth (SIBO): ciprofloxacin, metronidazole, neomycin, amoxicillin-clavulanate

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for sumatriptan/naproxen for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 296.0 Triptan Quantity Limit Exceptions
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.

5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:
   A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
   B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
   C. In accordance with current standards of medical practice;
   D. Not primarily for the convenience of the Member, or the Member's Provider; and
   E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of sumatriptan/naproxen may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of migraine **AND**
- Member is not using concurrent opioid or barbiturate therapy for migraine treatment **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to (two) formulary triptans (one of which must be sumatriptan) with concurrent use of naproxen **OR** if member is 12 to less than 18 years of age, medical record documentation of a therapeutic failure on, intolerance to, or contraindication to rizatriptan AND almotriptan with concurrent use of naproxen

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 16 doses per 28 days (Dose limit applies across all oral triptan products.)

If an exception is made, sumatriptan/naproxen will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

Geisinger

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 185.0**

**SECTION: Commercial Drug**
**SUBJECT: Promacta**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Promacta for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Promacta may be made for members who meet **ALL** of the following criteria:

**For Chronic Immune Thrombocytopenic Purpura (ITP)**

- Medical record documentation of a diagnosis of chronic immune (idiopathic) thrombocytopenic purpura (ITP) **AND**
- Medical record documentation that Promacta is prescribed by a hematologist **AND**
- Medical record documentation of a therapeutic failure on, or contraindication to ALL of the following: corticosteroids, immunoglobulins, and rituximab* **AND**
- Symptomatic ITP with bleeding symptoms and a platelet count of less than 30,000/µL **OR** a documentation history of significant bleeding and a platelet count of less than 30,000/µL **OR** a platelet count of less than 20,000/µL

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**AUTHORIZATION DURATION:** If an exception is made, Promacta will be authorized for an **initial period of three (3) months** and continued coverage will require medical record documentation of improvement in symptoms and platelet count response above 20,000/µL. Subsequent authorizations will be for a period of **six (6) months** and will then require medical record documentation of dosing to maintain a platelet count between 50,000/µL and 100,000/µL.

**For Chronic Hepatitis C**

- Medical record documentation of a diagnosis of chronic hepatitis C and plan to initiate or continue interferon-based therapy **AND**
- Medical record documentation of a platelet count of less than 50,000/µL **AND**
- Medical record documentation that Promacta is prescribed by a gastroenterologist, hematologist, hepatologist or infectious disease specialist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**AUTHORIZATION DURATION:** If approved, the authorization will be for a time period of 6 months.

**For Severe Aplastic Anemia**

- Medical record documentation that Promacta is prescribed is written by a hematologist **AND**
- Medical record documentation of a platelet count less than or equal to 30,000/µL **AND**
- Medical record documentation of a diagnosis of severe aplastic anemia **AND**
- Medical record documentation of one of the following:
    - Medical record documentation of an inadequate response to at least one prior immunosuppressive therapy (e.g., cyclosporine, mycophenolate mofetil, sirolimus, Atgam® [lymphocyte immune globulin, anti-thymocyte globulin [equine] sterile solution for intravenous use only]) **OR**
    - Medical record documentation that Promacta will be used as first line treatment in combination with standard immunosuppressive therapy (e.g. antithymocyte globulin [equine] and cyclosporine)

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**AUTHORIZATION DURATION:** If an exception is made, Promacta will be authorized for an **initial period of six (6) months** and continued coverage will require medical record documentation of improvement in symptoms and a hematological response. Subsequent authorizations will be for a period of **six (6) months** and will then require medical record documentation of continued hematological response.

**NOTE:** Per UpToDate, hematologic response is defined as independence from transfusion, no need for additional immunosuppressive therapy, and/or improvement or peripheral blood counts to the point that they no longer meet criteria for severe aplastic anemia.

If an exception is made, Promacta will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

Geisinger

**POLICY NUMBER: 187.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Lacosamide**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for lacosamide for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of lacosamide may be made for members who meet the following criteria:

**Partial-Onset Seizures**

- Medical record documentation of a diagnosis of partial-onset seizures **AND**
- Medical record documentation of age greater than or equal to 1 month **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to three (3) formulary alternatives

**Primary Generalized Tonic-Clonic Seizures**

- Medical record documentation of a diagnosis of primary generalized tonic-clonic seizures **AND**
- Medical record documentation of age greater than or equal to 4 years **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to three (3) formulary alternatives

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12 (enter both 726000360003 & 726000360020), generic only

If an exception is made, lacosamide will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

For patients aged ≥ 1 month of age: carbamazepine, levetiracetam IR, phenobarbital, phenytoin, pregabalin

Additional formulary alternatives for patients over certain ages: lamotrigine IR (2+), topiramate IR (2+), topiramate ER (2+)*, gabapentin (3+), oxcarbazepine (4+), divalproex (10+), levetiracetam ER (12+), tiagabine (12+), lamotrigine ER (13+), felbamate (14+), and zonisamide (16+)

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of everolimus (generic Afinitor) may be made for members who meet the following criteria:

**Renal Cell Cancer**

- Medical record documentation that everolimus (generic Afinitor) is prescribed by an oncologist **AND**
- Medical record documentation of a diagnosis of renal cell cancer **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Sutent (sunitinib) or Nexavar (sorafenib) **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to Opdivo **OR** Cabometyx

**Breast Cancer**

- Medical record documentation that everolimus (generic Afinitor) is prescribed by an oncologist **AND**
- Medical record documentation of hormone-receptor positive, HER-2 negative advanced breast cancer **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to previous endocrine therapy treatment **AND**
- Medical record documentation of everolimus (generic Afinitor) being used in combination with an aromatase inhibitor

**Neuroendocrine tumors of pancreatic origin**

- Medical record documentation that everolimus (generic Afinitor) is prescribed by an oncologist **AND**
- Medical record documentation of a diagnosis of progressive neuroendocrine tumors of pancreatic origin (PNET) that is unresectable, locally advanced or metastatic (the safety and effectiveness of Afinitor in the treatment of patients with carcinoid tumors have not been established) **OR**
- Medical record documentation of a diagnosis of progressive, well-differentiated, non-functional neuroendocrine tumors (NET) of gastrointestinal origin (GI) or lung origin that are unresectable, locally advanced, or metastatic

**Subependymal giant cell astrocytoma**

- Medical record documentation that everolimus (generic Afinitor) is prescribed by an oncologist **AND**
- Medical record documentation of a diagnosis of subependymal giant cell astrocytoma (SEGA) associated with tuberous sclerosis (TS) who require therapeutic intervention but are not candidates for curative surgical resection

**Renal angiomyolipoma and tuberous sclerosis complex/sporadic lymphangioleiomyomatosis**

- Medical record documentation that everolimus (generic Afinitor) is prescribed by an oncologist, nephrologist, or urologist **AND**
- Medical record documentation of renal angiomyolipoma and tuberous sclerosis complex (TSC)/sporadic lymphangioleiomyomatosis, not requiring immediate surgery **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of at least one angiomyolipoma of greater than or equal to 3 cm in longest diameter on CT/MRI based on local radiology assessment

**NOTE:** Everolimus (generic Afinitor) will no longer be covered if there is medical record documentation of disease progression. Response is defined as: a greater than or equal to 50% reduction in angiomyolipoma volume, absence of new angiomyolipoma lesion greater than or equal to 1 cm, absence of kidney volume increase greater than or equal to 20%, or no angiomyolipoma related bleeding of greater than or equal to Grade 2.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 tablet per day, 28 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Everolimus (generic Afinitor) is configured as a prior authorization for new starts only. Everolimus (generic Afinitor) will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If a formulary exception is approved, everolimus (generic Afinitor) will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Renal cell cancer – sunitinib*, Nexavar*, Cabometyx*

* prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Aplenzin for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Aplenzin may be made for members who meet the following criteria:

- Medical record documentation of diagnosis of Major Depressive Disorder **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to bupropion

**OR**

- Medical record documentation of a diagnosis of seasonal affective disorder **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to bupropion XL

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Aplenzin will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

Geisinger

**POLICY NUMBER: 192.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Fanapt**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Fanapt for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Fanapt may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of schizophrenia **AND**
- Medical record documentation of a contraindication, intolerance or therapeutic failure to all formulary agents (risperidone, olanzapine, quetiapine, aripiprazole and ziprasidone)

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

If an exception is made, Fanapt will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

risperidone, olanzapine, ziprasidone, quetiapine, aripiprazole

**SUBJECT: Cimzia**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Cimzia for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

**For Rheumatoid Arthritis**

An exception for coverage of Cimzia (which is self-administered) may be made for members who meet the following criteria:

- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation that Cimzia is prescribed by a rheumatologist **AND**
- Medical record documentation of a diagnosis of moderate to severe rheumatoid arthritis (made in accordance with the American College of Rheumatology Criteria for the Classification of Diagnosis of Rheumatoid Arthritis) **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to a minimum 3 month trial of two (2) preferred formulary biologics for the treatment of rheumatoid arthritis **AND**
- Medical record documentation that Cimzia is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- INITIAL QL FOR LETTER ONLY: Loading dose: 3 kits per 28 days; Maintenance dose: 1 kit per 28 days

- MAINTENANCE QL FOR LETTER ONLY: 1 kit per 28 days

**NOTE:** This product is billed per kit. Each kit contains two, 200mg syringes.

**RE-AUTHORIZATION CRITERIA:** Cimzia is configured as a prior authorization for new starts only. Cimzia will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

Enbrel*, Humira*, adalimumab-FKJP*, Hadlima*; Yusimry*, Rinvoq*, Xeljanz/XR*

*prior authorization required

**For Crohn's Disease**
An exception for coverage of Cimzia (which is self-administered) may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of moderate to severe Crohn's disease **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation that Cimzia is prescribed by a gastroenterologist **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to Humira* **AND**
- Medical record documentation that Cimzia is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- INITIAL QL FOR LETTER ONLY: Loading dose: 3 kits per 28 days; Maintenance dose: 1 kit per 28 days
- MAINTENANCE QL FOR LETTER ONLY: 1 kit per 28 days

**NOTE:** This product is billed per kit. Each kit contains two, 200mg syringes.

**RE-AUTHORIZATION CRITERIA:** Cimzia is configured as a prior authorization for new starts only. Cimzia will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**
Humira*, adalimumab-FKJP*, Hadlima*; Yusimry*

*prior authorization required

**For Psoriatic Arthritis**
An exception for coverage of Cimzia (which is self-administered) may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of moderately to severely active psoriatic arthritis which must include of either active psoriatic lesions or a documented history of psoriasis **AND**
- Medical record documentation that Cimzia is prescribed by a rheumatologist or dermatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of intolerance to, contraindication to, or therapeutic failure on a minimum 3 month trial of two (2) preferred formulary biologics for the treatment of psoriatic arthritis **AND**
- Medical record documentation that Cimzia is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- INITIAL QL FOR LETTER ONLY: Loading dose: 3 kits per 28 days; Maintenance dose: 1 kit per 28 days
- MAINTENANCE QL FOR LETTER ONLY: 1 kit per 28 days

**NOTE:** This product is billed per kit. Each kit contains two, 200mg syringes.

**RE-AUTHORIZATION CRITERIA:** Cimzia is configured as a prior authorization for new starts only. Cimzia will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**
Enbrel*, Cosentyx*, Humira*, adalimumab-FKJP*, Hadlima*; Yusimry*, Otezla*, Skyrizi*, Tremfya*, Rinvoq*, Xeljanz/XR*

*prior authorization required

**For Ankylosing Spondylitis**
An exception for coverage of Cimzia (which is self-administered) may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of ankylosing spondylitis **AND**
- Medical record documentation that Cimzia is prescribed by a rheumatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to a minimum 3 month trial of two (2) preferred formulary biologics for the treatment of ankylosing spondylitis **AND**
- Medical record documentation that Cimzia is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- INITIAL QL FOR LETTER ONLY: Loading dose: 3 kits per 28 days; Maintenance dose: 1 kit per 28 days
- MAINTENANCE QL FOR LETTER ONLY: 1 kit per 28 days

**NOTE:** This product is billed per kit. Each kit contains two, 200mg syringes.

**RE-AUTHORIZATION CRITERIA:** Cimzia is configured as a prior authorization for new starts only. Cimzia will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**
Cosentyx*, Humira*, adalimumab-FKJP*, Hadlima*; Yusimry*, Enbrel*, Rinvoq*, Xeljanz/XR*

*prior authorization required

**For Plaque Psoriasis**
An exception for coverage of Cimzia (which is self-administered) may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of moderate to severe plaque psoriasis characterized by greater than or equal to 5% of body surface area involved or disease involving crucial body areas such as the hands, feet, face, or genitals **AND**
- Medical record documentation that Cimzia is prescribed by a dermatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of intolerance to, contraindication to, or therapeutic failure on a minimum 3 month trial of two (2) preferred formulary biologics for the treatment of psoriasis **AND**
- Medical record documentation that Cimzia is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *Two authorizations must be entered.*

1. In PA Hub: Add PA, number of claims authorized = 1, with a duration of one month
2. In Darwin: Add OQL, DS, max quantity dispensed 2, min day supply 28, max day supply 28, with an end date of 12/31/2099. Start date of this authorization is one-day after loading dose ends.
    - QL FOR LETTER: 2 kits per 28 days

**NOTE:** This product is billed per kit. Each kit contains two, 200mg syringes.

**RE-AUTHORIZATION CRITERIA:** Cimzia is configured as a prior authorization for new starts only. Cimzia will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**
Cosentyx*, Humira*, adalimumab-FKJP*, Hadlima*; Yusimry*, Enbrel*, Otezla*, Skyrizi*, Tremfya*

*prior authorization required

**For Non-Radiographic Axial Spondylarthritis**
An exception for coverage of Cimzia (which is self-administered) may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of non-radiographic axial spondylarthritis **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation that Cimzia is prescribed by a rheumatologist **AND**
- Medical record documentation of at least one of the following:
    - C-reactive protein (CRP) level above the upper limit of normal (10 mg/dL) **OR**
    - Sacroiliitis on magnetic resonance imaging (MRI)

**AND**

- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to at least two (2) nonsteroidal anti-inflammatory drugs (NSAIDs) **AND**
- Medical record documentation that Cimzia is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- INITIAL QL FOR LETTER ONLY: Loading dose: 3 kits per 28 days; Maintenance dose: 1 kit per 28 days
- MAINTENANCE QL FOR LETTER ONLY: 1 kit per 28 days

**NOTE:** This product is billed per kit. Each kit contains two, 200mg syringes.

**RE-AUTHORIZATION CRITERIA:** Cimzia is configured as a prior authorization for new starts only. Cimzia will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**
none

If an exception is made, Cimzia will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY NUMBER: 198.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Simponi**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Simponi for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

**For Rheumatoid Arthritis:**

An exception for coverage of Simponi (which is self-administered) may be made for members who meet ALL of the following criteria:

- Medical record documentation that Simponi is prescribed by a rheumatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of moderate to severe rheumatoid arthritis (made in accordance with the American College of Rheumatology Criteria for the Classification of Diagnosis of Rheumatoid Arthritis) **AND**
- Medical record documentation of concomitant methotrexate use **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to a minimum 3 month trial of two (2) preferred formulary biologics for the treatment of rheumatoid arthritis **AND**
- Medical record documentation that Simponi is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12 (must enter 6627004000E5 & 6627004000D5), number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 0.5 mL per 28 days

**RE-AUTHORIZATION CRITERIA:** Simponi is configured as a prior authorization for new starts only. Simponi will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Enbrel*, Rinvoq*, Xeljanz/XR*

*prior authorization required

**For Psoriatic Arthritis:**
An exception for coverage of Simponi (which is self-administered) may be made for members who meet ALL of the following criteria:

- Medical record documentation of age greater than or equal to 18 years
- Medical record documentation that Simponi is prescribed by a rheumatologist or dermatologist **AND**
- Medical record documentation of a diagnosis of moderately to severely active psoriatic arthritis which must include documentation of either active psoriatic lesions or a documented history of psoriasis **AND**
- Medical record documentation of an intolerance to, contraindication to, or therapeutic failure on a minimum 3 month trial of two (2) preferred formulary biologics for the treatment of psoriatic arthritis **AND**
- Medical record documentation that Simponi is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12 (must enter 6627004000E5 & 6627004000D5), number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 0.5 mL per 28 days

**RE-AUTHORIZATION CRITERIA:** Simponi is configured as a prior authorization for new starts only. Simponi will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**
Enbrel*, Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Otezla*, Skyrizi*, Tremfya*, Cosentyx*, Rinvoq*, Xeljanz/XR*

*prior authorization required

**For Ankylosing Spondylitis:**
An exception for coverage of Simponi (which is self-administered) may be made for members who meet ALL of the following criteria:

- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation that Simponi is prescribed by a rheumatologist **AND**
- Medical record documentation of a diagnosis of ankylosing spondylitis **AND**
- Medical record documentation of an intolerance to, contraindication to, or therapeutic failure on a minimum 3 month trial of two (2) preferred formulary biologics for the treatment of ankylosing spondylitis **AND**
- Medical record documentation that Simponi is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12 (must enter 6627004000E5 & 6627004000D5), number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 0.5 mL per 28 days

**RE-AUTHORIZATION CRITERIA:** Simponi is configured as a prior authorization for new starts only. Simponi will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**
Enbrel*, Cosentyx*, Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Rinvoq*, Xeljanz/XR*

*prior authorization required

**For Ulcerative Colitis:**
An exception for coverage of Simponi (which is self-administered) may be made for members who meet ALL of the following criteria:

- Medical record documentation that Simponi is prescribed by a gastroenterologist **AND**
- Medical record documentation of a diagnosis of moderate to severe ulcerative colitis **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Humira* **AND**
- Medical record documentation that Simponi is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12 (must enter 6627004000E5 & 6627004000D5)

**QUANTITY LIMIT –**

1. In PA Hub: Add PA, OQL, DS, max quantity dispensed 3, min day supply 28, max day supply 28, number of claims authorized = 1, with a duration of one month
    - QL FOR LETTER: Loading dose: 3 mL per 28 days; Maintenance dose: 1 mL per 28 days

**RE-AUTHORIZATION CRITERIA:** Simponi is configured as a prior authorization for new starts only. Simponi will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**
Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*

*prior authorization required

If an exception is made, Simponi will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

Geisinger

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 199.0**

**SECTION: Commercial Drug**
**SUBJECT: Armodafinil**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for armodafinil for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of armodafinil may be made for members who meet the following criteria:

- Medical record documentation of:
  - a diagnosis of obstructive sleep apnea/hypopnea syndrome requiring treatment with nasal CPAP **OR**
  - a diagnosis of narcolepsy **OR**
  - a diagnosis of shift-work disorder

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If an exception is made, armodafinil will be paid for under the member's prescription drug benefit

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

modafinil*

Geisinger

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 201.0**

**SECTION: Commercial Drug**
**SUBJECT: Vigabatrin**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for vigabatrin for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of vigabatrin may be made for members who meet the following criteria:

**For Infantile Spasms**

- Medical record documentation that vigabatrin is prescribed by a neurologist **AND**
- Medical record documentation of use for infantile spasms

**For Refractory Complex Partial Seizures**

- Medical record documentation that vigabatrin is prescribed by a neurologist **AND**
- Medical record documentation of a diagnosis of refractory complex partial seizures **AND**
- Medical record documentation that vigabatrin is being used concomitantly with another seizure control medication **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three (3) formulary alternatives

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, generic only

If an exception is made, vigabatrin will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

For patients > 2 years of age: carbamazepine IR, carbamazepine ER, lamotrigine IR, oxcarbazepine IR, phenobarbital, phenytoin, pregabalin, topiramate IR, topiramate ER (generic Qudexy XR)*

Additional formulary alternatives for patients over certain ages: gabapentin (3+), levetiracetam IR (4+), divalproex (10+), levetiracetam ER (12+), tiagabine (12+), lamotrigine ER (13+), felbamate (14+), and zonisamide (16+)

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

| POLICY AND PROCEDURE<br>**PHARMACY**<br>MANUAL | SECTION: Commercial Drug<br>SUBJECT: Asenapine |

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for asenapine for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of asenapine may be made for members who meet **BOTH** of the following criteria:

- Medical record documentation of schizophrenia or bipolar disorder **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three (3) formulary alternatives

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If an exception is made, asenapine will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

risperidone, olanzapine, aripiprazole, ziprasidone, quetiapine fumarate

- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of pazopanib may be made for members who meet **ONE** of the following sets of criteria:

**Advanced Renal Cell Carcinoma with Clear Cell or Predominantly Clear Cell Histology**

- Medical record documentation that pazopanib is prescribed by an oncologist **AND**
- Medical record documentation of a diagnosis of advanced renal cell carcinoma with clear cell or predominantly clear cell histology

**Advanced Renal Cell Carcinoma with Non-Clear Clear Histology**

- Medical record documentation that pazopanib is prescribed by an oncologist **AND**
- Medical record documentation of a diagnosis of advanced renal cell carcinoma with non-clear cell histology **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to, temsirolimus **AND** either sunitinib* **OR** sorafenib*

**Advanced Soft Tissue Sarcoma (STS)**

- Medical record documentation that pazopanib is prescribed by an oncologist **AND**
  - Medical record documentation of a diagnosis of advanced soft tissue sarcoma (STS) **AND**
  - Medical record documentation of therapeutic failure on, intolerance to, or contraindication to one prior chemotherapy treatment

**NOTE:** Will not be approved for gastrointestinal stromal tumors (GIST) or adipocytic sarcoma.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 4 tablets per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Pazopanib is configured as a prior authorization for new starts only. Pazopanib will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If an exception is made, Votrient will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

sunitinib*, sorafenib*

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 208.0**

**SECTION: Commercial Drug**
**SUBJECT: Arcalyst**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Arcalyst for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Arcalyst may be made for members who meet the following criteria:

**Cryopyrin-Associated Periodic Syndrome (CAPS)**

- Medical record documentation of diagnosis of Cryopyrin–Associated Periodic Syndrome (CAPS), including Familial Cold Autoinflammatory Syndrome (FCAS), and Muckle-Wells Syndrome (MWS) supported by documentation of genetic testing to identify the CIAS1/NLRP-3 gene mutation **AND**
- Medical record documentation that Arcalyst is prescribed by an immunologist, rheumatologist, or allergist **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Kineret **AND** Ilaris

**Deficiency of Interleukin-1 Receptor Antagonist (DIRA)**

- Medical record documentation that Arcalyst is prescribed by or in consultation with a cardiologist or rheumatologist **AND**
- Medical record documentation of weight greater than or equal to 10 kg **AND**
- Medical record documentation of a diagnosis of Deficiency of Interleukin-1 Receptor Antagonist (DIRA) supported by documentation of a homozygous or compound heterozygous mutation in IL1RN (Interleukin 1 Receptor Antagonist gene) **AND**
- Medical record documentation that remission of Deficiency of Interleukin-1 Receptor Antagonist (DIRA) was induced by Kineret‡ **AND**
- Medical record documentation Arcalyst (rilonacept) is being used for maintenance of remission of Deficiency of Interleukin-1 Receptor Antagonist (DIRA) **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Kineret

[‡]**NOTE:** Inflammatory remission in clinical trial defined as having the following: normal acute-phase reactants (C-reactive protein (CRP) < 0.5 mg/dl), resolution of fever, skin rash and bone pain, and radiological evidence of no active bone lesions on x-ray.

**Recurrent Pericarditis (RP)**

- Medical record documentation that Arcalyst is prescribed by or in consultation with a cardiologist or rheumatologist **AND**
- Medical record documentation of age greater than or equal to 12 years **AND**
- Medical record documentation of a diagnosis of Recurrent Pericarditis (RP) as evidenced by a recurrence of pericarditis after a symptom free interval of 4 to 6 weeks or longer following a documented episode of acute pericarditis[#] **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to colchicine **AND** a nonsteroidal anti-inflammatory drug (NSAID) or aspirin

[#]**NOTE:** The European Society of Cardiology (ESC) defines acute pericarditis to be an inflammatory pericardial syndrome diagnosed with at least 2 of the following 4 criteria: 1) pericarditic chest pain, 2) pericardial rubs, 3) new widespread ST elevations or PR depression on ECG or 4) pericardial effusion (new or worsening).

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**AUTHORIZATION DURATION:** Initial approval will be for 3 months or less if the reviewing provider feels it is medically appropriate. Subsequent approvals will be for an additional 12 months or less if the reviewing provider feels it is medically appropriate and will require medical record documentation of continued disease improvement or lack of disease progression. The medication will no longer be covered if the member experiences unacceptable toxicity or worsening of disease.

**QUANTITY LIMIT**

- **Initial Approval** – Two authorizations must be entered.
    1. In PA Hub: Add PA only for the approved authorization duration.
    2. In Darwin: Add Ignore Misc Handler, DS, 1 in max number of claims authorized, max quantity dispensed 4, min day supply 21, max day supply 21, with a duration of one-week.
        - QL FOR LETTER: Loading dose: 4 mL per 21 days; Maintenance dose: 4 mL per 28 days
- **Renewal –** No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.
    - QL FOR LETTER: 4 mL per 28 days

If an exception is made, Arcalyst will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

CAPS: Kineret*, Ilaris*
DIRA: Kineret*
RP: colchicine, celecoxib, choline magnesium salicylate, diclofenac, diclofenac extended release, diflunisal, etodolac, etodolac extended release, fenoprofen, flurbiprofen, ibuprofen, indomethacin, indomethacin sustained release, ketoprofen, ketorolac, meclofenamate, meloxicam, nabumetone, naproxen, naproxen sodium, naproxen EC, oxaprozin, piroxicam, salsalate, sulindac, tolmetin, aspirin

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**SECTION: Commercial Drug**
**SUBJECT: Tadalafil**
**(generic Adcirca)**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for tadalafil (generic Adcirca) for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of tadalafil (generic Adcirca) may be made for members who meet the following criteria:

- Medical record documentation that tadalafil is prescribed by a cardiologist or pulmonologist **AND**
- Medical record documentation of a diagnosis pulmonary arterial hypertension (PAH) **AND**
- Medical record documentation that tadalafil will not be used concomitantly with organic nitrate therapy

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 2 tablets per day, 30 day supply per fill

If an exception is made, tadalafil (generic Adcirca) will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**POLICY NUMBER: 218.0**

**SECTION: Commercial Drug**
**SUBJECT: Dabigaratan Capsules & Pradaxa Packets**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for dabigatran capsules and Pradaxa Packets for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of dabigatran capsules and Pradaxa Packets may be made for members who meet the following criteria:

- Medical record documentation of treatment to reduce the risk of stroke and systemic embolism in patients with nonvalvular atrial fibrillation **OR**
- Medical record documentation of use for the treatment of deep vein thrombosis, pulmonary embolism, or for the reduction in the risk of recurrence of deep vein thrombosis and/or pulmonary embolism **OR**
- Medical record documentation of use for the prophylaxis of DVT and PE in patients who have undergone hip replacement surgery **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Eliquis **OR** Xarelto

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, if request is for dabigatran capsules add generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 2 capsules per day

If an exception is made, dabigatran capsules and Pradaxa Packets will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**SECTION: Commercial Drug**
**SUBJECT: Acyclovir Cream and Penciclovir Cream**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for acyclovir cream and penciclovir cream for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of acyclovir cream or penciclovir cream, may be made for members who meet the following criteria:

**For the treatment of Cold Sores:**

- An exception for the coverage of **acyclovir cream** may be made for members who meet the following criteria:
  - Medical record documentation of a diagnosis of Cold Sores (Herpes Simplex 1 or Herpes Labialis) in patients 12 years of age and older **AND**
  - Medical record documentation of therapeutic failure on, intolerance to, or contraindication to:
    - Abreva (OTC), valacyclovir, **AND** famciclovir (famciclovir only if age greater than or equal to 18 years)

- An exception for the coverage of **penciclovir cream** may be made for members who meet the following criteria:
  - Medical record documentation of a diagnosis of cold sores (Herpes Simplex 1 or Herpes Labialis) in patients 12 years of age and older **AND**
  - Medical record documentation of therapeutic failure on, intolerance to, or contraindication to:
    - Abreva (OTC), acyclovir cream (prior authorization required), valacyclovir, **AND** famciclovir (famciclovir only if age greater than or equal to 18 years)

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 copay per package

If an exception is made, topical acyclovir or penciclovir cream will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Cold Sores: valacyclovir, famciclovir

**POLICY NUMBER: 228.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Vilazodone**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for vilazodone for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of vilazodone may be made for members who meet the following criteria:

- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of major depressive disorder **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to, at least three antidepressant classes

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 tablet per day

If an exception is made, vilazodone will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Caprelsa for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Caprelsa may be made for members who meet the following criteria:

- Medical record documentation that Caprelsa is prescribed by an oncologist **AND**
- Medical record documentation of a diagnosis of medullary thyroid carcinoma in patients with unresectable, advanced, or metastatic disease

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 100 mg tablet: 2 tablets per day, 30 day supply per fill
  - 300 mg tablet: 1 tablet per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Caprelsa is configured as a prior authorization for new starts only. Caprelsa will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If an exception is made, Caprelsa will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Cometriq*

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of bupropion XL (generic Forfivo XL) may be made for members who meet the following criteria:

- Medical record documentation of diagnosis of Major Depressive Disorder **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to bupropion xl

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14, generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 tablet per day

If a formulary exception is approved bupropion XL (generic Forfivo XL) will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Pitavastatin**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for pitavastatin for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 469.0 Statin Quantity Limit Exceptions
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.

5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:
    A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
    B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
    C. In accordance with current standards of medical practice;
    D. Not primarily for the convenience of the Member, or the Member's Provider; and
    E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of pitavastatin may be made for members who meet the following criteria:

- Medical record documentation of member age greater than or equal to 8 years **AND**
- *For members greater than or equal to 10 years of age:* Medical record documentation of intolerance to, contraindication to, or therapeutic failure (including up-to-date laboratory values) to reach goal low-density lipoprotein (LDL) (per NCEP guidelines) after titration to tolerated doses of simvastatin **AND** atorvastatin **AND** rosuvastatin **OR**
- *For members greater than or equal to 8 years of age to less than 10 years of age:* Medical record documentation of intolerance to, contraindication to, or therapeutic failure (including up-to-date laboratory values) to reach goal low-density lipoprotein (LDL) (per NCEP guidelines) after titration to tolerated doses of rosuvastatin

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If a formulary exception is approved pitavastatin will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Greater than or equal to 8 years of age to 10 years of age: rosuvastatin, pravastatin
Greater than or equal to 10 years of age: atorvastatin, lovastatin, pravastatin, simvastatin, rosuvastatin

Geisinger

**POLICY NUMBER: 244.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Deferiprone Tablets, Ferriprox Twice-A-Day Tablets, and Ferriprox Oral Solution**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for deferiprone tablets, Ferriprox Twice-A-Day tablets, and Ferriprox oral solution for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of deferiprone tablets, Ferriprox Twice-A-Day tablets, or Ferriprox oral solution may be made for members who meet the following criteria:

- Medical record documentation that deferiprone is prescribed by a hematologist **AND**
- Medical record documentation of being used for the treatment of transfusional iron overload due to one of the following:
  - Thalassemia syndromes **OR**
  - Sickle cell disease and other anemias*

**AND**

- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to deferasirox (generic Exjade) **AND**
- Medical record documentation of absolute neutrophil count (ANC) greater than 1.5 x $10^9$/L

***NOTE:** Safety and effectiveness of deferiprone have not been established for the treatment of transfusional iron overload in patients with myelodysplastic syndrome or in patients with Diamond Blackfan anemia.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, if request is for deferiprone three-times-a-day add generic only

**AUTHORIZATION DURATION:** Initial approval will be for 6 months or less if the reviewing provider feels it is medically appropriate. Subsequent approvals will be for an additional 6 months or less if the reviewing provider feels it is medically appropriate and will require medical record documentation of serum ferritin level > 300 mcg/L.

If a formulary exception is approved, deferiprone tablets, Ferriprox Twice-A-Day tablets, or Ferriprox oral solution will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

deferasirox (generic Exjade)*

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for H.P. Acthar Gel for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of H.P. Acthar Gel may be made for members who meet the following criteria:

**For infantile myoclonic seizures (infantile spasms):**

- Documentation that the member is less than 2 years of age **AND**
- Medical record documentation that H.P. Acthar Gel is prescribed by a neurologist **AND**
- Documentation of diagnosis confirmed by electroencephalogram (EEG)

**For all other Indications:**

- GHP considers H.P. Acthar Gel **not medically necessary** for diagnostic testing of adrenocortical function because it has not been shown to be superior to Cosyntropin for this test.
- GHP considers H.P. Acthar Gel **not medically necessary** for corticosteroid-responsive conditions because it has not been proven to be more effective than corticosteroids for these indications.
- GHP considers H.P. Acthar Gel **experimental and investigational** or unproven for all other indications because its effectiveness for these indications has not been established in peer-reviewed literature citing well-designed clinical trials to indicated that the member's healthcare outcome will be improved by using H.P. Acthar Gel.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**AUTHORIZATION DURATION:** Treatment period is defined as 28 days; a re-review is required at that time.

If a formulary exception is approved, H.P. Acthar Gel will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**
none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Jakafi may be made for members who meet the following criteria:

**For Myelofibrosis**

- Medical record documentation that Jakafi is prescribed by a hematologist/oncologist **AND**
- Medical record documentation of a diagnosis of intermediate or high-risk myelofibrosis, including primary myelofibrosis, post-polycythemia vera myelofibrosis or post-essential thrombocythemia myelofibrosis **AND**
- Medical record documentation of platelet count greater than or equal to 50 x $10^9$/L **AND**
- Medical record documentation of splenomegaly as measured by computed tomography (CT), magnetic resonance imaging (MRI), or ultrasound **AND**
- Medical record documentation of a baseline Total Symptom Score as measured by the modified Myelofibrosis Symptom Assessment Form (MFSAF) **AND**
- Medical record documentation that Jakafi will not be used concurrently with Inrebic

**NOTE:** Intermediate or High-Risk Myelofibrosis is defined by having at least 2 of the following factors:

✓ Age > 65 years
✓ WBC > 25 x $10^9$/L
✓ Hemoglobin < 10 g/dL

- ✓ Blood Blasts ≥ 1%
- ✓ Presence of Constitutional Symptoms (weight loss, fever, excessive sweats, etc.)
- ✓ Transfusion dependency
- ✓ Platelets less than 100 X $10^9$/L
- ✓ Unfavorable karyotype

**AUTHORIZATION DURATION:** Each treatment period will be defined as six (6) months. Re-review with occur every six (6) months. Jakafi will no longer be covered if medical record documentation does not show:

- ✓ Medical record documentation of platelet count greater than or equal to 50 x $10^9$/L **AND**
- ✓ The member has achieved a reduction from pretreatment baseline of at least 35% in spleen volume as measured by computed tomography (CT), magnetic resonance imaging (MRI), or ultrasound **OR**
- ✓ The member has achieved a 50% or greater reduction in the Total Symptom Score from baseline as measured by the modified Myelofibrosis Symptom Assessment Form (MFSAF)

**For Polycythemia Vera**

- Medical record documentation of a diagnosis of polycythemia vera **AND**
- Medical record documentation that member requires phlebotomy **AND**
- Medical record documentation of splenomegaly **AND**
- Medical record documentation of an inadequate response or intolerance to hydroxyurea **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to interferon therapy **OR** medical record documentation of post – polycythemia vera myelofibrosis with hydroxyurea-refractory symptomatic splenomegaly **OR** severe constitutional symptoms

**AUTHORIZATION DURATION:** Initial approval will be given for 6 months or less is the reviewing provider feels it is medically appropriate. Subsequent approvals will be for an additional 6 months or less if the reviewing provider feels it is medically appropriate and will require medical record documentation of continued disease improvement or lack of disease progression. The medication will no longer be covered if the member experiences unacceptable toxicity or worsening of disease.

**For Graft versus Host Disease**

- Medical record documentation that Jakafi is prescribed by a hematologist/oncologist or transplant specialist **AND**
- Medical record documentation of age greater than or equal to 12 years **AND**
- Medical record documentation of a diagnosis of steroid refractory graft-versus-host disease (GVHD) **OR**
- Medical record documentation of both of the following:
    - Documentation of a diagnosis of chronic graft-versus-host disease (cGVHD) **AND**
    - Documentation of therapeutic failure of one or two prior lines of systemic therapy

**AUTHORIZATION DURATION:** Initial approval will be given for 6 months or less is the reviewing provider feels it is medically appropriate. Subsequent approvals will be for an additional 6 months or less if the reviewing provider feels it is medically appropriate and will require medical record documentation of continued disease improvement or lack of disease progression. The medication will no longer be covered if the member experiences unacceptable toxicity or worsening of disease.

**Note for GVHD:** Tapering of Jakafi may be considered after 6 months of treatment in patients with response who have discontinued therapeutic doses of corticosteroids. Taper will take at least 4 months. If signs/symptoms recur during or after the taper, Jakafi can be restarted.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT (all indications):** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 2 tablets per day, 30 day supply per fill

If a formulary exception is approved, Jakafi will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**SUBJECT: Korlym**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Korlym for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Korlym may be made for members who meet the following criteria:

- Medical record documentation that Korlym is prescribed by an endocrinologist **AND**
- Medical record documentation of a negative pregnancy test within 14 days of initiating Korlym therapy in women of reproductive potential **AND**
- Medical record documentation of a diagnosis of endogenous Cushing's syndrome **AND**
- Medical record documentation of failed surgical treatment for Cushing's syndrome or that the patient is not a candidate for surgery **AND**
- Medical record documentation of therapeutic failure or, contraindication to, or intolerance to conventional therapy for hyperglycemic control

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 4 tablets per day, 28 day supply per fill

If a formulary exception is approved, Korlym will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 253.0**

**SECTION: Commercial Drug**
**SUBJECT: Orencia Subcutaneous (SC)**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Orencia SC for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

**For treatment of adult rheumatoid arthritis:**

An exception for coverage of Orencia SC may be made for members who meet the following criteria:

- Medical record documentation that subcutaneous Orencia is prescribed by a rheumatologist **AND**
- Medical record documentation of a diagnosis of moderate to severe rheumatoid arthritis (made in accordance with the American College of Rheumatology Criteria for the Classification and Diagnosis of Rheumatoid Arthritis) **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to a minimum 3 month trial two (2) preferred formulary biologics for the treatment of rheumatoid arthritis
- Medical record documentation that Orencia is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 4 syringes per 28 days

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Xalkori for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Xalkori may be made for members who meet the following criteria:

**Metastatic ALK-positive NSCLC**

- Medical record documentation that Xalkori is prescribed by an oncologist **AND**
- Medical record documentation of locally advanced or metastatic non-small cell lung cancer (NSCLC) that is anaplastic lymphoma kinase (ALK) positive as detected by an FDA approved test **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Alecensa

**Metastatic ROS1-positive NSCLC**

- Medical record documentation that Xalkori is prescribed by an oncologist **AND**
- Medical record documentation of a diagnosis of metastatic non-small cell lung cancer (NSCLC) that is ROS1-positive

**Anaplastic Large Cell Lymphoma (ALCL)**

- Medical record documentation that Xalkori is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of age greater than or equal to 1 year **AND**
- Medical record documentation of a diagnosis of relapsed or refractory, systemic anaplastic large cell lymphoma (ALCL) that is anaplastic lymphoma kinase (ALK) positive **AND**
- Medical record documentation of at least one prior systemic treatment

**Inflammatory Myofibroblastic Tumor**

- Medical record documentation that Xalkori is prescribed by an oncologist **AND**
- Medical record documentation of age greater than or equal to 1 year **AND**
- Medical record documentation of a diagnosis of unresectable, recurrent, or refractory inflammatory myofibroblastic tumor (IMT) that is anaplastic lymphoma kinase (ALK) positive

**NOTE:** The FDA approved test can be found at https://www.fda.gov/medical-devices/in-vitro-diagnostics/list-cleared-or-approved-companion-diagnostic-devices-in-vitro-and-imaging-tools

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 4 capsules per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Xalkori is configured as a prior authorization for new starts only. Xalkori will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If a formulary exception is approved, Xalkori will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

|---|---|
| POLICY AND PROCEDURE<br>**PHARMACY**<br>MANUAL | **SECTION: Commercial Drug**<br>**SUBJECT: Abiraterone** |

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for abiraterone for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of abiraterone may be made for members who meet the following criteria:

- Medical record documentation that abiraterone is prescribed by an oncologist or urologist **AND**
- Medical record documentation of a diagnosis of prostate cancer with evidence of metastatic disease **AND**
- Medical record documentation that prednisone will be administered concomitantly with abiraterone **AND**
- Medical record documentation of one of the following:
    - That the member is no longer responding to castration or is hormone resistant **OR**
    - That the member has high-risk[†], castration-sensitive disease

[†]**NOTE:** In clinical trials, patients were considered to be high risk if they had two of the following factors at baseline: a total Gleason score of greater than or equal to 8, presence of greater than or equal to 3 lesions on bone scan, and evidence of measurable visceral metastases.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14 (must enter 21406010200320 & 21406010200330), number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 250 mg tablet: 4 tablets per day, 30 day supply per fill
  - 500 mg tablets: 2 tablets per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Abiraterone is configured as a prior authorization for new starts only. Abiraterone will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If a formulary exception is approved, abiraterone will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Castration Resistant Prostate Cancer: Xtandi*, Yonsa

Castration Sensitive Prostate Cancer: Xtandi*

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of albendazole may be made for members who meet the following criteria:

- Medical record documentation of use for a Food and Drug Administration (FDA) approved indication (hydatid disease or neurocysticercosis)

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If an exception is made, albendazole will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**SECTION: Commercial Drug**
**SUBJECT: Ivermectin Lotion (generic Sklice)**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for ivermectin lotion (generic Sklice) for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of ivermectin lotion (generic Sklice) may be made for members who meet the following criteria:

- Medical record documentation of age less than or equal to 2 years **AND** therapeutic failure on, intolerance to, or contraindication to over the counter (OTC) permethrin **OR**
- Medical record documentation of age greater than or equal to 2 years **AND** therapeutic failure on, intolerance to, or contraindication to over the counter (OTC) permethrin **AND** over the counter (OTC) pyrethrins

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If an exception is made, ivermectin lotion (generic Sklice) will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Stivarga for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Stivarga may be made for members who meet the following criteria:

**Colorectal Cancer (CRC)**

- Medical record documentation that Stivarga is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of metastatic colorectal cancer (CRC) **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three prior failures which must include treatment with the following drugs:
    - fluoropyrimidine (examples are capecitabine, floxuridine, or fluorouracil (5-FU)) – based chemotherapy
    - oxaliplatin – based chemotherapy
    - irinotecan – based chemotherapy
    - an anti – VEGF therapy (bevacizumab)
    - *if* KRAS wild type, an anti-EGFR therapy (cetuximab or panitumumab)

**Gastrointestinal Stromal Tumor (GIST)**

- Medical record documentation that Stivarga is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of locally advanced, unresectable, or metastatic gastrointestinal stromal tumor (GIST) **AND**

- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to imatinib mesylate (Gleevec) and sunitinib malate (Sutent*)

**Hepatocellular Carcinoma**

- Medical record documentation that Stivarga is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of hepatocellular carcinoma **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to sorafenib (Nexavar)*

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 84 tablets per 28 days (4 tablets per day for 21 days of 28 day cycle)

**RE-AUTHORIZATION CRITERIA:** Stivarga is configured as a prior authorization for new starts only. Stivarga will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If an exception is made, Stivarga will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Metastatic Colorectal Cancer: capecitabine
Metastatic Gastrointestinal Stromal Tumor: imatinib, sunitinib*
Hepatocellular Carcinoma: sorafenib*

*prior authorization required

C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of lurasidone may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of schizophrenia **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three formulary atypical antipsychotics (olanzapine, risperidone, quetiapine, ziprasidone, aripiprazole) **OR**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to ziprasidone and aripiprazole for members with metabolic syndrome

**OR**

- Medical record documentation of a diagnosis of depressive episodes associated with Bipolar I Disorder (bipolar depression) **AND**
- **For members 18 years of age or older:** Medical record documentation of therapeutic failure on, intolerance to, or contraindication to quetiapine

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If an exception is made, lurasidone will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Schizophrenia: olanzapine, risperidone, quetiapine, ziprasidone, aripiprazole
Bipolar Depression: quetiapine

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 273.0**

**SECTION: Commercial Drug**
**SUBJECT: Xeljanz and Xeljanz XR**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Xeljanz and Xeljanz XR for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

6. ***DMARD*** *– disease modifying anti-rheumatic drug*

**PROCEDURE:**
New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

**For treatment of rheumatoid arthritis**
An exception for coverage of Xeljanz or Xeljanz XR may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of moderate to severe rheumatoid arthritis (made in accordance with the American College of Rheumatology Criteria for the Classification and Diagnosis of Rheumatoid Arthritis) **AND**
- Medical record documentation that Xeljanz or Xeljanz XR is prescribed by a rheumatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to a minimum 3 month trial of adalimumab* **OR** Enbrel* **AND**
- Medical record documentation that Xeljanz or Xeljanz XR is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent **AND**
- Medical record documentation that Xeljanz or Xeljanz XR is being dosed consistent with Food and Drug Administration (FDA)-approved labeling

**NOTE:** Xeljanz 10 mg twice daily and Xeljanz XR 22 mg once daily are only indicated for the treatment of ulcerative colitis induction treatment and in cases of loss of response to maintenance treatment. The maximum recommended dosage for rheumatoid arthritis, ankylosing spondylitis, and psoriatic arthritis are Xeljanz 5 mg twice daily or Xeljanz XR 11 mg once daily.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - Xeljanz 5 mg: 2 tablets per day, 30 day supply per fill
  - Xeljanz XR 11 mg: 1 tablet per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Xeljanz is configured as a prior authorization for new starts only. Xeljanz will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Enbrel*

*prior authorization required

**For treatment of psoriatic arthritis**
An exception for coverage of Xeljanz or Xeljanz XR may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of moderately to severely active psoriatic arthritis which must include documentation of either active psoriatic lesions or a documented history of psoriasis **AND**
- Medical record documentation that Xeljanz or Xeljanz XR is prescribed by a rheumatologist or dermatologist **AND**
- Medical record documentation that Xeljanz or Xeljanz XR is being prescribed in combination with non-biologic disease modifying antirheumatic drug (DMARD) therapy (including but not limited to methotrexate, sulfasalazine, and/or leflunomide) **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of intolerance to, contraindication to, or therapeutic failure on a minimum 3 month trial of adalimumab* **OR** Enbrel* **AND**
- Medical record documentation that Xeljanz or Xeljanz XR is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent **AND**
- Medical record documentation that Xeljanz or Xeljanz XR is being dosed consistent with Food and Drug Administration (FDA)-approved labeling

**NOTE:** Xeljanz 10 mg twice daily and Xeljanz XR 22 mg once daily are only indicated for the treatment of ulcerative colitis induction treatment and in cases of loss of response to maintenance treatment. The maximum recommended dosage for rheumatoid arthritis, ankylosing spondylitis, and psoriatic arthritis are Xeljanz 5 mg twice daily or Xeljanz XR 11 mg once daily.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - Xeljanz 5 mg: 2 tablets per day, 30 day supply per fill
  - Xeljanz XR 11 mg: 1 tablet per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Xeljanz is configured as a prior authorization for new starts only. Xeljanz will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

Enbrel*, Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*

*prior authorization required

**For treatment of ulcerative colitis**
An exception for coverage of Xeljanz may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of moderate to severe ulcerative colitis **AND**
- Medical record documentation that Xeljanz or Xeljanz XR is prescribed by a gastroenterologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of intolerance to, contraindication to, or therapeutic failure on a minimum 3 month trial of adalimumab* **AND**
- Medical record documentation that Xeljanz is not being used concurrently with a tumor necrosis factor (TNF) blocker, potent immunosuppressant (e.g., azathioprine and cyclosporine), or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - Xeljanz 5 mg or 10 mg*: 2 tablets per day, 30 day supply per fill
  - Xeljanz XR 11 mg or 22 mg*: 1 tablet per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Xeljanz is configured as a prior authorization for new starts only. Xeljanz will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

***NOTE:** Xeljanz 10 mg twice daily and Xeljanz XR 22 mg once daily are only indicated for the treatment of ulcerative colitis induction treatment and in cases of loss of response to maintenance treatment. These dosages are not recommended for the treatment of rheumatoid arthritis and psoriatic arthritis.

**FORMULARY ALTERNATIVES:**
Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*

*prior authorization required

**For treatment of polyarticular course juvenile idiopathic arthritis**
An exception for coverage of Xeljanz may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of active polyarticular course juvenile idiopathic arthritis **AND**
- Medical record documentation of age greater than or equal to 2 years **AND**
- Medical record documentation that Xeljanz is prescribed by a rheumatologist **AND**
- Medical record documentation of an inadequate response to a minimum 3 month trial of adalimumab* **OR** Enbrel* **AND**
- Medical record documentation that Xeljanz is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent **AND**
- Medical record documentation that Xeljanz or Xeljanz oral solution is being dosed consistent with Food and Drug Administration (FDA)-approved labeling

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14, number of claims authorized = 1, enter for the remainder of the calendar year

**NOTE:** Xeljanz XR is not indicated for the treatment of pcJIA. The maximum dose for pcJIA is 5 mg (tablet or solution) twice daily. Xeljanz 10 mg twice daily and Xeljanz XR 22 mg once daily are only indicated for the treatment of ulcerative colitis induction treatment and in cases of loss of response to maintenance treatment.

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - Xeljanz 5 mg: 2 tablets per day, 30 day supply per fill
  - Xeljanz oral solution: 10 mL per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Xeljanz is configured as a prior authorization for new starts only. Xeljanz will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**
Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Enbrel*

*prior authorization required

**For treatment of ankylosing spondylitis**
An exception for coverage of Xeljanz may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of ankylosing spondylitis **AND**
- Medical record documentation that Xeljanz or Xeljanz XR is prescribed by a rheumatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of intolerance to, contraindication to, or therapeutic failure on a minimum 3 month trial of adalimumab* **OR** Enbrel* **AND**
- Medical record documentation that Xeljanz or Xeljanz XR is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent **AND**
- Medical record documentation that Xeljanz or Xeljanz XR is being dosed consistent with Food and Drug Administration (FDA)-approved labeling

**NOTE:** Xeljanz 10 mg twice daily and Xeljanz XR 22 mg once daily are only indicated for the treatment of ulcerative colitis induction treatment and in cases of loss of response to maintenance treatment. The maximum recommended dosage for rheumatoid arthritis, ankylosing spondylitis, and psoriatic arthritis are Xeljanz 5 mg twice daily or Xeljanz XR 11 mg once daily.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - Xeljanz 5 mg: 2 tablets per day, 30 day supply per fill
  - Xeljanz XR 11 mg: 1 tablet per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Xeljanz is configured as a prior authorization for new starts only. Xeljanz will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**
Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Enbrel*

*prior authorization required

If an exception is made, Xeljanz or Xeljanz XR will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 274.0**

**SECTION: Commercial Drug**
**SUBJECT: Omeclamox**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Omeclamox for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Omeclamox may be made for members who meet the following criteria:

- Medical record documentation of a confirmed *Helicobacter pylori* infection **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to a formulary proton pump inhibitor (omeprazole, pantoprazole, lansoprazole, rabeprazole) + amoxicillin + clarithromycin

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Omeclamox will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

omeprazole, pantoprazole, lansoprazole, rabeprazole, esomeprazole, amoxicillin, clarithromycin

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 276.0**

**SECTION: Commercial Drug**
**SUBJECT: Absorica**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Absorica for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Absorica may be made for members who meet the following criteria:

- Medical record documentation a diagnosis of severe nodular acne **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to conventional therapy (includes systemic antibiotics and topicals) **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Claravis **AND** Myorisan

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Absorica will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Topical Therapies
adapalene, benzoyl peroxide, topical clindamycin, clindamycin/benzoyl peroxide, topical erythromycin, erythromycin/benzoyl peroxide, isotretinoin, sulfur, topical tretinoin

Oral Therapies
doxycycline, minocycline, erythromycin, trimethoprim/sulfamethoxazole, azithromycin, isotretinoin, Claravis, Zenatane, Amnesteem

**SECTION: Commercial Drug**
**SUBJECT: Cometriq**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Cometriq for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Cometriq may be made for members who meet the following criteria:

- Medical record documentation that Cometriq is prescribed by an oncologist **AND**
- Medical record documentation a diagnosis of progressive metastatic medullary thyroid cancer

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 60 mg daily dose: 3 capsules per day, 28 day supply per fill
  - 100 mg daily dose: 2 capsules per day, 28 day supply per fill
  - 140 mg daily dose: 4 capsules per day, 28 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Cometriq is configured as a prior authorization for new starts only. Cometriq will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If an exception is made, Cometriq will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Caprelsa*

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Pomalyst**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Pomalyst for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Pomalyst may be made for members who meet the following criteria:

**Multiple Myeloma**

- Medical record documentation that Pomalyst is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of multiple myeloma **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to two prior therapies: bortezomib (Velcade*) and lenalidomide (Revlimid*) **AND**
- Medical record documentation that Pomalyst is being prescribed in combination with dexamethasone **OR** medical record documentation that the patient is steroid intolerant

**Kaposi Sarcoma**

- Medical record documentation that Pomalyst is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of Kaposi sarcoma **AND**
- Medical record documentation of one of the following:
    - Medical record documentation of AIDS-related Kaposi sarcoma **AND**

- Medical record documentation of progression of Kaposi sarcoma despite the use of antiretroviral therapy **AND**
- Medical record documentation that antiretroviral therapy will be continued

**OR**

- Medical record documentation that the member is HIV-negative

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 21 tablets per 28 days

**RE-AUTHORIZATION CRITERIA:** Pomalyst is configured as a prior authorization for new starts only. Pomalyst will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If an exception is made, Pomalyst will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Multiple Myeloma: lenalidomide*

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY NUMBER: 283.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Everolimus (generic Zortress)**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for everolimus (generic Zortress) for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of everolimus (generic Zortress) may be made for members who meet the following criteria:

**Kidney Transplant**

- Medical record documentation that everolimus (generic Zortress) is prescribed by a physician experienced in immunosuppressive therapy and management of transplant patients **AND**
- Medical record documentation that member received a kidney transplant **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of one of the following:
    - Everolimus (generic Zortress) is being administered in combination with basiliximab (Simulect) induction and concurrently with reduced doses of cyclosporine and corticosteroids **OR**
    - Medical record documentation that member has had a prior therapeutic failure on, intolerance to, or contraindication to calcineurin inhibitors

**Liver Transplant**

- Medical record documentation that everolimus (generic Zortress) is prescribed by a physician experienced in immunosuppressive therapy and management of transplant patients **AND**
- Medical record documentation that member received a liver transplant **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**

- Medical record documentation that everolimus (generic Zortress) is being administered no earlier than 30 days post-transplant **AND**
- Medical record documentation of one of the following:
    - Everolimus (generic Zortress) is being administered in combination with low-dose tacrolimus and corticosteroids **OR**
    - Medical record documentation that member has had a prior therapeutic failure on, intolerance to, or contraindication to calcineurin inhibitors

**NOTE:**

- Everolimus (generic Zortress) (and other mTOR inhibitors) should not be administered any sooner than 30 days after liver transplant due to risk of hepatic artery thrombosis in the early post-transplantation period.
- The use of corticosteroids beyond the first week post-transplant is controversial and varies between treatment centers. The 2009 KDIGO guidelines recommend for kidney transplant patients at low immunogenic risk and who receive induction therapy, to discontinue prednisone during the first week post-transplant.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If an exception is made, everolimus (generic Zortress) will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Renal Transplant: azathioprine, mycophenolate mofetil, cyclosporine, tacrolimus, sirolimus solution*, sirolimus tablets*

Liver Transplant: cyclosporine, mycophenolate mofetil, tacrolimus

*prior authorization required

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Gattex for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Gattex may be made for members who meet the following criteria:

- Medical record documentation that Gattex is prescribed by a gastroenterologist **AND**
- Medical record documentation of age greater than or equal to 1 year **AND**
- Medical record documentation of a diagnosis of short bowel syndrome **AND**
- If age 1 to 17 years:
  - Medical record documentation that the member is dependent on parenteral nutrition/intravenous support at least 3 times per week
- If age greater than or equal to 18 years:
  - Medical record documentation that the member has been dependent on parenteral nutrition/intravenous support for a minimum of 12 consecutive months continuously **AND**
  - Medical record documentation that the member requires concurrent parenteral nutrition at least three days per week

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: One (1) vial per day, 30 day supply limit per fill

**AUTHORIZATION DURATION:** If approved, approval will be for an initial duration of six (6) months. For continuation of coverage, medical record documentation of a decrease of at least 20% volume of parenteral nutrition/intravenous support from baseline is required.

After the initial six (6) month approval, subsequent approvals for coverage will be for a duration of one (1) year. Reevaluation of coverage will be every one (1) year requiring medical record documentation of sustained improvements in the volume of parenteral nutrition/intravenous support that the member requires while on Gattex therapy.

If an exception is made, Gattex will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY NUMBER: 287.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Mytesi**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Mytesi for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Mytesi may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of human immunodeficiency virus (HIV) or acquired immune deficiency syndrome (AIDS) **AND**
- Medical record documentation of antiretroviral therapy for at least four (4) week duration **AND**
- Medical record documentation of contraindication to, intolerance to, or therapeutic failure on loperamide **AND** diphenoxylate-atropine

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Mytesi will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

loperamide, diphenoxylate-atropine

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Signifor**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Signifor for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Signifor may be made for members who meet the following criteria:

- Medical record documentation that Signifor is prescribed by endocrinology **AND**
- Medical record documentation of a diagnosis of Cushing's disease **AND**
- Medical record documentation that pituitary surgery is not an option or has not been curative **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to ketoconazole **AND** metyrapone*

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 60 ampules per month, for each strength

**AUTHORIZATION DURATION:** If approved, approval will be given for a period of six (6) months. Re-authorization will require medical record documentation that urinary free cortisol levels are within normal limits.

If an exception is made, Signifor will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**SECTION: Commercial Drug**
**SUBJECT: Erlotinib**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for erlotinib for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of erlotinib may be made for members who meet the following criteria:

**Non-Small Cell Lung Cancer**

- Medical record documentation that erlotinib is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of a diagnosis of metastatic non-small cell lung cancer **AND**
- Medical record documentation that erlotinib is being used as first line treatment **OR** maintenance treatment **OR** second line or greater treatment after progression on at least one prior chemotherapy regimen **AND**
- Medical record documentation of one of the following epidermal growth factor receptor (EGFR) mutations as detected by a Food and Drug Administration (FDA) approved test
    - Exon 19 deletion
    - Exon 21 (L858R) substitution

**Pancreatic Cancer**

- Medical record documentation that erlotinib is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of locally advanced, unresectable, or metastatic pancreatic cancer **AND**

- Medical record documentation of erlotinib being prescribed in combination with gemcitabine

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 100 mg and 150 mg tablets: 1 tablet per day, 30 day supply per fill
  - 25 mg tablets: 3 tablets per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Erlotinib is configured as a prior authorization for new starts only. Erlotinib will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If an exception is made, erlotinib will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY NUMBER: 293.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Juxtapid**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Juxtapid for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Juxtapid may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of homozygous familial hypercholesterolemia (HoFH) **AND** either
  - Genetic testing to confirm diagnosis showing a mutation in the low-density lipoprotein (LDL) receptor (LDLr) gene, apolipoprotein B (ApoB) gene, proprotein convertase subtilisin/kexin type 9 (PCSK9) gene, or LDL protein receptor adaptor 1 (LDLRAP1) gene **OR**
  - Diagnosis made based on history of an untreated low-density lipoprotein cholesterol (LDL-C) greater than 500 mg/dL **AND** either xanthoma before 10 years of age **OR** evidence of heterozygous familial hypercholesterolemia (HeFH) in both parents

  **AND**
- Medical record documentation that Juxtapid is prescribed by a hepatologist, lipidologist, or cardiologist registered with the Juxtapid risk evaluation and mitigation strategies (REMS) program **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of failure to adequately control low-density lipoprotein (LDL) levels with combination of maximum tolerated statin dose and ezetimibe defined as:
  - Greater than or equal to 100 mg/dL in patients without cardiovascular disease
  - Greater than or equal to 70 mg/dL in patients with established cardiovascular disease

  **AND**
- Medical record documentation of Juxtapid to be used in adjunct with maximum tolerated statin dose **AND** low density lipoprotein (LDL) apheresis **AND**

- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to one formulary proprotein convertase subtilisin kexin type 9 (PCSK9) inhibitor **AND**
- If the request is for use in combination with Evkeeza: Medical record documentation of failure to adequately control low-density lipoprotein (LDL) levels with a minimum 3-month trial of Evkeeza without the concomitant use of Juxtapid

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 5 mg and 10 mg capsules: 1 capsule per day, 28 day supply per fill
  - 20 mg and 30 mg capsules: 2 capsules per day, 28 day supply per fill

**AUTHORIZATION DURATION:** Initial approval will be granted for a period of six (6) months. A new prior authorization may be submitted at that time for continuation of therapy. Subsequent approval will be for one (1) year and will require medical record documentation that current medical necessity criteria are met and that therapy has been effective.

If an exception is made, Juxtapid will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

atorvastatin, simvastatin, ezetimibe, rosuvastatin, Repatha*, Praluent*

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for zolmitriptan nasal spray for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 296.0 Triptan Quantity Limit Exceptions
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.

5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:
    A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
    B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
    C. In accordance with current standards of medical practice;
    D. Not primarily for the convenience of the Member, or the Member's Provider; and
    E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of zolmitriptan nasal spray may be made for members who meet the following criteria:

- Medical record documentation of a Food and Drug Administration (FDA) approved indication **AND**
- Medical record documentation the member is not using concurrent opioid or barbiturate therapy for migraine treatment **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to sumatriptan nasal spray for patients 18 years of age and older **OR**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to rizatriptan **AND** almotriptan for patients 12 to 18 years or age

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 16 units per 28 days (The quantity limit of 16 units per 28 days applies to each individual nasal or injectable product however applies *across all triptan oral tablet products.) (*1 unit = 1 tablet = 1 injection = 1 nasal spray)

If an exception is made zolmitriptan nasal spray will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

Geisinger

**POLICY NUMBER: 296.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Triptan Quantity Limit Exception**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for triptan quantity limit exceptions for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for the quantity limit of 16 units in 28 days of a triptan product may be made for members who meet the following criteria. (NOTE: Dose limit applies across all ORAL triptan products):

- Medical record documentation that requested medication is prescribed by a neurologist **AND**
- The greater than 16 dose per month prescription is being used for a medically accepted indication, including:
  - Cluster Headaches
  - Headache Bridging
  - Menstrual Migraine

**AND**

- Member is not using concurrent opioid or barbiturate therapy for migraine treatment **AND**
- Medical record documentation of current use of prophylaxis therapy or therapeutic failure, contraindication, or intolerance to **ALL** of the following:
  - Beta blocker (metoprolol, propranolol, atenolol, nadolol or timolol)
  - Topiramate
  - Amitriptyline
  - Divalproex or Sodium Valproate
  - Venlafaxine

If the QL exception is made for headache bridging therapy only a one month prior authorization override will be provided. Future need for a triptan headache bridge will require additional prior authorization.

*1 unit = 1 tablet = 1 injection = 1 nasal spray. The quantity limit of 16 units per 28 days applies across all triptan products.

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Sirturo for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Sirturo may be made for members who meet the following criteria:

- Medical record documentation Sirturo is prescribed by a physician specializing in infectious disease **AND**
- Medical record documentation of one of the following:
  - Age greater than or equal to 18 years **OR**
  - Age greater than or equal to 5 years, weighing at least 15 kilograms **AND**
- Medical record documentation of resistance to isoniazid **AND** rifampin **AND**
- Medical record documentation that an effective treatment regimen cannot be attained with other available treatment options **AND**
- Medical record documentation of one of the following:
  - Sirturo is being prescribed in combination with at least 3 other drugs to which the patient's multi-drug resistant tuberculosis (MDR-TB) isolate has been shown to be susceptible to in vitro **OR**
  - If in vitro testing results are unavailable, Sirturo is being prescribed in combination with at least 4 other drugs to which the patient's MDR-TB isolate is likely to be susceptible

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *QLs must be entered within the authorization.*

- 100 mg tablets: First Fill – 56 tablets, Subsequent Fills – 24 tablets
- 20 mg tablets: First Fill – 280 tablets, Subsequent Fills – 120 tablets

**AUTHORIZATION DURATION:** 24 weeks

If an exception is made, Sirturo will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

amoxicillin-clavulanic acid, clarithromycin, ethambutol, isoniazid, levofloxacin, pyrazinamide, rifampin, moxifloxacin

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Osphena for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Osphena may be made for members who meet the following criteria:

**Severe Vaginal Dryness**

- Medical record documentation of a diagnosis of menopause **AND**
- Medical record documentation that the member is experiencing moderate to severe vaginal dryness, a symptom of vulvar vaginal atrophy, due to menopause **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to an over the counter (OTC) vaginal moisturizer and/or lubricant **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to two (2) formulary topical estradiol/ conjugated estrogen products (e.g., cream, tablet, ring)

**NOTE:** Treatment of moderate to severe dyspareunia, a symptom of vulvar and vaginal atrophy, due to menopause is excluded from coverage, except for certain clients that request this benefit (treatment of female sexual dysfunction).

**Dyspareunia**

- Medical record documentation of a diagnosis of menopause **AND**
- Medical record documentation that the member is experiencing at least one of the following symptoms of vulvar and vaginal atrophy:
  - Moderate to severe dyspareunia
  - Moderate to severe vaginal dryness **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to an over the counter (OTC) vaginal moisturizer and/or lubricant **AND**

- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to two (2) formulary topical estradiol/ conjugated estrogen products (for example, cream, tablet, ring)

**QUANTITY LIMIT:** 1 tablet per day

If an exception is made, Osphena will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**
Premarin Vaginal Cream, Estring, estradiol vaginal cream, Yuvafem

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Tafinlar and Mekinist for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Tafinlar or Mekinist may be made for members who meet the following criteria:

**Unresectable or Metastatic Melanoma**

- Medical record documentation that Tafinlar or Mekinist is prescribed by a hematologist, oncologist, or dermatologist **AND**
- Medical record documentation of unresectable or metastatic melanoma **AND**
- Medical record documentation of BRAF V600E or V600K mutations as detected by a Food and Drug Administration (FDA)-approved test **AND**
- One of the following:
    - Medical record documentation that the requested medication is being used as a single agent **AND**
    - If the request is for Mekinist as a single agent: Medical record documentation of no prior therapeutic failure with a BRAF inhibitor therapy (e.g., Zelboraf, Tafinlar, or Braftovi)
      **OR**
    - Medical record documentation that Mekinist and Tafinlar will be used in combination

**Metastatic Non-Small Cell Lung Cancer**

- Medical record documentation that Tafinlar and Mekinist are prescribed by a hematologist or oncologist **AND**
- Medical record documentation of metastatic non-small cell lung cancer **AND**
- Medical record documentation that Mekinist and Tafinlar will be used in combination **AND**
- Medical record documentation of BRAF V600E mutation as detected by a Food and Drug Administration (FDA)-approved test

**Adjuvant Treatment of Melanoma**

- Medical record documentation that Tafinlar and Mekinist are prescribed by a dermatologist, hematologist, or oncologist **AND**
- Medical record documentation of melanoma with involvement of lymph node(s) **AND**
- Medical record documentation that Mekinist and Tafinlar will be used in combination **AND**
- Medical record documentation of BRAF V600E or V600K mutation as detected by a Food and Drug Administration (FDA)-approved test **AND**
- Medical record documentation that Mekinist and Tafinlar will be used as adjuvant treatment following complete resection

**Anaplastic Thyroid Cancer**

- Medical record documentation that Tafinlar and Mekinist are prescribed by a hematologist or oncologist **AND**
- Medical record documentation of locally advanced or metastatic anaplastic thyroid cancer **AND**
- Medical record documentation that Mekinist and Tafinlar will be used in combination **AND**
- Medical record documentation of BRAF V600E mutation as detected by a Food and Drug Administration (FDA)-approved test

**Unresectable or Metastatic Solid Tumors**

- Medical record documentation that Tafinlar and Mekinist are prescribed by a hematologist or oncologist **AND**
- Medical record documentation of unresectable or metastatic solid tumors **AND**
- Medical record documentation that Mekinist and Tafinlar will be used in combination **AND**
- Medical record documentation of BRAF V600E mutation **AND**
- Medical record documentation of previous treatment resulting in disease progression

**Low-Grade Glioma (LGG)**

- Medical record documentation that Tafinlar and Mekinist are prescribed by a hematologist or oncologist **AND**
- Medical record documentation of age greater than or equal to one year and less than 18 years **AND**
- Medical record documentation of low-grade glioma (LGG) **AND**
- Medical record documentation that Mekinist and Tafinlar will be used in combination **AND**
- Medical record documentation of BRAF V600E mutation **AND**
- Medical record documentation that Mekinist and Tafinlar will be used in combination

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - Tafinlar: 4 capsules per day, 30 day supply per fill
  - Tafinlar Tablets for Oral Suspension: 30 tablets per day, 30 day supply per fill
  - Mekinist 1 mg and 2 mg: 1 tablet per day, 30 day supply per fill
  - Mekinist 0.5 mg: 3 tablets per day, 30 day supply per fill
  - Mekinist for Oral Solution: 40 mL per day, 30 day supply per fill

**NOTE TO CSR:**

- If the request is for metastatic non-small cell lung cancer, adjuvant treatment of melanoma, or anaplastic thyroid carcinoma, enter two (2) authorizations, one (1) for Mekinist and one (1) for Tafinlar with appropriate authorization durations and quantity limits.
- If the request is for unresectable or metastatic melanoma **OR** unresectable or metastatic solid tumors as combination therapy (Mekinist and Tafinlar), enter two (2) authorizations, one (1) for Mekinist and one (1) for Tafinlar with appropriate authorization durations and quantity limits.
- If the request is for unresectable or metastatic melanoma as a single agent, enter an authorization for the requested medication with appropriate authorization duration and quantity limits.

**AUTHORIZATION DURATION (for Adjuvant Treatment of Melanoma):** Approval will be for 12 months or less if the reviewing provider feels it is medically appropriate. The FDA-approved treatment duration is for 12 months only. For requests exceeding the above limit, medical record documentation of the following is required:

- Peer-reviewed literature citing well-designed clinical trials to indicate that the member's healthcare outcome will be improved by dosing beyond the FDA-approved treatment duration

**AUTHORIZATION DURATION (for all other indications):** Each treatment period will be defined as 12 months. Re-review will occur every 12 months. Tafinlar and/or Mekinist will no longer be covered if there is medical record documentation of disease progression.

If an exception is made, Tafinlar and/or Mekinist will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Unresectable or Metastatic Melanoma: Zelboraf*, Braftovi*

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Procysbi may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of nephropathic cystinosis **AND**
- Medical record documentation of age greater than or equal to 1 year **AND**
- Medical record documentation that Procysbi is prescribed by a nephrologist **AND**
- Medical record documentation of one of the following:
    - Medical record documentation of intolerance to Cystagon and one of the following:
        - If intolerance is gastrointestinal-related, medical record documentation of therapeutic failure on 4 months of Cystagon and a proton-pump inhibitor (for example, omeprazole, esomeprazole) **OR**
        - If intolerance is not gastrointestinal-related, justification supported by peer-review literature citing well-designed clinical trials that the member's intolerance will be improved by switching therapy to Procysbi

      **OR**
    - Medical record documentation of therapeutic failure on Cystagon as defined by all of the following:
        - Medical record documentation of failure to achieve white blood cell (WBC) cystine levels less than 1 nmol half-cystine/mg protein on maximally tolerated dose of Cystagon **AND**
        - Claims history or attestation from the provider that the patient is adherent to Cystagon at an every 6 hour dosing interval

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**DAY SUPPLY LIMIT:** 34 day supply per fill

If an exception is made, Procysbi will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**
Cystagon

|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Gilotrif for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Gilotrif may be made for members who meet the following criteria:

- Medical record documentation that Gilotrif is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of first line treatment for metastatic non-small cell lung cancer (NSCLC) with tumors that have non-resistant epidermal growth factor receptor (EGFR) mutations as detected by a Food and Drug Administration (FDA) approved test **OR**
- Medical record documentation of a diagnosis of metastatic, squamous non-small cell lung cancer (NSCLC) which has progressed after platinum-based chemotherapy

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 tablet per day, 30 day supply per fill for each strength

**RE-AUTHORIZATION CRITERIA:** Gilotrif is configured as a prior authorization for new starts only. Gilotrif will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If an exception is made, Gilotrif will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

erlotinib*

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Trintellix may be made for members who meet the following criteria:

- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of Major Depressive Disorder **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to at least three (3) antidepressant classes

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Trintellix will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

MANUAL

**POLICY NUMBER: 310.0**

**SECTION: Commercial Drug**
**SUBJECT: Rivastigmine Patch**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for rivastigmine patch for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of rivastigmine patch may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of mild to moderate dementia of the Alzheimer's type **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to rivastigmine capsules **AND** donepezil tablets **AND** galantamine tablets

**OR**

- Medical record documentation of a diagnosis of severe dementia of the Alzheimer's type **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to donepezil tablets

**OR**

- Medical record documentation of a diagnosis of mild to moderate dementia associated with Parkinson's disease **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to rivastigmine capsules

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If an exception is made, rivastigmine patch will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

**Mild to Moderate Dementia of the Alzheimer's Type:** rivastigmine capsules, donepezil tablets, galantamine tablets
**Severe Dementia of the Alzheimer's Type:** donepezil tablets
**Mild to Moderate Dementia associated with Parkinson's disease:** rivastigmine capsules

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Arazlo, Fabior foam, tazarotene foam, Tazorac cream, or Tazorac gel may be made for members who meet the following criteria:

**Acne Vulgaris (All Except Arazlo)**

- Medical record documentation of a diagnosis of acne, acne vulgaris, or adult-onset acne **AND**
- Medical record documentation of age greater than or equal to 12 years **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three formulary alternatives, two of which must be adapalene and tretinoin

**Acne Vulgaris (Arazlo Only)**

- Medical record documentation of a diagnosis of acne, acne vulgaris, or adult-onset acne **AND**
- Medical record documentation of age greater than or equal to 9 years **AND**
- For members 12 years of age and older: Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three (3) formulary alternatives, two of which must be adapalene and tretinoin

**Psoriasis (Tazorac 0.05% cream, Tazorac 0.05% gel and Tazorac 0.1% gel)**

- Medical record documentation of a diagnosis of plaque psoriasis **AND**
- Medical record documentation of one of the following:
  - Medical record documentation of therapeutic failure on, intolerance to, or contraindication to a topical corticosteroid **OR**
  - Medical record documentation of disease involving crucial body areas such as the hands, feet, or genitals **AND**

- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to one formulary alternative **AND** at least 2 to 3 months of methotrexate or phototherapy

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, if request is for tazarotene foam add generic only

If an exception is made, Arazlo, Fabior foam, tazarotene foam, Tazorac cream, or Tazorac gel will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Acne: adapalene, benzoyl peroxide, topical clindamycin, clindamycin/benzoyl peroxide, oral doxycycline, topical erythromycin, erythromycin/benzoyl peroxide, isotretinoin, oral minocycline, sulfacetamide/sulfur, topical tretinoin*

*prior authorization required for members over the age of 30

Psoriasis:

- Cyclosporine, methotrexate, tacrolimus ointment

**SUBJECT: Tobramycin Inhalation Solution (generic Bethkis)**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined tobramycin inhalation solution (generic Bethkis) for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of tobramycin inhalation solution (generic Bethkis) may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of cystic fibrosis **AND**
- Medical record documentation that tobramycin inhalation solution (generic Bethkis) is prescribed by a pulmonologist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14, generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 224 mL per 56 days

If an exception is made, tobramycin inhalation solution (generic Bethkis) will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

tobramycin inhalation solution*, Tobi inhalation solution*, Tobi PodHaler*

*prior authorization required

MANUAL

**POLICY NUMBER: 315.0**

**SECTION: Commercial Drug**
**SUBJECT: Imbruvica**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Imbruvica for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Imbruvica may be made for members who meet the following criteria:

**Chronic Lymphocytic Leukemia/Small Lymphocytic Lymphoma**

- Medical record documentation that Imbruvica is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of chronic lymphocytic leukemia (CLL) **OR** small lymphocytic lymphoma (SLL)

**Chronic Lymphocytic Leukemia/Small Lymphocytic Lymphoma with 17p deletion**

- Medical record documentation that Imbruvica is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of chronic lymphocytic leukemia (CLL) with 17p deletion **OR** small lymphocytic lymphoma with 17p deletion

**Waldenström's macroglobulinemia**

- Medical record documentation that Imbruvica is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of a diagnosis of Waldenström's macroglobulinemia

**Chronic Graft Versus Host Disease (cGVHD)**

- Medical record documentation that Imbruvica is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of chronic graft versus host disease **AND**
- Medical record documentation of age greater than or equal to 1 year **AND**
- Medical record documentation of therapeutic failure on one or more lines of systemic therapy **AND**
- Medical record documentation that the member is receiving an appropriate dose** based on the age and body surface area (BSA)

****NOTE:** Recommended dosage for cGVHD:
Patients 12 years of age and older: 420mg orally once daily
Pediatric patients 1 to less than 12 years of age to achieve 240 mg/m$^2$ orally once daily:

| BSA(m$^2$) Range | Dose (mg) of Imbruvica Capsules/Tablets to Administer | Dose of Imbruvica Oral Suspension (70 mg/mL) to Administer |
|---|---|---|
| >0.3 to 0.4 | - | 84mg OR 1.2mL |
| >0.4 to 0.5 | - | 105mg OR1.5mL |
| >0.5 to 0.6 | - | 133mg OR 1.9mL |
| >0.6 to 0.7 | - | 154mg OR 2.2mL |
| >0.7 to 0.8 | 210mg | 182mg OR 2.6mL |
| >0.8 to 0.9 | 210mg | 203mg OR 2.9mL |
| >0.9 to 1.0 | 210mg | 231mg OR 3.3mL |
| >1.0 to 1.1 | 280mg | 252mg OR 3.6mL |
| >1.1 to 1.2 | 280mg | 280mg OR 4.0mL |
| >1.2 to 1.3 | 280mg | 301mg OR 4.3mL |
| >1.3 to 1.4 | 350mg | 322mg OR 4.6mL |
| >1.4 to 1.5 | 350mg | 350mg OR 5.0mL |
| >1.5 to 1.6 | 350mg | 371mg OR 5.3mL |
| >1.6 | 420mg | 420mg OR 6.0mL |

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - Tablets/Capsules: 1 tablet or capsule per day, 28 day supply per fill
  - Oral Suspension: 6 mL per day, 36 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Imbruvica is configured as a prior authorization for new starts only. Imbruvica will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If an exception is made, Imbruvica will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Mantle Cell Lymphoma: Brukinsa*, Calquence*, Revlimid*
Chronic Lymphocytic Leukemia/Small Lymphocytic Lymphoma: Calquence*, Venclexta*
Chronic Graft Versus Host Disease: prednisone, cyclosporine, tacrolimus, mycophenolate mofetil, sirolimus, Jakafi*, imatinib

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Valchlor for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Valchlor may be made for members who meet the following criteria:

- Medical record documentation that Valchlor is prescribed by a dermatologist or oncologist **AND**
- Medical record documentation of first a diagnosis of Stage IA or IB mycosis fungoides-type cutaneous T-cell lymphoma **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to one of the following skin-directed therapies: topical corticosteroid, topical retinoid, topical nitrogen mustard, phototherapy

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**AUTHORIZATION DURATION:** Each authorization will be for 12 months. Re-review will occur every 12 months. Valchlor will no longer be covered if there is medical record documentation of disease progression.

If an exception is made, Valchlor will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

**Low-potency topical corticosteroids:** alclometasone dipropionate 0.5% cream and ointment (Aclovate); desonide 0.05% cream, ointment and lotion (Desowen); fluocinolone acetonide 0.01% cream, solution, body and scalp oil (Synalar/Derma-Smoothe); hydrocortisone 1% and 2.5% cream, ointment, and lotion (Hytone)

**Medium-potency topical corticosteroids:** betamethasone valerate 0.1% cream and lotion (Valisone); fluocinolone acetonide 0.025% cream and ointment (Synalar); flurandrenolide 0.05% cream, ointment, and lotion (Cordran); fluticasone propionate 0.05% cream and lotion (Cutivate); hydrocortisone butyrate 0.1% cream, ointment and solution (Locoid); hydrocortisone valerate 0.2% cream and ointment (Westcort); mometasone 0.1% cream (Elocon); prednicarbate 0.1% cream and ointment (DermAtop); triamcinolone acetonide 0.025% cream, ointment and lotion (Kenalog); triamcinolone 0.1% cream, ointment and lotion (Kenalog); triamcinolone acetonide 0.147 mg/g aerosol (Kenalog Spray)

**High-potency topical corticosteroids:** amcinonide 0.1% cream, ointment and lotion (Cyclocort); augmented betamethasone dipropionate 0.05% cream (Diprolene AF); betamethasone dipropionate 0.05% cream, ointment and lotion (Diprolene); betamethasone valerate 0.1% ointment (Valisone); betamethasone valerate 0.12% foam (Luxiq); desoximetasone 0.25% cream, ointment and 0.05% cream, gel, ointment (Topicort/Topicort LP); ); diflorasone 0.05% cream (Florone/Psorcon); fluocinonide 0.05% cream, ointment, gel and solution (Lidex); fluticasone 0.005% ointment (Cutivate); mometasone 0.1% ointment (Elocon); triamcinolone 0.5% cream and ointment (Kenalog)

**Very high-potency topical corticosteroids:** augmented betamethasone dipropionate 0.05% ointment, gel and lotion (Diprolene); clobetasol 0.05% cream, ointment, scalp lotion, shampoo, foam, spray (Temovate/Clobex/Olux) diflorasone diacetate 0.05% ointment (ApexiCon/Psorcon E), fluocinonide 0.1% cream (Vanos), halobetasol 0.05% cream and ointment (Ultravate)

**Topical Retinoids**: Targretin*

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Stelara for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Stelara may be made for members who meet the following criteria:

**Psoriasis**

- Medical record documentation that Stelara is prescribed by a dermatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of moderate to severe plaque psoriasis characterized by greater than or equal to 5% of body surface area involved or disease affecting crucial body areas such as hands, feet, face or genitals **AND**
- Medical record documentation of an intolerance to, contraindication to or therapeutic failure on a minimum 3 month trial of four (4) preferred formulary biologics for the treatment of psoriasis **AND**
- Medical record documentation that the prescribed dosing is appropriate for patient's weight **AND**
- Medical record documentation that Stelara is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**NOTE:**

- Patients weighing over 100 kg should receive 90 mg every 12 weeks
- Patients weighing less than 100 kg should receive 45 mg every 12 weeks

**RE-AUTHORIZATION CRITERIA:** Stelara is configured as a prior authorization for new starts only. Stelara will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 105 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14

**QUANTITY LIMIT –** *Two authorizations must be entered.*

- Stelara 45 mg syringe (less than 100 kg)
    1. In PA Hub: Add Treat as "Include" Process Modifier, Ignore Misc Handler, DS, max quantity dispensed 0.5, min day supply 28, max day supply 28, number of claims authorized 1, with a duration of 3 weeks.
    2. In Darwin: Add DS, min day supply 84, max day supply 84, with an end date of 12/31/2099. Start date of this authorization is 3 weeks after initial approval date.
        - QL FOR LETTER: Loading dose: 0.5 mL per 28 days; Maintenance dose: 0.5 mL per 84 days
- Stelara 90 mg syringe (greater than or equal to 100 kg)
    1. In PA Hub: Add Treat as "Include" Process Modifier, Ignore Misc Handler, DS, max quantity dispensed 1, min day supply 28, max day supply 28, number of claims authorized 1, with a duration of 3 weeks.
    2. In Darwin: Add DS, min day supply 84, max day supply 84, with an end date of 12/31/2099. Start date of this authorization is 3 weeks after initial approval date.
        - QL FOR LETTER: Loading dose: 1 mL per 28 days; Maintenance dose: 1 mL per 84 days

**FORMULARY ALTERNATIVES:**

Cosentyx*, Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Enbrel*, Otezla*, Skyrizi*, Tremfya*, Cimzia*, Ilumya*, Siliq*

*prior authorization required

**Pediatric Plaque Psoriasis**

- Medical record documentation that Stelara is prescribed by a dermatologist **AND**
- Medical record documentation of age greater than or equal to 6 years **AND**
- Medical record documentation of a diagnosis of moderate to severe plaque psoriasis characterized by greater than or equal to 5% of body surface area involved or disease affecting crucial body areas such as hands, feet, face or genitals **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to at least two topical corticosteroids **AND**
- Medical record documentation that the prescribed dosing is appropriate for patient's weight **AND**
- Medical record documentation that Stelara is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**RE-AUTHORIZATION CRITERIA:** Stelara is configured as a prior authorization for new starts only. Stelara will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 105 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**NOTE:**

- Patients weighing over 100 kg should receive 90 mg every 12 weeks
- Patients weighing ≥ 60 kg to < 100 kg should receive 45 mg every 12 weeks
- Patients weighing less than 60 kg should receive 0.75 mg/kg every 12 weeks

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14

**QUANTITY LIMIT –** *Two authorizations must be entered.*

- Stelara 45 mg vial (less than 60 kg)
  1. In PA Hub: Add Treat as "Include" Process Modifier, DS, min day supply 28, max day supply 28, max quantity dispensed 1, and number of claims authorized 1, with a duration of 3 weeks.
  2. In Darwin: Add DS, min day supply 84, max day supply 84, with an end date of 12/31/2099. Start date of this authorization is 3 weeks after initial approval date.
     - QL FOR LETTER: Loading dose: 1 vial per 28 days; Maintenance dose: 1 vial per 84 days
- Stelara 45 mg syringe (less than 100 kg)
  1. In PA Hub: Add Treat as "Include" Process Modifier, Ignore Misc Handler, DS, max quantity dispensed 0.5, min day supply 28, max day supply 28, number of claims authorized 1, with a duration of 3 weeks.

2. In Darwin: Add DS, min day supply 84, max day supply 84, with an end date of 12/31/2099. Start date of this authorization is 3 weeks after initial approval date.
    - QL FOR LETTER: Loading dose: 0.5 mL per 28 days; Maintenance dose: 0.5 mL per 84 days

- Stelara 90 mg syringe (greater than or equal to 100 kg)
    1. In PA Hub: Add Treat as "Include" Process Modifier, Ignore Misc Handler, DS, max quantity dispensed 1, min day supply 28, max day supply 28, number of claims authorized 1, with a duration of 3 weeks.
    2. In Darwin: Add DS, min day supply 84, max day supply 84, with an end date of 12/31/2099. Start date of this authorization is 3 weeks after initial approval date.
        - QL FOR LETTER: Loading dose: 1 mL per 28 days; Maintenance dose: 1 mL per 84 days

**FORMULARY ALTERNATIVES:**

**Low-potency topical corticosteroids:** alclometasone dipropionate 0.5% cream and ointment (Aclovate); desonide 0.05% cream, ointment and lotion (Desowen); fluocinolone acetonide 0.01% cream, solution, body and scalp oil (Synalar/Derma-Smoothe); hydrocortisone 1% and 2.5% cream, ointment, and lotion (Hytone)

**Medium-potency topical corticosteroids:** betamethasone valerate 0.1% cream and lotion (Valisone); fluocinolone acetonide 0.025% cream and ointment (Synalar); flurandrenolide 0.05% cream, ointment, and lotion (Cordran); fluticasone propionate 0.05% cream and lotion (Cutivate); hydrocortisone butyrate 0.1% cream, ointment and solution (Locoid); hydrocortisone valerate 0.2% cream and ointment (Westcort); mometasone 0.1% cream (Elocon); prednicarbate 0.1% cream and ointment (DermAtop); triamcinolone acetonide 0.025% cream, ointment and lotion (Kenalog); triamcinolone 0.1% cream, ointment and lotion (Kenalog); triamcinolone acetonide 0.147 mg/g aerosol (Kenalog Spray)

**High-potency topical corticosteroids:** amcinonide 0.1% cream, ointment and lotion (Cyclocort); augmented betamethasone dipropionate 0.05% cream (Diprolene AF); betamethasone dipropionate 0.05% cream, ointment and lotion (Diprolene); betamethasone valerate 0.1% ointment (Valisone); betamethasone valerate 0.12% foam (Luxiq); desoximetasone 0.25% cream, ointment and 0.05% cream, gel, ointment (Topicort/Topicort LP); ); diflorasone 0.05% cream (Florone/Psorcon); fluocinonide 0.05% cream, ointment, gel and solution (Lidex); fluticasone 0.005% ointment (Cutivate); mometasone 0.1% ointment (Elocon); triamcinolone 0.5% cream and ointment (Kenalog)

**Very high-potency topical corticosteroids:** augmented betamethasone dipropionate 0.05% ointment, gel and lotion (Diprolene); clobetasol 0.05% cream, ointment, scalp lotion, shampoo, foam, spray (Temovate/Clobex/Olux) diflorasone diacetate 0.05%

ointment (ApexiCon/Psorcon E), fluocinonide 0.1% cream (Vanos), halobetasol 0.05% cream and ointment (Ultravate)

**Psoriatic Arthritis**

- Medical record documentation that Stelara is prescribed by a rheumatologist or dermatologist **AND**
- Medical record documentation of age greater than or equal to 6 years **AND**
- Medical record documentation of a diagnosis of moderately to severely active psoriatic arthritis which must include documentation of either active psoriatic lesions or a documented history of psoriasis **AND**
- Medical record documentation of an intolerance to, contraindication to or therapeutic failure on a minimum 3 month trial of three (3) preferred formulary biologics for the treatment of psoriatic arthritis **AND**
- Medical record documentation that the patient is going to receive a dose of 45 mg every 12 weeks **OR** medical record documentation that the patients has a co-existing diagnosis of moderate-to-severe plaque psoriasis and weight greater than 100 kg **OR** member is under the age of 18 years and is receiving the recommended weight based dose **AND**
- Medical record documentation that Stelara is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**RE-AUTHORIZATION CRITERIA:** Stelara is configured as a prior authorization for new starts only. Stelara will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 105 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**NOTES:**

- FDA approved dose for adult psoriatic arthritis is 45 mg every 12 weeks.
- For patients with co-existent moderate-to-severe plaque psoriasis weighing greater than 100 kg, the recommended dose is 90 mg every 12 weeks.
- Pediatric dosing:

| Body Weight at Time of Dosing | Recommended Dose |
|---|---|
| Less than 60 kg | 0.75 mg/kg |
| 60kg or more | 45mg |
| Greater than 100kg with co-existent moderate-to-severe plaque psoriasis | 90mg |

- Pediatric PsA is a category of juvenile idiopathic arthritis (JIA).

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14

**QUANTITY LIMIT –** *Two authorizations must be entered.*

- Stelara 45 mg syringe (less than 100 kg)
    1. In PA Hub: Add Treat as "Include" Process Modifier, Ignore Misc Handler, DS, max quantity dispensed 0.5, min day supply 28, max day supply 28, number of claims authorized 1, with a duration of 3 weeks.
    2. In Darwin: Add DS, min day supply 84, max day supply 84, with an end date of 12/31/2099. Start date of this authorization is 3 weeks after initial approval date.
        - QL FOR LETTER: Loading dose: 0.5 mL per 28 days; Maintenance dose: 0.5 mL per 84 days
- Stelara 90 mg syringe (greater than or equal to 100 kg)
    1. In PA Hub: Add Treat as "Include" Process Modifier, Ignore Misc Handler, DS, max quantity dispensed 1, min day supply 28, max day supply 28, number of claims authorized 1, with a duration of 3 weeks.
    2. In Darwin: Add DS, min day supply 84, max day supply 84, with an end date of 12/31/2099. Start date of this authorization is 3 weeks after initial approval date.
        - QL FOR LETTER: Loading dose: 1 mL per 28 days; Maintenance dose: 1 mL per 84 days

**FORMULARY ALTERNATIVES:**

Adult PsA: Cosentyx*, Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Enbrel*, Otezla*, Skyrizi*, Tremfya*, Rinvoq*, Xeljanz/XR*, Cimzia*, Orencia*, Simponi*

Pediatric PsA: Cosentyx*, Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Enbrel*

*prior authorization required

**Crohn's Disease**

- Medical record documentation that Stelara is prescribed by a gastroenterologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of moderately to severely active Crohn's disease **AND**
- Medical record documentation of an intolerance to, contraindication to, or therapeutic failure on a minimum 3 month trial of three (3) of the following medications: Humira*, Cimzia*, Entyvio*, infliximab*, or Tysabri* **AND**
- Medical record documentation of Stelara 130 mg vials as IV infusion (for induction therapy) **OR** Stelara 90 mg syringes (for maintenance therapy) being prescribed **AND**
- Medical record documentation that Stelara is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**RE-AUTHORIZATION CRITERIA:** Stelara is configured as a prior authorization for new starts only. Stelara will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 105 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14

**QUANTITY LIMIT:**

- **Initial Approval –** *Two authorizations must be entered.*
    1. In PA Hub: Add Treat as "Include" Process Modifier, number of claims authorized 1, enter for the remainder of the calendar year
    2. In Darwin: Add DS, min day supply 56, max day supply 56, with an end date of 12/31/2099
        - QL FOR LETTER: 1 mL per 56 days

**NOTE:** Stelara 45 mg syringe is not indicated for use in Crohn's disease.

**NOTE:** If the initial infusion will be billed through the pharmacy benefit (i.e., specialty pharmacy trying to process the 130 mg/26 mL intravenous solution), in Darwin enter PA, OQL, DS only by GPI 52504070002020, enter 1 in the max number of claims authorized, max quantity 104, min and max day supply 56) with a duration of 1 month. This will be in addition to the authorization above. Also, you will need to update the QL for the letter to the following:

- QL FOR LETTER: Intravenous loading dose: 104 mL per 56 days; 90 mg Syringe maintenance dose: 1 mL per 56 days

**FORMULARY ALTERNATIVES:**

Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Cimzia*, Entyvio*, infliximab*, Tysabri*

*prior authorization required

**Ulcerative Colitis**

- Medical record documentation that Stelara is prescribed by a gastroenterologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of moderately to severely active ulcerative colitis **AND**
- Medical record documentation of an intolerance to, contraindication to, or therapeutic failure on a minimum 3 month trial of three (3) preferred formulary biologics for the treatment of ulcerative colitis **AND**
- Medical record documentation of an intolerance to, contraindication to, or therapeutic failure on Entyvio* **AND** infliximab* **AND**
- Medical record documentation of Stelara 130 mg vials as IV infusion (for induction therapy) **OR** Stelara 90 mg syringes (for maintenance therapy) being prescribed **AND**
- Medical record documentation that Stelara is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**RE-AUTHORIZATION CRITERIA:** Stelara is configured as a prior authorization for new starts only. Stelara will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 105 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14

**QUANTITY LIMIT:**

- **Initial Approval –** *Two authorizations must be entered.*
    1. In PA Hub: Add Treat as “Include” Process Modifier, number of claims authorized 1, enter for the remainder of the calendar year
    2. In Darwin: Add DS, min day supply 56, max day supply 56, with an end date of 12/31/2099
        - QL FOR LETTER: 1 mL per 56 days

**NOTE:** Stelara 45 mg syringe is not indicated for use in ulcerative colitis.

**NOTE:** If the initial infusion will be billed through the pharmacy benefit (i.e., specialty pharmacy trying to process the 130 mg/26 mL intravenous solution), in Darwin enter PA, OQL, DS only by GPI 52504070002020, enter 1 in the max number of claims authorized, max quantity 104, min and max day supply 56) with a duration of 1 month. This will be in addition to the authorization above. Also, you will need to update the QL for the letter to the following:

- QL FOR LETTER: Intravenous loading dose: 104 mL per 56 days; 90 mg Syringe maintenance dose: 1 mL per 56 days

**FORMULARY ALTERNATIVES:**

Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Rinvoq*, Simponi*, Xeljanz/XR*

*prior authorization required

If an exception is made, Stelara will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Signed: 
Title: Associate Vice President, Managed Care Pharmacy Services

Date: March 1, 2024

Devised: 2/1/14
Reviewed: 3/1/14 – annual review
Revised: 9/22/14 – updated alternatives criteria and auth duration for both indications, updated FA and signature, and added "at least" to age criteria for both indications
Revised: 2/9/15 – updated alternatives criteria & FA for both indications, updated prescriber criteria for PsA
Reviewed: 3/1/15 – annual review
Revised: 9/19/15 – removed joint count criteria from initial and renewal requirements
Reviewed: 3/1/16 – annual review
Revised: 5/1/16 – updated format, logo, & procedure
Revised: 7/27/16 – added dosing requirement for both indications, added dosing note
Reviewed: 3/1/17 – annual review
Revised: 3/27/17 – added Crohn's, moved notes to indication in policy

| | |
|---|---|
| Revised: | 6/2/17 – removed Unicode characters, corrected typo in Crohn's note |
| Revised: | 9/15/17 – updated Crohn's to failure of 3 agents, added induction/maintenance bullet to match P&T approved policy |
| Revised: | 3/1/18 – annual review, updated signature, updated prescriber & age criteria, added grandfather language |
| Revised: | 5/30/18 – added pediatric psoriasis, moved FA, added no use with other biologics, removed failure of Enbrel and added failure of Cosentyx (PP, PsA), added QL (PP, PsA), updated GPID note |
| Revised: | 3/1/19 – annual review, defined TNF |
| Revised: | 6/4/19 – updated QL, removed RX counts, added authorization parameters |
| Revised: | 3/1/20 – annual review, added GHP Kids |
| Revised: | 4/21/20 – updated CD QL, removed reference to Remicade/Inflectra, added UC indication |
| Revised: | 1/25/21 – updated pedPP to age 6 & auth duration/QL language, added MediSpan approval level |
| Revised: | 3/1/21 – annual review, updated logo, updated QL statements, add FA to CD & UC |
| Revised: | 12/2/21 – added one-time PA to approval crit., removed auth duration & added re-auth crit., updated QL auth entry to account for PA NSO |
| Reviewed: | 1/5/22 – added OUP to all auths, updated GPI for CD 7 UC |
| Revised: | 3/1/22 – annual review, updated referenced policies & covered LOBs, updated how QL's are entered |
| Revised: | 4/6/22 – updated vial QL for ped. PsO, added IV loading dose note to CD & UC |
| Revised: | 7/20/22 – updated topical corticosteroid alternatives in pediatric PsO section |
| Revised: | 1/1/23 – updated PsO & FA to allow Stelara after failure of 4 preferred agents; updated PsA to include peds, failure of 3 preferred agents & FA; updated UC & FA to allow Stelara after failure of 3 preferred pharmacy benefit alternatives |
| Revised: | 1/19/23 – corrected age typo for PsA |
| Revised: | 3/1/23 – annual review; updated look back to 105 days |
| Revised: | 3/1/24 – annual review; updated signature; updated auth entry parameters, updated FA |

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 321.0**

**SECTION: Commercial Drug**
**SUBJECT: Actemra Self-Injectable**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Actemra self-injectable for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Actemra Self Injectable may be made for members who meet the following criteria:

**Rheumatoid Arthritis**

- Medical record documentation that Actemra Self Injectable is prescribed by a rheumatologist **AND**
- Medical record documentation of a diagnosis of moderate to severe rheumatoid arthritis (made in accordance with the American College of Rheumatology Criteria for the Classification and Diagnosis of Rheumatoid Arthritis **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to a minimum 3 month trial of two (2) preferred formulary biologics for the treatment of rheumatoid arthritis **AND**
- Medical record documentation that Actemra is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 3.6 mL per 28 days

**RE-AUTHORIZATION CRITERIA:** Actemra self-injectable is configured as a prior authorization for new starts only. Actemra self-injectable will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Enbrel*, Rinvoq*, Xeljanz*

*prior authorization required

**Active polyarticular juvenile idiopathic arthritis (PJIA)**

- Medical record documentation that Actemra Self Injectable is prescribed by a rheumatologist **AND**
- Medical record documentation of a diagnosis of active polyarticular juvenile idiopathic arthritis or juvenile rheumatoid arthritis **AND**
- Medical record documentation of age greater than or equal to 2 years **AND**
- Medical record documentation of an intolerance to, contraindication to, or therapeutic failure on a minimum 3 month trial of two (2) preferred formulary biologics for the treatment of juvenile idiopathic arthritis or juvenile rheumatoid arthritis **AND**
- Medical record documentation that Actemra is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 3.6 mL per 28 days

**RE-AUTHORIZATION CRITERIA:** Actemra self-injectable is configured as a prior authorization for new starts only. Actemra self-injectable will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Enbrel*, Xeljanz*

*prior authorization required

**Active systemic juvenile idiopathic arthritis (SJIA)**

- Medical record documentation that Actemra Self Injectable is prescribed by a rheumatologist **AND**
- Medical record documentation of a diagnosis of active systemic juvenile idiopathic arthritis **AND**
- Medical record documentation of age greater than or equal to 2 years **AND**
- Medical record documentation that Actemra is not being used concurrently with a tumor necrosis factor (TNF) or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 3.6 mL per 28 days

**RE-AUTHORIZATION CRITERIA:** Actemra self-injectable is configured as a prior authorization for new starts only. Actemra self-injectable will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

none

**Giant Cell Arteritis**

- Medical record documentation that Actemra Self Injectable is prescribed by a rheumatologist **AND**
- Medical record documentation of a diagnosis of giant cell arteritis **AND**
- Medical record documentation that Actemra is being prescribed in combination with oral glucocorticoids **AND**
- Medical record documentation that Actemra is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 3.6 mL per 28 days

**RE-AUTHORIZATION CRITERIA:** Actemra self-injectable is configured as a prior authorization for new starts only. Actemra self-injectable will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**NOTE:** Although traditionally the erythrocyte sedimentation rate and/or C-reactive protein are high in giant cell arteritis, the range of values for both test is broad and non-specific.

**FORMULARY ALTERNATIVES:**

none

**Systemic Sclerosis-Associated Interstitial Lung Disease (SSc-ILD)**

- Medical record documentation that Actemra Self Injectable is prescribed by or in consultation with a pulmonologist and/or rheumatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of systemic sclerosis according to American College of Rheumatology (ACR) and European League Against Rheumatism (EULAR) **AND**
- Medical record documentation that Actemra is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent
- Medical record documentation of systemic sclerosis related to interstitial lung disease confirmed by all of the following:
  - greater than or equal to 10% fibrosis on a chest high resolution computer tomography **AND**
  - forced viral capacity (FVC) greater than or equal to 40% of predicted normal **AND**
  - DLCO (diffusion capacity of the lung for carbon monoxide) 30-89% of predicted normal

***NOTE:** ACR/EULAR Diagnostic Criteria for Systemic Sclerosis:

| Item | Sub-item(s) | Weight/score† |
|---|---|---|
| Skin thickening of the fingers of both hands extending proximal to the metacarpophalangeal joints *(sufficient criterion)* | – | 9 |
| Skin thickening of the fingers *(only count the higher score)* | Puffy fingers | 2 |
| | Sclerodactyly of the fingers (distal to the metacarpophalangeal joints but proximal to the proximal interphalangeal joints) | 4 |
| Fingertip lesions *(only count the higher score)* | Digital tip ulcers | 2 |
| | Fingertip pitting scars | 3 |
| Telangiectasia | – | 2 |
| Abnormal nailfold capillaries | – | 2 |
| Pulmonary arterial hypertension and/or interstitial lung disease *(maximum score is 2)* | Pulmonary arterial hypertension | 2 |
| | Interstitial lung disease | 2 |
| Raynaud's phenomenon | – | 3 |
| SSc-related autoantibodies (anticentromere, anti–topoisomerase I [anti–Scl-70], anti–RNA polymerase III) *(maximum score is 3)* | Anticentromere<br>Anti–topoisomerase I<br>Anti–RNA polymerase III | 3 |

* These criteria are applicable to any patient considered for inclusion in an SSc study. The criteria are not applicable to patients with skin thickening sparing the fingers or to patients who have a scleroderma-like disorder that better explains their manifestations (e.g., nephrogenic sclerosing fibrosis, generalized morphea, eosinophilic fasciitis, scleredema diabeticorum, scleromyxedema, erythromyalgia, porphyria, lichen sclerosis, graft-versus-host disease, diabetic cheiroarthropathy).
† The total score is determined by adding the maximum weight (score) in each category. Patients with a total score of ≥9 are classified as having definite SSc.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 3.6 mL per 28 days

**RE-AUTHORIZATION CRITERIA:** Actemra self-injectable is configured as a prior authorization for new starts only. Actemra self-injectable will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

none

**COVID-19**

If Actemra is being prescribed for COVID-19, see the FDA website for Emergency Use Authorizations at https://www.fda.gov/emergency-preparedness-and-response/mcm-legal-regulatory-and-policy-framework/emergency-use-authorization#coviddrugs for current FDA authorized use. At this time, Actemra is authorized for inpatient use only for COVID-19 and would not be covered for outpatient use.

If an exception is made, Actemra Self Injectable will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 322.0**

**SECTION: Commercial Drug**
**SUBJECT: Fycompa**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Fycompa for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Fycompa may be made for members who meet the following criteria:

**Partial Onset Seizures**

- Medical record documentation of a diagnosis of partial onset seizures **AND**
- Medical record documentation of age greater than or equal to 4 years **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three (3) formulary alternatives

**Primary Generalized Tonic-Clonic Seizures**

- Medical record documentation of a diagnosis of primary generalized tonic-clonic seizures **AND**
- Medical record documentation of age greater than or equal to 12 years **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three (3) formulary alternatives **AND**
- Medical record documentation that Fycompa is being used concomitantly with at least one (1) other formulary antiepileptic drug

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 tablet per day

If an exception is made, Fycompa will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

**Partial Onset Seizures**:
For patients > 4 years of age: carbamazepine, gabapentin, lamotrigine IR, levetiracetam IR, oxcarbazepine, phenobarbital, phenytoin, pregabalin, topiramate IR, topiramate ER*

Additional formulary alternatives for patients over certain ages:
divalproex (10+), levetiracetam ER (12+), tiagabine (12+), lamotrigine ER (13+), felbamate (14+), and zonisamide (16+)

**Primary Generalized Tonic-Clonic Seizures**: carbamazepine, lamotrigine, levetiracetam, phenytoin, primidone, topiramate

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY NUMBER: 326.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Sovaldi**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Sovaldi for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

6. ***HCV –*** Hepatitis C Virus
7. ***FDA –*** Food and Drug Administration
8. ***HIV –*** Human Immunodeficiency Virus
9. ***HBV –*** Hepatitis B Virus

**PROCEDURE:**

An exception for coverage of Sovaldi may be made for members who meet the following criteria:

- Medical record documentation of age greater than or equal to 3 years using weight-based dosing **AND**
- Medical record documentation of a diagnosis of hepatitis C infection **AND**
- Medical record documentation of the member's hepatitis C genotype **AND**
- Medical record documentation of a diagnosis of Hepatitis C Virus (HCV) genotype 1, 2, 3, or 4 infection in adults **OR** HCV genotype 2 or 3 in pediatric patients greater than or equal to 3 years of age, without cirrhosis or with compensated cirrhosis, as a component of a combination antiviral treatment regimen **AND**
- Medical record documentation of METAVIR liver scoring or cirrhosis assessment by a non-invasive test **AND**
- Medical record documentation of a hepatocellular carcinoma screening in those with cirrhosis (METAVIR score F4) **AND**
- Medical record documentation of the member receiving a Food and Drug Administration (FDA) approved medication regimen that is inside the parameters of use approved by the FDA or supported in the widely used compendia available **AND**
- Medical record documentation of appropriate duration of treatment **AND**
- Medical record documentation of previous treatment and treatment response **AND**
- Medical record documentation of any potential drug interactions addressed by the prescriber (such as discontinuation of the interacting drug, dose reduction of the interacting drug, or counseling of the recipient of the risks associated with the use of both medications when they interact) **AND**

- Medical record documentation of receiving the following within the past 6 months:
  - Hepatic function panel
  - Complete blood count including differential
  - Basic metabolic panel **AND**
- Medical record documentation of receiving the following within a reasonable timeframe:
  - Baseline hepatitis C virus (HCV) RNA viral load **AND**
- Medical record documentation of concurrent therapy with appropriate dose and duration of weight-based ribavirin, if indicated **AND**
- Medical record documentation of a negative pregnancy test if member is female of childbearing potential and receiving ribavirin **AND**
- When concurrent ribavirin therapy is indicated and prescribed, medical record documentation for male members that female partner is not pregnant **AND**
- If the member or their partner are of childbearing potential, medical record documentation that the member was instructed to practice effective contraception during therapy with ribavirin and for 6 months following discontinuation of ribavirin therapy **AND**
- If actively abusing alcohol or intravenous (IV) drugs, or has a history of abuse, has documentation of prescriber counseling regarding the risks of alcohol or IV drug abuse, and an offer of a referral for substance use disorder treatment **AND**
- Medical record documentation that member received pre-treatment readiness education about hepatitis C treatment expectations by a health care provider **AND**
- Medical record documentation that the member commits to the documented planned course of treatment including anticipated blood tests and visits, during and after treatment **AND**
- Medical record documentation that member does not have a limited life expectancy of less than 12 months due to non-liver-related co-morbid conditions **AND**
- Medical record documentation of completed:
  - Hepatitis B immunization series **OR**
  - Hepatitis B screening (sAb/sAg and cAb/cAg) **AND** Quantitative hepatitis B virus (HBV) DNA if positive for hepatitis B sAg or cAb or cAg **AND**
    - If there is detectable hepatitis B virus (HBV) DNA, will be treated for Hepatitis B **OR**
    - If negative for hepatitis B sAb, is being vaccinated against Hepatitis B **AND**
- Medical record documentation of human immunodeficiency virus (HIV) screening (HIV Ag/Ab) and if confirmed positive by HIV-1/HIV-2 differentiation immunoassay:
  - Is being treated for human immunodeficiency virus (HIV) **OR**
  - If not being treated for human immunodeficiency virus (HIV), the medical record documents the rationale for the beneficiary not being treated **AND**

- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Mavyret, if clinically appropriate **AND**
- Medical record documentation that member has been evaluated and treated by a contracted Center of Excellence in hepatitis C management

**OR**

- Medical record documentation of a hepatitis C negative recipient receiving a transplant from a hepatitis C positive donor **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Mavyret, if clinically appropriate

**NOTES:**

1. Center of Excellence (COE) requirements do not apply to strategic partner TPA plans (i.e., Northern Light Health).
2. The AASLD/IDSA Guidelines only recommend single-agent sofosbuvir, in combination with other appropriate agents, for HCV infection (all genotypes) in limited situations.
3. Guidelines can be referenced at www.hcvguidlines.org.

**TREATMENT DURATION:** Consistent with AASLD/ISDA Guidelines

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 200 mg and 400 mg tablets: 1 tablet per day, 28 day supply per fill
  - 150 mg pellets: 1 packet per day, 28 day supply per fill
  - 200 mg pellets: 2 packets per day, 28 day supply per fill

**APPROVAL LANGUAGE:** Meets criteria, auth x (?) weeks, RX count= (?), (28 day supply/fill), generic only [when applicable]. QL: 1 tab/day (QL for LETTER only)

If an exception is made, Sovaldi will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

Title: Associate Vice President, Managed Care Pharmacy Services

Date: March 1, 2024

Devised: 5/28/14
Revised: 9/22/14 – Updated the following: F3/F4 fibrosis for all genotypes, abstinence from alcohol and illegal substances for all members, removed verbal commitment to therapy, life expectancy
Revised: 12/1/14 – Updated life expectance criteria to include “due to non-liver-related co-morbid conditions”
Revised: 2/9/15 – added METAVIR scoring, no S/S of decompensated liver disease, UDS, renal function
Revised: 2/16/15 – removed duplicate renal function criteria
Reviewed: 3/1/15 – annual review
Revised: 1/29/16 – added HBV/HIV to definitions, added hepatocellular screening criterion, added severe extrahepatic manifestations of hep C criterion, removed in writing from member commitment
Reviewed: 3/1/16 – annual review
Revised: 3/24/16 – removed no S/S of decompensated liver disease
Revised: 5/1/16 – updated format, logo, & procedure
Revised: 5/27/16 – updated reauthorization criteria, added “if cirrhotic” for G3, added Daklinza and noncirrhotic for G3
Revised: 11/22/16 – Added F2 fibrosis, referral to substance use treatment. Removed 6 months abstinence, substance use treatment compliance, UDS/fill history, GHP representative. Update FA, added if applicable.
Revised: 3/1/17 – annual review, defined abbreviations, removed Unicode characters
Revised: 3/27/17 – G3: removed peginterferon, added w/ Daklinza for post transplant
Revised: 6/2/17 – removed fibrosis/liver manifestations requirement, added METAVIR scoring, updated diagnosis (removed HCC and HIV co-infection), removed peginterferon references for G1 therapy, added regimen supported by

compendia, removed failure of same DAA
Revised: 8/8/17 – updated age to include 12 or older OR weight greater than 35 kg for G2 & G3, added concurrent therapy with peg/rib for G1 & concurrent therapy with rib for G3
Revised: 11/27/17 – added failure of Mavyret, updated FA, updated signature
Revised: 1/19/18 – corrected typo, removed prescriber, added Hep B & HIV criteria, updated FA
Revised: 3/1/18 – annual review, updated Hep B/HIV criteria to match DHS, corrected typo
Revised: 12/28/18 – added HCV positive transplant indication/FA criteria, added COE
Revised: 3/1/19 – annual review, added QL approval note, defined abbr., removed Olysio references (D/C)
Revised: 7/23/19 – added TPA COE exclusion
Revised: 01/28/20 – updated age to 3 and weight based dosing, updated genotypes, removed concurrent peginterferon criteria, updated treatment duration to consistent with AASLD/ISDA guidelines and removed subsequent authorization criteria
Revised: 3/1/20 – annual review, added GHP Kids
Revised: 7/29/20 – added QL for pellets
Revised: 3/1/21 – annual review, updated logo, added MediSpan approval level, updated QL statement
Revised: 3/1/22 – annual review, updated referenced policies & covered LOBs, removed St. Lukes & Atlanticare from COE note
Reviewed: 3/1/23 – annual review
Revised: 7/25/23 – removed renal impairment criterion; updated diagnosis criterion, METAVIR scoring criterion, baseline labs within 6 months, HCV RNA within reasonable timeframe, notes, signature title, authorization duration; added approval language; moved/updated ribavirin criterion
Revised: 11/1/23 – updated 400 mg pellet QL to 150 mg pellets
Reviewed: 3/1/24 – annual review

Geisinger

**POLICY NUMBER: 327.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Aptiom**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Aptiom for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Aptiom may be made for members who meet the following criteria:

- Medical record documentation that Aptiom is prescribed by a neurologist **AND**
- Medical record documentation of age greater than or equal to 4 years **AND**
- Medical record documentation of a diagnosis of partial-onset seizures **AND**
- Medical record documentation of contraindication to, therapeutic failure on, or intolerance to 3 formulary alternatives, one of which must be oxcarbazepine

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 600 mg or 800 mg tablet: 2 tablets per day
  - 200 mg or 400 mg: 1 tablet per day

If an exception is made, Aptiom will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 333.0**

**SECTION: Commercial Drug**
**SUBJECT: Xerese**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Xerese for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Xerese may be made for members who meet the following criteria:

**Members 12 Years of Age and Older**

- Medical record documentation of a diagnosis of cold sores (Herpes Simplex 1 or Herpes Labialis) **AND**
- Medical record documentation of age greater than or equal to 12 years **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Abreva (OTC), acyclovir cream*, penciclovir cream*, famciclovir **AND** valacyclovir

**Members Aged 6 to Less Than 12 Years**

- Medical record documentation of a diagnosis of cold sores (Herpes Simplex 1 or Herpes Labialis) **AND**
- Medical record documentation of age greater than or equal to 6 years and less than 12 years

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Xerese will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Otezla for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Otezla may be made for members who meet **ALL** of the following criteria:

**For Psoriatic Arthritis:**

- Medical record documentation that Otezla is prescribed by a rheumatologist or dermatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of moderately to severely active psoriatic arthritis which must include documentation of either active psoriatic lesions or a documented history of psoriasis **AND**
- For peripheral disease: Medical record documentation of an intolerance to, contraindication to, or therapeutic failure on methotrexate **AND** an adequate trial of at least two (2) formulary nonsteroidal anti-inflammatory drugs (NSAIDs) OR medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy **OR**
- For axial disease: Medical record documentation of an intolerance to, contraindication to, or therapeutic failure to an adequate trial of at least two (2) formulary nonsteroidal anti-inflammatory drugs (NSAIDs) **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 2 tablets per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Otezla is configured as a prior authorization for new starts only. Otezla will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

methotrexate, celecoxib, choline magnesium salicylate, diclofenac, diclofenac extended release, diflunisal, etodolac, etodolac extended release, fenoprofen, flurbiprofen, ibuprofen, indomethacin, indomethacin sustained release, ketoprofen, ketorolac, meclofenamate, meloxicam, nabumetone, naproxen, naproxen sodium, naproxen EC, oxaprozin, piroxicam, salsalate, sulindac, tolmetin

**For Plaque Psoriasis:**

- Medical record documentation that Otezla is prescribed by a dermatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- For mild disease:
    - Medical record documentation of a diagnosis of mild to moderate plaque psoriasis characterized by less than 5% of body surface area involved **AND**
    - Medical record documentation of an intolerance to, contraindication to, or therapeutic failure of 2 topical therapies (one of which is a corticosteroid of at least medium potency) **AND**
    - Medical record documentation of an intolerance to, contraindication to, or therapeutic failure of phototherapy
- For moderate-severe disease:
    - Medical record documentation of a diagnosis of moderate to severe plaque psoriasis characterized by greater than 5% of body surface area involved or disease involving crucial body areas such as the hands, feet, face, or genitals **AND**
    - Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to topical corticosteroids **AND** at least two to three months of systemic therapy (including but not limited to methotrexate and/or cyclosporine) or phototherapy **OR** medical record documentation of a therapeutic failure on or intolerance to prior biologic therapy

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 2 tablets per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Otezla is configured as a prior authorization for new starts only. Otezla will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

cyclosporine, methotrexate

**Low-potency topical corticosteroids:** alclometasone dipropionate 0.5% cream and ointment (Aclovate); desonide 0.05% cream, ointment and lotion (Desowen); fluocinolone acetonide 0.01% cream, solution, body and scalp oil (Synalar/Derma-Smoothe); hydrocortisone 1% and 2.5% cream, ointment, and lotion (Hytone)

**Medium-potency topical corticosteroids:** betamethasone valerate 0.1% cream and lotion (Valisone); fluocinolone acetonide 0.025% cream and ointment (Synalar); flurandrenolide 0.05% cream, ointment, and lotion (Cordran); fluticasone propionate 0.05% cream and lotion (Cutivate); hydrocortisone butyrate 0.1% cream, ointment and solution (Locoid); hydrocortisone valerate 0.2% cream and ointment (Westcort); mometasone 0.1% cream (Elocon); prednicarbate 0.1% cream and ointment (DermAtop); triamcinolone acetonide 0.025% cream, ointment and lotion (Kenalog); triamcinolone 0.1% cream, ointment and lotion (Kenalog); triamcinolone acetonide 0.147 mg/g aerosol (Kenalog Spray)

**High-potency topical corticosteroids:** amcinonide 0.1% cream, ointment and lotion (Cyclocort); augmented betamethasone dipropionate 0.05% cream (Diprolene AF); betamethasone dipropionate 0.05% cream, ointment and lotion (Diprolene); betamethasone valerate 0.1% ointment (Valisone); betamethasone valerate 0.12% foam (Luxiq); desoximetasone 0.25% cream, ointment and 0.05% cream, gel, ointment (Topicort/Topicort LP); ); diflorasone 0.05% cream (Florone/Psorcon); fluocinonide 0.05% cream, ointment, gel and solution (Lidex); fluticasone 0.005% ointment (Cutivate); mometasone 0.1% ointment (Elocon); triamcinolone 0.5% cream and ointment (Kenalog)

**Very high-potency topical corticosteroids:** augmented betamethasone dipropionate 0.05% ointment, gel and lotion (Diprolene); clobetasol 0.05% cream, ointment, scalp lotion, shampoo, foam, spray (Temovate/Clobex/Olux) diflorasone diacetate 0.05% ointment (ApexiCon/Psorcon E), fluocinonide 0.1% cream (Vanos), halobetasol 0.05% cream and ointment (Ultravate)

**For Behçet's Disease**

- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of oral ulcers associated with Behçet's Disease

**NOTE:** The International Clinical Criteria for Behçet's Disease diagnostic criteria:

- Recurrent oral ulcerations (apthous or herpetiform) at least three times in one year.
- Additionally, patients must present with two of the following:
  - Recurrent genital ulcerations
  - Eye lesions (uveitis and retinal vasculitis) observed by an ophthalmologist
  - Skin lesions (erythema nodosum, pseudofolliculitis, papulopustular lesions, acneiform nodules) found in adult patients not being treated with corticosteroids
  - Positive "pathergy test" read by a physician within 24-48 hours of testing

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 2 tablets per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Otezla is configured as a prior authorization for new starts only. Otezla will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

none

If an exception is made, Otezla will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Aveed**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Aveed for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Aveed may be made for members who meet **ALL** of the following criteria:

- Medical record documentation of use for testosterone replacement therapy in adult males for conditions associated with a deficiency or absence of endogenous testosterone:
  - Primary hypogonadism (congenital or acquired)
  - Hypogonadotropic hypogonadism (congenital or acquired) **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to testosterone cypionate **AND** testosterone enanthate

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Aveed will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

testosterone cypionate, testosterone enanthate

**PROCEDURE:**

An exception for coverage of Myalept may be made for members who meet **ALL** of the following criteria:

- Medical record documentation that Myalept is prescribed by an endocrinologist **AND**
- Medical record documentation of laboratory confirmed leptin deficiency* associated with congenital or acquired generalized lipodystrophy **AND**
- For congenital generalized lipodystrophy only: Medical record documentation of genetic testing to confirm the diagnosis of congenital generalized lipodystrophy **AND**
- No medical record documentation of human immunodeficiency virus (HIV) or congenital or acquired partial lipodystrophy **AND**
- Medical record documentation of an insufficient response to at least 6 months on a physician supervised diet program **AND**
- Medical record documentation that Myalept will be reconstituted with bacteriostatic water for injection in members 18 years of age and older **AND**
- Medical record documentation of one or both of the following:
    - A diagnosis of diabetes (including baseline hemoglobin A1C (HbA1C) value) **AND** failure (defined by HbA1C greater than or equal to 8.5% on maximum recommended dose) on, intolerance to, or contraindication to at least one formulary antidiabetic agent from three classes, one of which must be insulin;
    - A diagnosis of hypertriglyceridemia (including baseline triglyceride level greater than or equal to 500 mg/dL) associated with the above diagnosis **AND** failure on, intolerance to, or contraindication to at least one formulary antihyperlipidemic agent from three classes, one of which must be fenofibrate **AND** patient managed by a cardiologist

*Leptin reference ranges:

Pediatric male and female

5-9.9 Years 0.6-16.8 ng/mL
10-13.9 Years 1.4-16.5 ng/mL
14-17.9 Years 0.6-24.9 ng/mL

Adult Lean Subjects (18-71 Years) with BMI range of 18-25

Male 0.3-13.4 ng/mL
Female 4.7-23.7 ng/mL

Adult Subjects (19-60 Years) with BMI range of 25-30

Male 1.8-19.9 ng/mL
Female 8.0-38.9 ng/mL

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**AUTHORIZATION DURATION:** Initial authorization will be for 6 months. For continuation of coverage, medical record documentation of improvement in objective measures associated with the complications related to congenital or acquired generalized lipodystrophy (i.e.: hemoglobin A1c (HbA1c), fasting blood sugar, triglycerides) is required. Subsequent approvals will be for 6 months.

If an exception is made, Myalept will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Zontivity for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Zontivity may be made for members who meet **ALL** of the following criteria:

**History of Myocardial Infarction (MI)**

- Medical record documentation of a myocardial infarction (MI) occurring less than 12 months prior to starting therapy **AND**
- Medical record documentation of NO prior history of stroke, transient ischemic attack, or intracranial hemorrhage **AND**
- Medical record documentation of concomitant therapy with aspiring alone, a thienopyridine (clopidogrel) alone, or a combination of aspirin and clopidogrel

**Peripheral Arterial Disease (PAD)**

- Medical record documentation of peripheral arterial disease (PAD) as indicated by a history of intermittent claudication **AND**
- Medical record documentation of a resting ankle/brachial index (ABI) of less than 0.85 **OR** amputation, peripheral bypass, or peripheral angioplasty of the extremities secondary to ischemia **AND**
- Medical record documentation of NO prior history of stroke, transient ischemic attack, or intracranial hemorrhage **AND**
- Medical record documentation of concomitant therapy with aspirin alone, a thienopyridine (clopidogrel) alone, or a combination of aspirin and clopidogrel

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Zontivity will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

cilostazol, clopidogrel, dipyridamole, pentoxifylline, ticlopidine, aspirin/dipyridamole ER, Brilinta, prasugrel*

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**SECTION: Commercial Drug**
**SUBJECT: Grastek**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Grastek for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Grastek may be made for members who meet **ALL** of the following criteria:

- Medical record documentation that Grastek is prescribed by an allergist, immunologist or a physician qualified to prescribe allergy immunotherapy **AND**
- Medical record documentation of age greater than or equal to 5 years and less than or equal to 65 years **AND**
- Medical record documentation of Timothy grass pollen or cross-reactive grass pollen induced allergic rhinitis confirmed by positive skin test or *in vitro* testing for pollen-specific IgE antibodies **AND**
- Medical record documentation that the member has (or will receive) a prescription for an epinephrine auto-injector **AND**
- Medical record documentation that the member does not have severe, unstable, or uncontrolled asthma **AND**
- Medical record documentation that member will no longer be receiving injectable allergy shots **AND**
- Medical record documentation that Grastek will not be used in combination with sublingual immunotherapy (e.g., Odactra, Oralair, and Ragwitek) **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three (3) formulary alternatives, one of which must be an intranasal glucocorticoid

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** 1 tablet per day, 30 day supply per fill should apply, 180 tablets per 365 days

**NOTE:** If the pollen season is longer than 3 months, a quantity limit exception equivalent to the time necessary for treatment through the remainder of the pollen season will be approved.

If an exception is made, Grastek will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

fluticasone propionate, triamcinolone acetonide, budesonide, mometasone furoate, levocetirizine tablets, desloratadine tablets, montelukast

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**SECTION: Commercial Drug**
**SUBJECT: Oralair**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Oralair for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Oralair may be made for members who meet **ALL** of the following criteria:

- Medical record documentation that Oralair is prescribed by an allergist, immunologist, or a physician qualified to prescribe allergy immunotherapy **AND**
- Medical record documentation of age greater than or equal to 10 years and less than or equal to 65 years **AND**
- Medical record documentation of grass pollen induced (Timothy, Orchard, Sweet Vernal, Kentucky Blue Grass, Perennial Rye) allergic rhinitis confirmed by positive skin test or *in vitro* testing for pollen-specific IgE antibodies **AND**
- Medical record documentation that the member has (or will receive) a prescription for an epinephrine auto-injector **AND**
- Medical record documentation that the member does not have severe, unstable, or uncontrolled asthma **AND**
- Medical record documentation that member will no longer be receiving injectable allergy shots **AND**
- Medical record documentation that Oralair will not be used in combination with sublingual immunotherapy (e.g., Grastek, Odactra, and Ragwitek) **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three (3) formulary alternatives, one of which must be an intranasal glucocorticoid

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** 1 tablet per day, 30 day supply per fill should apply, 210 tablets per 365 days

**NOTE:** If the pollen season is longer than 3 months, a quantity limit exception equivalent to the time necessary for treatment through the remainder of the pollen season will be approved.

If an exception is made, Oralair will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

fluticasone propionate, triamcinolone acetonide, budesonide, mometasone furoate, levocetirizine tablets, desloratadine tablets, montelukast

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**SUBJECT: Ragwitek**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Ragwitek for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Ragwitek may be made for members who meet **ALL** of the following criteria:

- Medical record documentation that Ragwitek is prescribed by an allergist, immunologist, or a physician qualified to prescribe allergy immunotherapy **AND**
- Medical record documentation of age greater than or equal to 18 years and less than or equal to 65 years **AND**
- Medical record documentation of short ragweed pollen induced allergic rhinitis confirmed by positive skin test or *in vitro* testing for pollen-specific IgE antibodies **AND**
- Medical record documentation that the member has (or will receive) a prescription for an epinephrine auto-injector **AND**
- Medical record documentation that the member does not have severe, unstable, or uncontrolled asthma **AND**
- Medical record documentation that member will no longer be receiving injectable allergy shots **AND**
- Medical record documentation that Ragwitek will not be used in combination with sublingual immunotherapy (e.g., Grastek, Odactra, and Oralair) **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three (3) formulary alternatives, one of which must be an intranasal glucocorticoid

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** 1 tablet per day, 30 day supply per fill should apply, 180 tablets per 365 days

**NOTE:** If the pollen season is longer than 3 months, a quantity limit exception equivalent to the time necessary for treatment through the remainder of the pollen season will be approved.

If an exception is made, Ragwitek will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

fluticasone propionate, triamcinolone acetonide, budesonide, mometasone furoate, levocetirizine tablets, desloratadine tablets, montelukast

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**SUBJECT: Zydelig**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Zydelig for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Zydelig may be made for members who meet the following criteria:

**CLL**

- Medical record documentation that Zydelig is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of relapsed chronic lymphocytic leukemia (CLL) **AND**
- Medical record documentation of concurrent use with rituximab

**FL**

- Medical record documentation that Zydelig is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of relapsed follicular B-cell non-Hodgkin lymphoma (FL) **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to at least two prior systemic therapies

**SLL**

- Medical record documentation that Zydelig is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of relapsed small lymphocytic lymphoma (SLL) **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to at least two prior systemic therapies

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 2 tablets per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Zydelig is configured as a prior authorization for new starts only. Zydelig will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If an exception is made, Zydelig will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

none

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 350.0**

**SECTION: Commercial Drug**
**SUBJECT: Bydureon BCise**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Bydureon BCise for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Bydureon BCise may be made for members who meet the following criteria:

- For members 18 years of age and older: medical record documentation of therapeutic failure on, intolerance to, or contraindication to Victoza **AND** either Ozempic or Rybelsus **OR**
- For members between 10 and 18 years of age: medical record documentation of therapeutic failure on, intolerance to or contraindication to Victoza

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 4 syringes per 28 days

If an exception is made, Bydureon BCise will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Ozempic*, Victoza*, Rybelsus*, Trulicity*

*prior authorization required

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Zorvolex for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Zorvolex may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of mild to moderate acute pain of osteoarthritis **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to three formulary nonsteroidal anti-inflammatory drugs (NSAIDs), including:
  - At least one of the following: diclofenac sodium, diclofenac potassium, or diclofenac sodium/misoprostol **AND**
  - At least one of the following: nabumetone, meloxicam, or etodolac

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Zorvolex will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

celecoxib, choline magnesium salicylate, diclofenac, diclofenac extended release, diclofenac sodium/misoprostol, diflunisal, etodolac, etodolac extended release, fenoprofen, flurbiprofen, ibuprofen, indomethacin, indomethacin sustained release, ketoprofen, ketorolac, meclofenamate, meloxicam, nabumetone, naproxen, naproxen sodium, naproxen EC, oxaprozin, piroxicam, salsalate, sulindac, tolmetin

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Bunavail for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Bunavail may be made for members who meet the following criteria:

- Must be prescribed for the treatment of opioid dependence and the prescriber must have a unique identification number issued by the Drug Enforcement Agency (DEA) certifying prescribing authority for buprenorphine agents **AND**
- Member must be initially referred to and actively involved in formal counseling with a licensed behavioral health provider. Must provide the name of counselor and/or facility or rationale for non-participation **AND**
- For re-authorization, the member must be adherent to Bunavail therapy and must not be using opiates. Must be verified by lab screen (dated within 28 days of request date) for opiates and buprenorphine. The presence of controlled substances other than buprenorphine must be addressed **AND**
- Behavioral health vendor and/or plan case managers may contact prescriber, member, or counselor/facility to ensure compliance with these requirements. Continued approval for the drug is dependent on cooperation with this effort **AND**
- Medical record documentation of rationale for why the member cannot use buprenorphine/naloxone SL tablets **AND** buprenorphine/naloxone SL films

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 4.2/0.7 mg and 6.3/1 mg dosage forms: two (2) per day
  - 2.1/0.3 mg dosage form: one (1) per day

**AUTHORIZATION DURATION:** If approved, initial authorization duration will be 3 months. If approved, subsequent authorization duration will be 12 months.

If an exception is made, Bunavail will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**
buprenorphine/naloxone sublingual film, buprenorphine/naloxone sublingual tablet

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Harvoni and ledipasvir/sofosbuvir 90/400 mg tablet for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Harvoni and ledipasvir/sofosbuvir 90/400 mg tablet may be made for members who meet the following criteria:

- Medical record documentation of age greater than or equal to 3 years using weight-based dosing **AND**
- Medical record documentation of a diagnosis of hepatitis C infection **AND**
- Medical record documentation of the member's hepatitis C genotype **AND**
- Medical record documentation of a diagnosis of hepatitis C virus (HCV) genotype 1, 4, 5 or 6 infection without cirrhosis or with compensated cirrhosis; with decompensated cirrhosis, in combination with ribavirin (if eligible) **AND**
- Medical record documentation of METAVIR liver scoring or cirrhosis assessment by a non-invasive test **AND**
- Medical record documentation of a hepatocellular carcinoma screening in those with cirrhosis (METAVIR score F4) **AND**
- Medical record documentation of the member receiving a Food and Drug Administration (FDA) approved medication regimen that is inside the parameters of use approved by the FDA or supported in the widely used compendia available **AND**
- Medical record documentation of appropriate duration of treatment **AND**
- Medical record documentation of previous treatment and treatment response **AND**
- Medical record documentation of any potential drug interactions addressed by the prescriber (such as discontinuation of the interacting drug, dose reduction of the interacting drug, or counseling of the recipient of the risks associated with the use of both medications when they interact) **AND**
- Medical record documentation of receiving the following within the past 6 months:
    - Hepatic function panel
    - Complete blood count including differential
    - Basic metabolic panel **AND**

- Medical record documentation of receiving the following within a reasonable timeframe:
    - Baseline hepatitis C virus (HCV) RNA viral load **AND**
- Medical record documentation of concurrent therapy with appropriate dose and duration of ribavirin, if indicated **AND**
- Medical record documentation of a negative pregnancy test if member is female of childbearing potential and receiving ribavirin **AND**
- When concurrent ribavirin therapy is indicated and prescribed, medical record documentation for male members that female partner is not pregnant **AND**
- If the member or their partner are of childbearing potential, medical record documentation that the member was instructed to practice effective contraception during therapy with ribavirin and for 6 months following discontinuation of ribavirin therapy **AND**
- If actively abusing alcohol or intravenous (IV) drugs, or has a history of abuse, has documentation of prescriber counseling regarding the risks of alcohol or IV drug abuse, and an offer of a referral for substance use disorder treatment **AND**
- Medical record documentation that member received pre-treatment readiness education about hepatitis C treatment expectations by a health care provider **AND**
- Medical record documentation that the member commits to the documented planned course of treatment including anticipated blood tests and visits, during and after treatment **AND**
- Medical record documentation that member does not have a limited life expectancy of less than 12 months due to non-liver related co-morbid conditions **AND**
- Medical record documentation of completed:
    - Hepatitis B immunization series **OR**
    - Hepatitis B screening (sAb/sAg and cAb/cAg) **AND** Quantitative hepatitis B virus (HBV) DNA if positive for hepatitis B sAg or cAb or cAg **AND**
        - If there is detectable hepatitis B virus (HBV) DNA, will be treated for Hepatitis B **OR**
        - If negative for hepatitis B sAb, is being vaccinated against Hepatitis B **AND**
- Medical record documentation of human immunodeficiency virus (HIV) screening (HIV Ag/Ab) and if confirmed positive by HIV-1/HIV-2 differentiation immunoassay:
    - Is being treated for human immunodeficiency virus (HIV) **OR**
    - If not being treated for human immunodeficiency virus (HIV), the medical record documents the rationale for the beneficiary not being treated **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Mavyret, if clinically appropriate **AND**
- Medical record documentation that member has been evaluated and treated by a contracted Center of Excellence in hepatitis C management

**OR**

- Medical record documentation of a hepatitis C negative recipient receiving a transplant from a hepatitis C positive donor **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Mavyret, if clinically appropriate

**NOTES:**

1. Center of Excellence (COE) requirements do not apply to strategic partner TPA plans (i.e., Northern Light Health).
2. Guidelines can be referenced at www.hcvguidelines.org.

**TREATMENT DURATION:**
Consistent with AASLD/ IDSA Guidelines (8 weeks, 12 weeks, 24 weeks)

**8 weeks duration is only for treatment-naïve, Genotype 1 patients who are HIV-uninfected and whose HCV RNA level is < 6million IU/ml

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, if request is for ledipasvir/sofosbuvir 90/400 mg tablet include generic only.

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 90-400 mg and 45-200 mg tablets: 1 tablet per day, 28 day supply per fill
  - 45-200 mg pellets: 2 packets per day, 28 day supply per fill
  - 37.5-150 mg pellets: 1 packet per day, 28 day supply per fill

**APPROVAL LANGUAGE:** Meets criteria, auth x (?) weeks, RX count= (?), (28 day supply/fill), generic only [when applicable]. QL: 1 tab/day (QL for LETTER only)

If an exception is made, Harvoni or ledipasvir/sofosbuvir 90/400 mg tablet will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

Geisinger

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 362.0**

**SECTION: Commercial Drug**
**SUBJECT: Lynparza**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Lynparza for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Lynparza may be made for members who meet the following criteria:

**For Ovarian Cancer**

- Medical record documentation that Lynparza is prescribed by an oncologist or hematologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**

**If the member is in complete/partial response to first-line platinum based chemotherapy:**

- Medical record documentation of advanced epithelial ovarian, fallopian tube or primary peritoneal cancer **AND**
- Medical record documentation member has had a complete or partial response to first-line platinum based chemotherapy **AND**
- Medical record documentation that Lynparza will be used as maintenance treatment **AND**
- Medical record documentation of one of the following:
  - Medical record documentation of deleterious or suspected deleterious germline or somatic BRCA-mutation (*gBRCA*m or *sBRCAm*) **OR**
  - Medical record documentation of both of the following:
    - Documentation of homologous recombination deficiency (HRD)-positive status with a deleterious or suspected deleterious *BRCA* mutation **AND**

- Documentation that Lynparza will be prescribed in combination with bevacizumab

**OR**

**If the member has platinum-sensitive recurrent disease and has completed two or more lines of platinum-based chemotherapy:**

- Medical record documentation of recurrent epithelial ovarian, primary peritoneal, or fallopian tube cancer **AND**
- Medical record documentation of Lynparza being used as maintenance therapy after a complete or partial response to platinum-based chemotherapy **AND**
- Medical record documentation that Lynparza will be used as maintenance therapy

**For Metastatic Breast Cancer**

- Medical record documentation that Lynparza is prescribed by an oncologist or hematologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of deleterious or suspected deleterious *gBRCA*m, HER2-negative metastatic breast cancer **AND**
- Medical record documentation that member has been previously treated with chemotherapy in the neoadjuvant, adjuvant, or metastatic setting **AND**
- If hormone receptor (HR)-positive, medical record documentation that prior treatment included endocrine therapy or documentation that endocrine therapy would be considered inappropriate

**For Adjuvant Treatment of High Risk Early Breast Cancer**

- Medical record documentation that Lynparza is prescribed by an oncologist or hematologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of deleterious or suspected deleterious gBRCAm, HER2-negative high risk early breast cancer* **AND**
- Medical record documentation that member has been previously treated with chemotherapy in the neoadjuvant or adjuvant setting

***NOTE:** In the OlympiA trial, high risk was defined as follows:

- Prior Neoadjuvant Chemotherapy:
  - Triple Negative Breast Cancer (TNBC) or Hormone Receptor Positive Breast cancer must have had residual invasive cancer in the breast and/or the resected lymph nodes (non-pathologic complete response) at the time of surgery.
  - Hormone Receptor Positive Breast Cancer must also have had a score of ≥3 based on pre-treatment clinical and post-treatment pathologic stage

(CPS), estrogen receptor (ER) status, and histologic grade as shown in the Table 1 below.

**Table 1. Early Breast Cancer Stage, Receptor Status, and Grade Scoring Requirements for Study Enrollment**

| Stage/feature | | Points |
|---|---|---|
| **Clinical Stage (pre-treatment)** | I/IIA | 0 |
| | IIB/IIIA | 1 |
| | IIIB/IIIC | 2 |
| **Pathologic Stage (post-treatment)** | 0/I | 0 |
| | IIA/IIB/IIIA/IIIB | 1 |
| | IIIC | 2 |
| **Receptor status** | ER positive | 0 |
| | ER negative | 1 |
| **Nuclear grade** | Nuclear grade 1-2 | 0 |
| | Nuclear grade 3 | 1 |

- Prior Adjuvant Chemotherapy:
  - TNBC must have had node positive disease or node negative disease with a ≥ 2cm primary tumor
  - Hormone Receptor Positive, HER2-negative breast cancer must have had ≥ 4 pathologically confirmed positive lymph nodes

**For Metastatic Pancreatic Adenocarcinoma**

- Medical record documentation that Lynparza is prescribed by an oncologist or hematologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of deleterious or suspected deleterious *gBRCA*m metastatic pancreatic adenocarcinoma **AND**
- Medical record documentation of Lynparza being used as maintenance therapy after a complete or partial response to platinum-based chemotherapy

**For Metastatic Castration-Resistant Prostate Cancer**

- Medical record documentation that Lynparza is prescribed by an oncologist or hematologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of one of the following:
  - Medical record documentation of deleterious or suspected deleterious germline or somatic homologous recombination repair (HRR) gene-mutated metastatic castration-resistant prostate cancer (mCRPC) **AND**
  - Medical record documentation of progression following prior treatment with Xtandi or Zytiga **AND**
  - Medical record documentation that a gonadotropin-releasing hormone (GnRH) analog will be used concurrently **OR** member has had bilateral orchiectomy

**OR**

- Medical record documentation of deleterious or suspected deleterious BRCA-mutated (BRCAm) metastatic castration-resistant prostate cancer (mCRPC)
  **AND**
- Medical record documentation that Lynparza will be used in combination with abiraterone and prednisone or prednisolone

**NOTE**: The FDA approved test is the BRACAnalysis CDx™. The FoundationOne CDx™ is also FDA approved for Lynparza for ovarian and prostate cancer.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 4 tablets per day, 30 day supply per fill

**AUTHORIZATION DURATION**:
**For first-line maintenance of BRCA-mutated advanced ovarian cancer (failure on first-line platinum-based chemotherapy) and for first-line maintenance of HRD-positive advanced ovarian cancer in combination with bevacizumab:**
Initial approval will be for 12 months or less if the reviewing provider feels it is medically appropriate. One subsequent approval for Lynparza will be granted for up to an additional 12 months (total of two years of therapy) and will require medical record documentation of continued disease improvement or lack of disease progression. The medication will no longer be covered if the member experiences unacceptable toxicity or worsening of disease

For members requesting approval of treatment beyond two (2) years, medical record documentation will be required showing patient has continued evidence of disease and treating healthcare provider believes member can derive further benefit from continuous treatment. Each additional approval will be for a period of 12 months. Members with complete response at two years, will not be granted additional treatment, per the package labeling.

**For adjuvant treatment of high-risk early breast cancer:**
One time authorization for 12 months or less if the reviewing provider feels it is medically appropriate.

Authorization of Lynparza for the adjuvant treatment of high-risk early breast cancer should not exceed the FDA-approved treatment duration of 1 year (12 months). For requests exceeding the above limit, medical record documentation of the following is required:

- Peer-reviewed literature citing well-designed clinical trials to indicate that the member's healthcare outcome will be improved by dosing beyond the FDA-approved treatment duration

**For all other indications:**
Initial approval will be for 12 months or less if the reviewing provider feels it is medical appropriate. Subsequent approvals will be for an additional 12 months or less if the reviewing provider feels it is medically appropriate and will require medical record documentation of continued disease improvement or lack of disease progression. The medication will no longer be covered if the member experiences unacceptable toxicity or worsening of disease.

If an exception is made, Lynparza will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**
none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY NUMBER: 365.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Ofev**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Ofev for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Ofev may be made for members who meet the following criteria:

**Interstitial Pulmonary Fibrosis (IPF)**

- Medical record documentation that the diagnosis of interstitial pulmonary fibrosis (IPF) is made by an interdisciplinary team including, but not limited to, specialists from Pulmonary Medicine, Radiology, Thoracic Surgery, Pathology, and/or Rheumatology **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of idiopathic pulmonary fibrosis (IPF), confirmed by one of the following:
  - A usual interstitial pneumonia (UIP) pattern on high resolution CT (HRCT) scan alone **OR**
  - Both high resolution CT (HRCT) and surgical lung biopsy pattern suggestive of idiopathic pulmonary fibrosis (IPF) or probable IPF
- Medical record documentation of the exclusion of other known causes of interstitial lung disease (e.g., domestic and occupational environmental exposures, connective tissue disease, and drug toxicity) **AND**
- Medical record documentation that the patient was taught pulmonary rehabilitation techniques **AND**
- Medical record documentation that Ofev and Esbriet are not being used in combination

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 2 capsules per day, 30 day supply per fill

**Systemic Sclerosis-Associated Interstitial Lung Disease (SSc-ILD)**

- Prescription written by or in consultation with a pulmonologist and/or rheumatologist **AND**
- Medical record documentation of patient age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of systemic sclerosis according to American College of Rheumatology (ACR) and European League Against Rheumatism (EULAR) **AND**
- Medical record documentation of systemic sclerosis related to interstitial lung disease confirmed by all of the following:
    - Greater than or equal to 10% fibrosis on a chest high resolution computer tomography **AND**
    - FVC greater than or equal to 40% of predicted normal **AND**
    - DLCO (diffusion capacity of the lung for carbon monoxide) 30-89% of predicted normal

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 2 capsules per day, 30 day supply per fill

**Note:** ACR/ELAR Diagnostic Criteria for Systemic Sclerosis

| Item | Sub-item(s) | Weight/score† |
|---|---|---|
| Skin thickening of the fingers of both hands extending proximal to the metacarpophalangeal joints *(sufficient criterion)* | – | 9 |
| Skin thickening of the fingers *(only count the higher score)* | Puffy fingers | 2 |
| | Sclerodactyly of the fingers (distal to the metacarpophalangeal joints but proximal to the proximal interphalangeal joints) | 4 |
| Fingertip lesions *(only count the higher score)* | Digital tip ulcers | 2 |
| | Fingertip pitting scars | 3 |
| Telangiectasia | – | 2 |
| Abnormal nailfold capillaries | – | 2 |
| Pulmonary arterial hypertension and/or interstitial lung disease *(maximum score is 2)* | Pulmonary arterial hypertension | 2 |
| | Interstitial lung disease | 2 |
| Raynaud's phenomenon | – | 3 |
| SSc-related autoantibodies (anticentromere, anti–topoisomerase I [anti–Scl-70], anti–RNA polymerase III) *(maximum score is 3)* | Anticentromere | 3 |
| | Anti–topoisomerase I | |
| | Anti–RNA polymerase III | |

* These criteria are applicable to any patient considered for inclusion in an SSc study. The criteria are not applicable to patients with skin thickening sparing the fingers or to patients who have a scleroderma-like disorder that better explains their manifestations (e.g., nephrogenic sclerosing fibrosis, generalized morphea, eosinophilic fasciitis, scleredema diabeticorum, scleromyxedema, erythromyalgia, porphyria, lichen sclerosis, graft-versus-host disease, diabetic cheiroarthropathy).
† The total score is determined by adding the maximum weight (score) in each category. Patients with a total score of ≥9 are classified as having definite SSc.

**Chronic Fibrosing Interstitial Lung Disease (ILDs) with a Progressive Phenotype**

- Prescription written by or in consultation with a pulmonologist and/or rheumatologist **AND**
- Medical record documentation of patient age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of chronic fibrosing interstitial lung diseases (ILDs) with a progressive phenotype* **AND**
- Medical record documentation of chronic interstitial lung disease confirmed by all of the following:
    - Greater than or equal to 10% fibrosis on a chest high resolution computer tomography **AND**
    - FVC greater than or equal to 45% of predicted normal **AND**
    - DLCO (diffusion capacity of the lung for carbon monoxide) 30-80% of predicted normal **AND**
- Medical record documentation of interstitial lung disease progression despite appropriate management with documentation of one of the following:
    - FVC decline greater than or equal to 10% **OR**
    - FVC decline 5% to less than 10% with documentation of either worsening symptoms **OR** increasing fibrotic changes on imaging **OR**
    - Documentation of both worsening symptoms AND increasing fibrotic changes on imaging

***NOTE:** Chronic fibrosing interstitial lung diseases (ILDs) with a progressive phenotype includes, but is not limited to:

- Rheumatoid arthritis associated ILD (RA-ILD)
- Mixed connective tissue disease
- Chronic hypersensitivity pneumonitis (HP)
- Idiopathic nonspecific interstitial pneumonia (iNSIP)
- Unclassifiable idiopathic interstitial pneumonia (uIIP)
- Exposure-related ILD
- Sarcoidosis

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 2 capsules per day, 30 day supply per fill

If an exception is made, Ofev will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Interstitial Pulmonary Fibrosis: Esbriet*
Systemic Sclerosis-Associated Interstitial Lung Disease: none
Chronic Fibrosing Interstitial Lung Diseases: none

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Ibrance may be made for members who meet the following criteria:

**Ibrance as Initial Endocrine Therapy**

- Medical record documentation that Ibrance is prescribed by an oncologist **AND**
- Medical record documentation of a diagnosis of hormone receptor positive (HR-positive), HER2 negative advanced or metastatic breast cancer **AND**
- Ibrance is bring prescribed as initial endocrine based therapy in postmenopausal women **OR** men receiving testicular steroidogenesis suppression treated with a luteinizing hormone-releasing hormone (LHRH) agonist (i.e., goserelin, etc.) **AND**
- Medical record documentation that Ibrance will be prescribed in combination with an aromatase inhibitor (i.e., letrozole, etc.)

**Ibrance Following Disease Progression on Endocrine Therapy**

- Medical record documentation that Ibrance is prescribed by an oncologist **AND**
- Medical record documentation of a diagnosis of hormone receptor positive (HR-positive), HER2 negative advanced or metastatic breast cancer **AND**
- Ibrance is being prescribed after disease progression following endocrine therapy **AND**
- Medical record documentation that Ibrance is being used in combination with fulvestrant **AND**

- **If the request is for a pre/peri-menopausal woman:** Medical record documentation that the member is receiving ovarian suppression with a luteinizing hormone-releasing hormone (LHRH) agonist (i.e., goserelin, etc.)

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 21 capsules per 28 days, 28 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Ibrance is configured as a prior authorization for new starts only. Ibrance will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If an exception is made, Ibrance will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Velphoro may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of chronic kidney disease requiring dialysis **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to calcium acetate **AND** sevelamer carbonate **AND** lanthanum carbonate

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Velphoro will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

calcium acetate, sevelamer carbonate, lanthanum carbonate, Fosrenol powder packet

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY NUMBER: 373.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Lenvima**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Lenvima for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of Lenvima may be made for members who meet the following criteria:

**Thyroid Cancer**

- Medical record documentation that Lenvima is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of locally recurrent or metastatic, progressive, radioactive iodine-refractory differentiated thyroid cancer

**Renal Cell Carcinoma**

- Medical record documentation that Lenvima is prescribed by an oncologist **AND**
- Medical record documentation of one of the following:
    - Medical record documentation of use in combination with everolimus (generic Afinitor) for surgically unresectable advanced or metastatic renal cell carcinoma with predominant clear-cell histology **AND**
    - Medical record documentation of a therapeutic failure on or intolerance to one prior anti-angiogenic therapy, including, but not limited to, sunitinib (generic Sutent), Votrient (pazopanib), Inlyta (axitinib), Nexavar (sorafenib), Avastin (bevacizumab), everolimus (generic Afinitor), or Torisel (temsirolimus)

    **OR**

    - Medical record documentation in combination with pembrolizumab for the treatment of advanced renal cell carcinoma (RCC) **AND**

- Medical record documentation the Lenvima in combination with pembrolizumab (Keytruda) are being used as first-line treatment for advanced disease

**Hepatocellular Carcinoma**

- Medical record documentation that Lenvima is prescribed by a hematologist or oncologist **AND**
- Medical record documentation that Lenvima is being used for the treatment of unresectable hepatocellular carcinoma (HCC) **AND**
- Medical record documentation that patient has Child-Pugh Class A liver disease **AND**
- Medical record documentation that patient has not received prior therapy for unresectable hepatocellular carcinoma **AND**
- Medical record documentation that the appropriate dose of Lenvima is prescribed based on patient's body weight (greater than 60kg: Lenvima 12mg once daily, less than 60kg: Lenvima 8mg once daily)

**Endometrial Cancer**

- Medical record documentation that Lenvima is prescribed by a hematologist/oncologist **AND**
- Medical record documentation of a diagnosis of advanced endometrial carcinoma **AND**
- Medical record documentation of disease progression following at least one prior systemic therapy **AND**
- Medical record documentation that the member is not a candidate for curative surgery or radiation **AND**
- Medical record documentation that tumors are **not** microsatellite instability-hihg (MSI-H) or mismatch repair deficient (dMMR) **AND**
- Medical record documentation that Lenvima will be given in combination with pembrolizumab (Keytruda)

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 4 mg daily dose pack: 1 capsule per day, 30 days supply per fill
  - 8 mg daily dose pack: 2 capsules per day, 30 days supply per fill
  - 10 mg daily dose pack: 1 capsule per day, 30 days supply per fill
  - 12 mg daily dose pack: 3 capsules per day, 30 days supply per fill
  - 14 mg daily dose pack: 2 capsules per day, 30 days supply per fill

- 18 mg daily dose pack: 3 capsules per day, 30 days supply per fill
- 20 mg daily dose pack: 2 capsules per day, 30 days supply per fill
- 24 mg daily dose pack: 3 capsules per day, 30 days supply per fill

**RE-AUTHORIZATION CRITERIA:** Lenvima is configured as a prior authorization for new starts only. Lenvima will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If an exception is made, Lenvima will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Renal Cell Carcinoma: Caprelsa*, Cometriq*, sorafenib*

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

**For Plaque Psoriasis**

An exception for coverage of Cosentyx may be made for members who meet the following criteria:

- Medical record documentation that Cosentyx is prescribed by a dermatologist **AND**
- Medical record documentation of age greater than or equal to 6 years **AND**
- Medical record documentation of a diagnosis of moderate to severe plaque psoriasis characterized by greater than or equal to 5 % of body surface area involved or disease involving crucial body areas such as the hands, feet, face, or genitals **AND**
- Medical record documentation that Cosentyx is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to topical corticosteroids **AND** at least two to three months of systemic therapy (including but not limited to methotrexate and/or cyclosporine or phototherapy **OR** medical record documentation of therapeutic failure on or intolerance to prior biologic therapy

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT**

- 75 mg every 4 weeks
    1. In PA Hub: Add Treat as "Include" Process Modifier, Ignore Misc Handler, number of claims authorized 1, max quantity dispensed 2 with a duration of one-month.
        - QL FOR LETTER: Loading dose: 2 mL per 28 days; Maintenance dose: 0.5 mL per 28 days
- 150 mg every 4 weeks
    1. In NCRx: Add Treat as "Include" Process Modifier, Ignore Misc Handler, number of claims authorized 1, max quantity dispensed 4 with a duration of 3 weeks.
    2. In PA Hub: Add OUP, DS, Max Days Supply 56. Start date of this authorization is one-day after loading dose ends.
        - QL FOR LETTER: Loading dose: 4 mL per 28 days; Maintenance dose: 2 mL per 56 days
- 300 mg every 4 weeks
    1. In PA Hub: Add Treat as "Include" Process Modifier, Ignore Misc Handler, number of claims authorized 1, max quantity dispensed 8 with a duration of one-month.
        - QL FOR LETTER: Loading dose: 8 mL per 28 days; Maintenance dose: 2 mL per 28 days

**RE-AUTHORIZATION CRITERIA:** Cosentyx is configured as a prior authorization for new starts only. Cosentyx will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

cyclosporine, methotrexate

**Low-potency topical corticosteroids:** alclometasone dipropionate 0.5% cream and ointment (Aclovate); desonide 0.05% cream, ointment and lotion (Desowen); fluocinolone acetonide 0.01% cream, solution, body and scalp oil (Synalar/Derma-Smoothe); hydrocortisone 1% and 2.5% cream, ointment, and lotion (Hytone)

**Medium-potency topical corticosteroids:** betamethasone valerate 0.1% cream and lotion (Valisone); fluocinolone acetonide 0.025% cream and ointment (Synalar); flurandrenolide 0.05% cream, ointment, and lotion (Cordran); fluticasone propionate 0.05% cream and lotion (Cutivate); hydrocortisone butyrate 0.1% cream, ointment and solution (Locoid); hydrocortisone valerate 0.2% cream and ointment (Westcort); mometasone 0.1% cream (Elocon); prednicarbate 0.1% cream and ointment (DermAtop);

triamcinolone acetonide 0.025% cream, ointment and lotion (Kenalog); triamcinolone 0.1% cream, ointment and lotion (Kenalog); triamcinolone acetonide 0.147 mg/g aerosol (Kenalog Spray)
**High-potency topical corticosteroids:** amcinonide 0.1% cream, ointment and lotion (Cyclocort); augmented betamethasone dipropionate 0.05% cream (Diprolene AF); betamethasone dipropionate 0.05% cream, ointment and lotion (Diprolene); betamethasone valerate 0.1% ointment (Valisone); betamethasone valerate 0.12% foam (Luxiq); desoximetasone 0.25% cream, ointment and 0.05% cream, gel, ointment (Topicort/Topicort LP); ); diflorasone 0.05% cream (Florone/Psorcon); fluocinonide 0.05% cream, ointment, gel and solution (Lidex); fluticasone 0.005% ointment (Cutivate); mometasone 0.1% ointment (Elocon); triamcinolone 0.5% cream and ointment (Kenalog)
**Very high-potency topical corticosteroids:** augmented betamethasone dipropionate 0.05% ointment, gel and lotion (Diprolene); clobetasol 0.05% cream, ointment, scalp lotion, shampoo, foam, spray (Temovate/Clobex/Olux) diflorasone diacetate 0.05% ointment (ApexiCon/Psorcon E), fluocinonide 0.1% cream (Vanos), halobetasol 0.05% cream and ointment (Ultravate)

**For Psoriatic Arthritis**
An exception for coverage of Cosentyx may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of moderately to severely active psoriatic arthritis which must include documentation of either active psoriatic lesions or a documentation history of psoriasis **AND**
- Medical record documentation that Cosentyx is prescribed by a rheumatologist or dermatologist **AND**
- Medical record documentation of age greater than or equal to 2 years **AND**
- Medical record documentation that Cosentyx is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent **AND**
- **For peripheral disease:** Medical record documentation of therapeutic failure on, intolerance to, or contraindication to methotrexate **AND** an adequate trial of at least two (2) formulary nonsteroidal anti-inflammatory drugs (NSAIDs) **OR** medical record documentation of therapeutic failure on or intolerance to prior biologic therapy **OR**
- **For axial disease:** Medical record documentation of therapeutic failure on, intolerance to, or contraindication to an adequate trial of at least two (2) formulary nonsteroidal anti-inflammatory drugs (NSAIDs) **OR** medical record documentation of therapeutic failure on or intolerance to prior biologic therapy **AND**
- If the request is for a pediatric member, medical record documentation that the prescribed dosing is appropriate for member's weight

**NOTE:**
For pediatric patients weighing ≥ 15 kg and < 50 kg: Inject 75 mg subcutaneously at weeks 0, 1, 2, 3, and 4 and every 4 weeks thereafter

For pediatric patients weighing ≥ 50 kg: Inject 150mg subcutaneously at weeks 0, 1, 2, 3, and 4 and every 4 weeks thereafter

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT**

- 75 mg every 4 weeks
    1. In NCRx: Add Treat as "Include" Process Modifier, Ignore Misc Handler, number of claims authorization 1, max quantity dispensed 2 with a duration of one month.
        - QL FOR LETTER: Loading dose: 2 mL per 28 days; Maintenance dose: 0.5 mL per 28 days

- 150 mg every 4 weeks
    1. In NCRx: Add Treat as “Include” Process Modifier, Ignore Misc Handler, number of claims authorized 1, max quantity dispensed 4 with a duration of 3 weeks.
    2. In PA Hub: Add OUP, DS, Max Days Supply 56. Start date of this authorization is one-day after loading dose ends.
        - QL FOR LETTER: Loading dose: 4 mL per 28 days; Maintenance dose: 2 mL per 56 days
- 300 mg every 4 weeks
    1. In PA Hub: Add Treat as “Include” Process Modifier, Ignore Misc Handler, number of claims authorized 1, max quantity dispensed 8 with a duration of one-month.
        - QL FOR LETTER: Loading dose: 8 mL per 28 days; Maintenance dose: 2 mL per 28 days

**RE-AUTHORIZATION CRITERIA:** Cosentyx is configured as a prior authorization for new starts only. Cosentyx will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

methotrexate, celecoxib, choline magnesium salicylate, diclofenac, diclofenac extended release, diflunisal, etodolac, etodolac extended release, fenoprofen, flurbiprofen, ibuprofen, indomethacin, indomethacin sustained release, ketoprofen, ketorolac, meclofenamate, meloxicam, nabumetone, naproxen, naproxen sodium, naproxen EC, oxaprozin, piroxicam, salsalate, sulindac, tolmetin

**For Ankylosing Spondylitis**
An exception for coverage of Cosentyx may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of ankylosing spondylitis **AND**
- Medical record documentation that Cosentyx is prescribed by a rheumatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to an adequate trial of at least two (2) formulary nonsteroidal anti-inflammatory drugs (NSAIDs) **OR** medical record documentation of therapeutic failure on or intolerance to prior biologic therapy
- Medical record documentation that Cosentyx is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent **AND**
- Medical record documentation that the medication is being dose as 150 mg every 4 weeks with or without a loading dose of 150 mg at Weeks 0, 1, 2, 3, and 4

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT**

- 150 mg every 4 weeks
    1. In NCRx: Add Treat as “Include” Process Modifier, Ignore Misc Handler, number of claims authorized 1, max quantity dispensed 4 with a duration of 3 weeks.
    2. In PA Hub: Add OUP, DS, Max Days Supply 56. Start date of this authorization is one-day after loading dose ends.
        - QL FOR LETTER: Loading dose: 4 mL per 28 days; Maintenance dose: 2 mL per 56 days
- 300 mg every 4 weeks
    1. In PA Hub: Add Treat as “Include” Process Modifier, Ignore Misc Handler, number of claims authorized 1, max quantity dispensed 8 with a duration of one-month.
        - QL FOR LETTER: Loading dose: 8 mL per 28 days; Maintenance dose: 2 mL per 28 days

**RE-AUTHORIZATION CRITERIA:** Cosentyx is configured as a prior authorization for new starts only. Cosentyx will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

choline magnesium salicylate, diclofenac, diclofenac extended release, diflunisal, etodolac, etodolac extended release, fenoprofen, flurbiprofen, ibuprofen, indomethacin, indomethacin sustained release, ketoprofen, ketorolac, meclofenamate, meloxicam, nabumetone, naproxen, naproxen sodium, naproxen EC, oxaprozin, piroxicam, salsalate, sulindac, tolmetin

**For Non-radiographic Axial Spondylarthritis (nr-axSpA):**
An exception for coverage of Cosentyx may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of non-radiographic axial spondylarthritis **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation that Cosentyx is prescribed by a rheumatologist **AND**
- Medical record documentation of at least one of the following:
    - C-reactive protein (CRP) level above the upper limit of normal (10 mg/dL) OR
    - Sacroiliitis on magnetic resonance imaging (MRI)

**AND**

- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to at least two (2) nonsteroidal anti-inflammatory drugs (NSAIDs) **AND**
- Medical record documentation that Cosentyx is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent **AND**
- Medical record documentation that the medication is being dosed as 150 mg every 4 weeks with or without a loading dose of 150 mg at Weeks 0, 1, 2, 3, and 4

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT**

- 150 mg every 4 weeks
    1. In NCRx: Add Treat as “Include” Process Modifier, Ignore Misc Handler, number of claims authorized 1, max quantity dispensed 4 with a duration of 3 weeks.
    2. In PA Hub: Add OUP, DS, Max Days Supply 56. Start date of this authorization is one-day after loading dose ends.
        - QL FOR LETTER: Loading dose: 4 mL per 28 days; Maintenance dose: 2 mL per 56 days

**RE-AUTHORIZATION CRITERIA:** Cosentyx is configured as a prior authorization for new starts only. Cosentyx will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

choline magnesium salicylate, diclofenac, diclofenac extended release, diflunisal, etodolac, etodolac extended release, fenoprofen, flurbiprofen, ibuprofen, indomethacin, indomethacin sustained release, ketoprofen, ketorolac, meclofenamate, meloxicam, nabumetone, naproxen, naproxen sodium, naproxen EC, oxaprozin, piroxicam, salsalate, sulindac, tolmetin

**For Enthesitis-Related Arthritis**
An exception for coverage of Cosentyx may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of enthesitis-related arthritis **AND**
- Medical record documentation that Cosentyx is prescribed by a rheumatologist **AND**
- Medical record documentation of age greater than or equal to 4 years **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to an adequate trial of at least two (2) formulary nonsteroidal anti-inflammatory drugs (NSAIDs) **AND**
- Medical record documentation that Cosentyx is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent **AND**
- Medical record documentation that the prescribed dosing is appropriate for patient's weight

**NOTE:**
For pediatric patients weighing ≥ 15 kg and < 50 kg: Inject 75 mg subcutaneously at weeks 0, 1, 2, 3, and 4 and every 4 weeks thereafter

For pediatric patients weighing ≥ 50 kg: Inject 150mg subcutaneously at weeks 0, 1, 2, 3, and 4 and every 4 weeks thereafter

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT**

- 75 mg every 4 weeks
    1. In NCRx: Add Treat as "Include" Process Modifier, Ignore Misc Handler, number of claims authorization 1, max quantity dispensed 2 with a duration of one month.
        - QL FOR LETTER: Loading dose: 2 mL per 28 days; Maintenance dose: 0.5 mL per 28 days
- 150 mg every 4 weeks
    1. In NCRx: Add Treat as "Include" Process Modifier, Ignore Misc Handler, number of claims authorized 1, max quantity dispensed 4 with a duration of 3 weeks.
    2. In PA Hub: Add OUP, DS, Max Days Supply 56. Start date of this authorization is one-day after loading dose ends.
        - QL FOR LETTER: Loading dose: 4 mL per 28 days; Maintenance dose: 2 mL per 56 days

**RE-AUTHORIZATION CRITERIA:** Cosentyx is configured as a prior authorization for new starts only. Cosentyx will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

none

**For Hidradenitis Suppurativa**
An exception for coverage of Cosentyx may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of moderate to severe hidradenitis suppurativa (HS), defined as Stage II or III on the Hurley staging system* **AND**
- Medical record documentation that Cosentyx is prescribed by a dermatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of at least 3 abscesses or inflammatory nodules **AND**
- Medical record documentation of concomitant use of oral or systemic antibiotics **AND**
- Medical record documentation that the member has received counseling on weight management (if overweight) and smoking cessation (if the member is an active smoker) **AND**
- Medical record documentation that Cosentyx is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent **AND**
- If requesting a dose of 300 mg every 2 weeks, medical record documentation that the member has been compliant with every 4 week administration of Cosentyx **AND**
- If requesting a dose of 300 mg every 2 weeks, medical record documentation of therapeutic failure on every 4 week administration of Cosentyx

***NOTE:** Hurley Staging System

- Stage I: A single lesion without sinus tract formation.
- Stage II: More than one lesion or area, but with limited tunneling.
- Stage III: Multiple lesions, with more extensive sinus tracts and scarring.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT**

- 300 mg every 4 weeks
    1. In PA Hub: Add Treat as “Include” Process Modifier, Ignore Misc Handler, number of claims authorized 1, max quantity dispensed 8 with a duration of one-month.
        - QL FOR LETTER: Loading dose: 8 mL per 28 days; Maintenance dose: 2 mL per 28 days
- 300 mg every 2 weeks
    1. In PA Hub: Add Treat as “Include” Process Modifier, Ignore Misc Handler, max script quantity 4.
        - QL FOR LETTER: 4 mL per 28 days

**RE-AUTHORIZATION CRITERIA:** Cosentyx is configured as a prior authorization for new starts only. Cosentyx will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

**FORMULARY ALTERNATIVES:**

adalimumab-FKJP*, Hadlima*, Yusimry*, Humira*

*prior authorization required

If an exception is made, Cosentyx will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 380.0**

**SECTION: Commercial Drug**
**SUBJECT: Rytary**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Rytary for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Rytary may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of Parkinson's disease, post-encephalitis parkinsonism, **OR** parkinsonism which may follow carbon monoxide intoxication or manganese intoxication **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three (3) formulary alternatives, one of which must be immediate release carbidopa/levodopa

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If an exception is made, Rytary will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

carbidopa/levodopa ODT, carbidopa/levodopa tablet, carbidopa/levodopa ER tablet, carbidopa/levodopa/entacapone, pramipexole, ropinirole, ropinirole ER, bromocriptine, selegiline, amantadine, benztropine, trihexyphenidyl, rasagiline

B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Namzaric may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of moderate to severe Alzheimer's dementia **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of an intolerance to, contraindication to, or therapeutic failure on memantine **AND** donepezil used in combination

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 tablet per day

If an exception is made, Namzaric will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

memantine, donepezil, galantamine, rivastigmine

**POLICY NUMBER: 382.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Corlanor**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Corlanor for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Corlanor may be made for members who meet the following criteria:

- Medical record documentation that Corlanor is prescribed by a cardiologist **AND**
- Medical record documentation of being in sinus rhythm with resting heart rate greater than or equal to the lower limit of the normal range based on age* **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to the maximum tolerated dose of 2 formulary beta-blockers, one of which must be carvedilol **AND**
- Medical record documentation of one of the following:
    - Medical record documentation of age greater than or equal to 18 years **AND**
        - Medical record documentation of stable, symptomatic heart failure with a left ventricular ejection fraction less than or equal to 35% **AND**
        - Medical record documentation of hospitalization for worsening heart failure within the previous 12 months

    **OR**
    - Medical record documentation of age greater than or equal to 6 months and less than 18 years **AND**
        - Medical record documentation of stable, symptomatic heart failure due to dilated cardiomyopathy **AND**
        - Medical record documentation of class II to IV heart failure according to New York Heart Association [NYHA] functional class or Ross classification **AND**
        - Medical record documentation of a left ventricular ejection fraction less than or equal to 45%

**AND**

- If the request is for Corlanor Solution: Documentation of one of the following:
    - Medical record documentation of member weight less than 40 kg **OR**

- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Corlanor tablets **OR**
- Medical record documentation that member has dysphagia or is unable to swallow tablets

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - Tablets: 2 tablets per day
  - Solution: 20 mL per day

***NOTE: Lower limit of normal heart rate based on age**

- Age 6 - 12 months: HR ≥ 105 bpm
- Age 1 - 3 years: HR ≥ 95 bpm
- Age 3 - 5 years: HR ≥ 75 bpm
- Age 5 and older: HR ≥ 70 bpm

If an exception is made, Corlanor will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

carvedilol, metoprolol succinate, bisoprolol

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

An exception for coverage of Natpara may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of hypocalcemia secondary to hypoparathyroidism **AND**
- Medical record documentation that Natpara is prescribed by an endocrinologist **AND**
- Medical record documentation of no increased baseline risk for osteosarcoma **AND**
- Medical record documentation that previous treatment with calcium supplements and active forms of vitamin D were not successful in treated hypocalcemia **AND**
- Medical record documentation that Natpara will be used concurrently with a calcium supplement

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 2 cartridges (1 pack) per 28 days

**AUTHORIZATION DURATION**: Authorization duration will be for a period of 6 months. Reauthorization will require the following criterion be met:

- Medical record documentation that the lowest dose of Natpara is being used to achieve a total serum calcium (albumin-corrected) within the lower half of the normal total serum calcium range (approximately 8.0 to 9.0 mg/dL)

If an exception is made, Natpara will be paid for under the member’s prescription drug benefit.

Geisinger

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 384.0**

**SECTION: Commercial Drug**
**SUBJECT: Lisdexamfetamine**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for lisdexamfetamine for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of lisdexamfetamine may be made for members who meet the following criteria:

**ADHD**

- Medical record documentation of a diagnosis of attention deficit disorder (ADD) or attention deficit hyperactivity disorder (ADHD) **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Metadate CDΩ **AND** amphetamine/dextroamphetamine SR combination

Ω = **From the Metadate CD package insert, "Metadate CD may be swallowed whole with the aid of liquids, or alternately, the capsule may be opened and the capsule contents sprinkled onto a small amount (tablespoon) of applesauce and given immediately, and not stored for future use. Drinking some fluids e.g., water, should follow the intake of the sprinkles with applesauce. The capsules and the capsule contents must not be crushed or chewed."**

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 capsule or chewable tablet per day

**Binge Eating Disorder**

- Medical record documentation of binge eating disorder made by a licensed mental health provider with the number of binge eating episodes per week documented **AND**
- Medical record documentation that member is a non-responder to psychotherapy **OR** member is receiving concurrent psychotherapy

**AUTHORIZATION DURATION**: Authorization will be for a period of six (6) months. Reauthorization will require documentation showing a lower number of binge eating episodes per week compared to baseline.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 capsule or chewable tablet per day

If an exception is made, lisdexamfetamine will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

**SECTION: Commercial Drug**
**SUBJECT: Zubsolv**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Zubsolv for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of Zubsolv may be made for members who meet the following criteria:

- Must be prescribed for the treatment of opioid dependence and the prescriber must have a unique identification number issued by the Drug Enforcement Agency (DEA) certifying prescribing authority for buprenorphine agents **AND**
- Member must be initially referred to and actively involved in formal counseling with a licensed behavioral health provider. Must provide the name of counselor and/or facility or rationale for non-participation **AND**
- For re-authorization member must be adherent to Zubsolv therapy and must not be using opiates. Must be verified by lab screen (dated within 28 days of request date) for opiates and buprenorphine. The presence of controlled substances other than buprenorphine must be addressed **AND**
- Behavioral health vendor and/or plan case managers may contact prescriber, member, or counselor/facility to ensure compliance with these requirements. Continued approval for the drug is dependent on cooperation with this effort **AND**
- Medical record documentation of rationale for why the member cannot use buprenorphine/naloxone SL tablets **AND** buprenorphine/naloxone SL films

**AUTHORIZATION DURATION:** If approved, initial authorization duration will be 3 months. If approved, subsequent authorization duration will be 12 months.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 34 day supply per fill

If a formulary exception is approved Zubsolv will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**
buprenorphine/naloxone sublingual tablets, buprenorphine/naloxone sublingual films

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 386.0**

**SECTION: Commercial Drug**
**SUBJECT: Cresemba Capsules**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Cresemba capsules for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of Cresemba capsules may be made for members who meet the following criteria:

**Treatment of Aspergillosis and Mucormycosis**

- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation that Cresemba is being used for the treatment of invasive aspergillosis **OR** for the treatment of invasive mucormycosis

**Prophylaxis of Aspergillosis and Candida**

- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation that Cresemba is prescribed by an oncologist, hematologist, infectious disease specialist, or transplant service provider **AND**
- Medical record documentation of use for prophylaxis of invasive Aspergillus or Candida infections in patients at high risk of developing these infections due to being severely immunocompromised **AND**
- Medical record documentation that member requires treatment with an anti-cancer medication that interacts with posaconazole

**AUTHORIZATION DURATION:** 3 months. Reauthorization will be based on the following criteria:

- Medical record documentation of a culture and sensitivity showing the isolates are susceptible to Cresemba **AND**
- Medical record documentation that the appropriate dose is being prescribed (2 capsules per day)

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 2 capsules per day

If a formulary exception is approved Cresemba capsules will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

itraconazole*, voriconazole suspension, voriconazole tablets*#

*prior authorization required, #quantity limits apply

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

MANUAL

**POLICY NUMBER: 387.0**

**SECTION: Commercial Drug**
**SUBJECT: Cholbam**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Cholbam for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of Cholbam may be made for members who meet the following criteria:

- Medical record documentation of one of the following:
  - Bile acid synthesis disorders due to single enzyme defects (SEDs) **OR**
  - Peroxisomal disorders (PDs) including Zellweger spectrum disorders in patients who exhibit manifestations of liver disease, steatorrhea, or complications from decreased fat soluble vitamin absorption **AND**
- Medical record documentation that diagnosis has been confirmed with an abnormal urinary bile acid by Fast Atom Bombardment ionization – Mass Spectrometry (FAB-MS) analysis **AND**
- Medical record documentation that Cholbam is prescribed by a gastroenterologist, hepatologist, or metabolic specialist with experience in the diagnosis and treatment of bile acid synthesis and peroxisomal disorders **AND**
- For the treatment of peroxisomal disorders: medical record documentation that Cholbam will be used as adjunctive therapy **AND**
- Medical record documentation of baseline alanine aminotransferase/aspartate aminotransferase (ALT/AST), total bilirubin, and body weight

**AUTHORIZATION DURATION:** Initial approval will be for 3 months or less if the reviewing provider feels it is medically appropriate. Subsequent approvals will be for an additional 12 months or less if the reviewing provider feels it is medically appropriate and will require medical record documentation of a response to therapy, defined as the following:

- Member must meet at least two of the following laboratory criteria **OR** one laboratory criterion and the clinical weight criterion
  - Laboratory Criteria:

- Alanine aminotransferase (ALT) or aspartate aminotransferase (AST) values reduced to less than 50 U/L, or baseline levels reduced by 80%
- Total bilirubin values reduced to less than or equal to 1 mg/dL; and
- No evidence of cholestasis on liver biopsy

- Clinical Criteria
  - Body weight increased by 10% or stable at greater than the 50th percentile; and

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If a formulary exception is approved Cholbam will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**
none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

Geisinger

**POLICY NUMBER: 388.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Rexulti**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Rexulti for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

A formulary exception for coverage of Rexulti may be made for members who meet the following criteria:

**Schizophrenia**

- Medical record documentation of a diagnosis of schizophrenia **AND**
- Medical record documentation of age greater than or equal to 13 years **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to three generic, formulary atypical antipsychotics

**Major Depressive Disorder**

- Medical record documentation of a diagnosis of major depressive disorder (MDD) **AND** medical record documentation that the patient is using Rexulti as adjunctive therapy **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to at least a 4 week trial of combination therapy with aripiprazole and an antidepressant **AND**
- One of the following:
    - Medical record documentation of therapeutic failure on, intolerance to, or contraindication to at least a 4 week trial of combination antidepressant therapy (such as a selective serotonin reuptake inhibitor [SSRI] and bupropion

or a serotonin and norepinephrine reuptake inhibitor [SNRI] and bupropion) OR
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to at least a 4 week trial of an antidepressant with augmentation therapy (including, but not limited to lithium, valproate, carbamazepine and lamotrigine)

**Agitation Associated with Dementia due to Alzheimer's Disease**

- Medical record documentation of a diagnosis of agitation associated with dementia due to Alzheimer's Disease **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three generic, formulary antipsychotics used for the treatment of agitation associated with dementia (such as but not limited to quetiapine, risperidone, olanzapine, etc.) **AND**
- Medical record documentation that Rexulti will not be used "as needed" for this indication

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 tablet per day

If a formulary exception is approved Rexulti will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

**Schizophrenia**: aripiprazole, clozapine, olanzapine, quetiapine, risperidone, ziprasidone, Seroquel XR

**MDD**:

- Selective serotonin reuptake inhibitor (SSRI): citalopram, fluoxetine, paroxetine, sertraline, escitalopram
- Serotonin and norepinephrine reuptake inhibitor (SNRI): duloxetine, venlafaxine, desvenlafaxine
- Bupropion

- Tricyclic Antidepressants: amitriptyline, desipramine, doxepin, imipramine, nortriptyline
- Mirtazapine
- Augmentation Therapy: lithium, valproate, carbamazepine and lamotrigine

**Agitation Associated with Dementia due to Alzheimer's Disease**: aripiprazole, clozapine, olanzapine, quetiapine, risperidone

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY NUMBER: 392.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Praluent**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Praluent for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

6. ***Therapeutic failure to statins, Zetia, fibrates, and/or bile acid sequestrants*** – inability to reach target LDL goals (<100 mg/dL for primary prevention in HeFH or HoFH or <70 mg/dL for ASCVD or secondary prevention in HeFH or HoFH) despite a ≥ 3 month trial with the patient taking ≥ 90% of the prescribed doses.
7. ***Intolerance to statins*** – increased LFT's, intolerable myalgia (muscle symptoms without creatinine kinase [CK] elevations) or myopathy (muscle symptoms with CK elevations), or myositis (elevations in CK without muscle symptoms), which persists after two retrials with a different dose or different dosing strategy (i.e., every other day administration) of alternatives moderate- or high-intensity statin
8. ***Contraindication to statins*** – active liver disease, previous history of rhabdomyolysis, or hypersensitivity

**PROCEDURE:**

A formulary exception for coverage of Praluent may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of:
  - Clinical atherosclerotic cardiovascular disease (ASCVD), including acute coronary syndromes (a history of myocardial infarction or unstable angina), coronary or other arterial revascularization, stroke, transient ischemic attack, or peripheral arterial disease presumed to be of atherosclerotic origin **OR**
  - Primary hyperlipidemia **OR**
  - Heterozygous familial hypercholesterolemia **AND** either:
    - Genetic testing to confirm a mutation in the low-density lipoprotein (LDL) receptor, PCSK9, or ApoB gene **OR**
    - Medical record documentation of definite heterozygous familial hypercholesterolemia (HeFH) (score greater than 8) on the diagnostic criteria scoring system (Table 1) as defined by the Dutch Lipid Clinic Network diagnostic criteria **OR**
  - Homozygous familial hypercholesterolemia (HoFH) **AND** either:

  - Genetic testing to confirm diagnosis showing a mutation in the low-density lipoprotein (LDL) receptor (LDLr) gene, apolipoprotein B (ApoB) gene, proprotein convertase subtilisin/kexin type 9 (PCSK9) gene, or LDL protein receptor adaptor 1 (LDLRAP1) gene **OR**
  - Diagnosis made based on a history of an untreated low-density lipoprotein cholesterol (LDL-C) greater than 500 mg/dL AND either xanthoma before 10 years of age OR evidence of heterozygous familial hypercholesterolemia (HeFH) in both parents **AND**
- Medical record documentation of a baseline low-density lipoprotein (LDL) drawn within 3 months of the start of PCSK9 therapy showing:
  - Low-density lipoprotein (LDL) greater than 100 if the member is using Praluent for primary prevention **OR**
  - Low-density lipoprotein (LDL) greater than 70 if the member is using Praluent for secondary prevention **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation that patient is currently on and is adherent to (taking at least 90% of prescribed doses over the past three months) maximally tolerated dose of atorvastatin or rosuvastatin or has documented therapeutic failure on, intolerance to, or contraindication to atorvastatin and rosuvastatin **AND**
- Medical record documentation that non-pharmacologic therapies are in place including cholesterol lowering diet, exercise, and weight management strategies **AND**
- Medical record documentation of one of the following:
  - Member is currently on and adherent to (taking at least 90% of the prescribed doses over the past three months) ezetimibe in combination with a maximally tolerated dose of a statin and LDL-C remains above goal **OR**
  - Intolerance or contraindication to ezetimibe **OR**
  - Member is currently on and adherent to (taking at least 90% of prescribed doses over the past three months) a maximally tolerated dose of a statin **OR** the patient is statin- intolerant **AND** an LDL-C is more than 20% above goal **AND**
- Medical record documentation that Praluent is not being used in combination with another PCSK9 inhibitor

Adherence calculations must be supported by claims data or physician attestation if no claims history is available (i.e., if the patient is new to the plan or did not use insurance for their statin prescriptions).

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 2 mL per 28 days

**AUTHORIZATION DURATION:** Initial authorizations for Praluent will be approved for a period of 12 months. Reauthorizations will be for a period of 12 months each provided the following criteria are met:

- Medical record documentation of an up to date low density lipoprotein (LDL) cholesterol level since the date of the previous review showing the patient has had a clinically significant response to treatment with a PCSK9 inhibitor **AND**
- Medical record documentation that the patient is not experiencing any significant adverse events related to therapy **AND**
- Claims history and attestation from the provider showing the patient is adherent to PCSK9 therapy **AND**
- Claims history or attestation from the provider that the patient is staying adherent to (filling at least 90% of doses) statin therapy (if statin tolerant) **AND**
- Medical record documentation that Praluent continues to not be used in combination with another PCSK9 inhibitor

Table 1. Diagnostic criteria for the clinical diagnosis of HeFH (WHO)

| | Criteria | Score |
|---|---|---|
| **Family history** | First-degree relative known with premature CAD* and/or first-degree relative with LDL-C >95th percentile | 1 |
| | First-degree relative with Tx and/or children <18 with LDL-C >95th centile | 2 |
| **Clinical history** | Patient has premature CAD* | 2 |
| | Patient has premature cerebral/peripheral vascular disease | 1 |
| **Physical examination** | Tx | 6 |
| | Arcus cornealis below the age of 45 years | 4 |
| **LDL-C** | >8.5 mmol/L (more than ~330 mg/dL) | 8 |
| | 6.5-8.4 mmol/L (~250-329 mg/dL) | 5 |
| | 5.0-6.4 mmol/L (~190-249 mg/dL) | 3 |
| | 4.0-4.9 mmol/L (~155-189 mg/dL) | 1 |

| **Probable FH** | | Score 6-8 |
| **Possible FH** | | Score 3-5 |
| **No diagnosis** | | Score <3 |

If a formulary exception is approved Praluent will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

atorvastatin, rosuvastatin, ezetimibe, colesevelam, cholestyramine, colestipol, fenofibrate, fenofibric acid, gemfibrozil

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Signed: 
Title: Associate Vice President, Managed Care Pharmacy Services

Date: March 1, 2024

Devised: 9/22/15
Revised: 11/18/15 – added bile acid sequestrants (BAS) to therapeutic failure definition, removed rhabdomyolysis from intolerance definition, added lipidologist to prescriber criteria, added within 3 months to baseline LDL criteria, updated failure on statin wording, added max LDL criteria to BAS criteria, clarified concomitant therapy criteria and PCSK9 adherence reauth criteria, added statin adherence to reauth criteria, added "*Prior auth required" wording in formulary alternatives
Reviewed: 3/1/16 – annual review
Revised: 5/1/16 – updated format, logo, & procedure
Revised: 5/27/16 – Updated failure of statin definition, updated intolerance to statins definition, added ASCVD to diagnosis, added PCSK9 and Apo B to HeFH diagnosis, added LDL values to baseline LDL requirement, updated Crestor to rosuvastatin, removed LDL > 70 from statin requirement, updated combination therapy bullet, added fibrate to bile acid sequestrant requirements, added no combination use with PCSK9, Juxtapid, or Kynamro to initial and renewal criteria, updated FA
Revised: 3/1/17 – annual review, removed Unicode, defined abbrev., updated Zetia to ezetimibe

| | |
|---|---|
| Revised: | 6/2/17 – revised statin bullet, removed combo therapy bullet, added if statin toleration to reauth |
| Revised: | 3/1/18 – annual review, updated signature, updated prescriber & age criteria, corrected typo |
| Revised: | 12/28/18 – removed failure of BAS |
| Revised: | 3/1/19 – annual review, added QL approval note, removed GPID approval |
| Revised: | 10/1/19 – extended initial auth duration to 12 months |
| Revised: | 3/1/20 – annual review, added GHP Kids |
| Revised: | 3/1/21 – annual review, updated logo, added MediSpan approval level, updated QL statement, reinserted LOB table |
| Revised: | 6/4/21 – added diag. of primary hyperlipidemia & HoFH, updated baseline LDL requirement, removed references to Kynamro |
| Revised: | 11/24/21 – removed specialist requirement |
| Revised: | 3/1/22 – annual review, updated referenced policies & covered LOBs, updated FA |
| Revised: | 4/6/22 – updated ESC/EAS to Dutch Lipid and HoFH mutations, removed combo with Juxtapid |
| Revised: | 1/1/23 – updated ezetimibe criteria |
| Reviewed: | 3/1/23 – annual review |
| Revised: | 3/1/24 – annual review; updated signature |

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 393.0**

**SECTION: Commercial Drug**
**SUBJECT: Repatha**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Repatha for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

6. ***Therapeutic failure to statins, ezetimibe, fibrates, and/or bile acid sequestrants*** – inability to reach target LDL goals (<100 mg/dL for primary prevention in HeFH or HoFH or <70 mg/dL for ASCVD or secondary prevention in HeFH or HoFH) despite a ≥ 3 month trial with the patient taking ≥ 90% of the prescribed doses.
7. ***Intolerance to statins*** – increased LFT's, intolerable myalgia (muscle symptoms without creatinine kinase [CK] elevations) or myopathy (muscle symptoms with CK elevations), or myositis (elevations in CK without muscle symptoms), which persists after two retrials with a different dose or different dosing strategy (i.e., every other day administration) of alternatives moderate- or high-intensity statin
8. ***Contraindication to statins*** – active liver disease, previous history of rhabdomyolysis, or hypersensitivity

**PROCEDURE:**

A formulary exception for coverage of Repatha may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of:
  - Clinical atherosclerotic cardiovascular disease (ASCVD), including acute coronary syndromes (a history of myocardial infarction or unstable angina), coronary or other arterial revascularization, stroke, transient ischemic attack, or peripheral arterial disease presumed to be of atherosclerotic origin **OR**
  - Primary hyperlipidemia **OR**
  - Heterozygous familial hypercholesterolemia (HeFH) **AND** either:
    - Genetic testing to confirm a mutation in the low-density lipoprotein (LDL) receptor, PCSK9, or ApoB gene **OR**
    - Medical record documentation of definite heterozygous familial hypercholesterolemia (HeFH) (score greater than 8) on the diagnostic criteria scoring system (Table 1) as defined by the Dutch Lipid Clinic Network diagnostic criteria **OR**
  - Homozygous familial hypercholesterolemia (HoFH) **AND** either:

  - Genetic testing to confirm diagnosis showing a mutation in the low-density lipoprotein (LDL) receptor (LDLr) gene, apolipoprotein B (APOB) gene, proprotein convertase subtilisin/kexin type 9 (PCSK9) gene, or LDL protein receptor adaptor 1 (LDLRAP1) gene **OR**
  - Diagnosis made based on a history of an untreated low-density lipoprotein cholesterol (LDL-C) greater than 500 mg/dL **AND** either xanthoma before 10 years of age **OR** evidence of heterozygous familial hypercholesterolemia (HeFH) in both parents **AND**
- Medical record documentation of a baseline low-density lipoprotein (LDL) drawn within 3 months of the start of PCSK9 therapy
  - Low-density lipoprotein (LDL) greater than 130 mg/dL if the member is greater than or equal to 10 years of age and less than 18 years of age **OR**
  - Low-density lipoprotein (LDL) greater than 100 mg/dL if the member is greater than or equal to 18 years of age and using Repatha for primary prevention **OR**
  - Low-density lipoprotein (LDL) greater than 70 mg/dL if the member is using Repatha for secondary prevention **AND**
- Medical record documentation of age greater than or equal to 18 years if the diagnosis is clinical atherosclerotic cardiovascular disease (ASCVD) or heterozygous familial hypercholesterolemia (HeFH) or primary hyperlipidemia **OR** medical record documentation of age greater than or equal to 10 years if the diagnosis is homozygous familial hypercholesterolemia (HoFH) **AND**
- Medical record documentation that patient is currently on and is adherent to (taking at least 90% of prescribed doses over the past three months) maximally tolerated dose of atorvastatin or rosuvastatin or has documented therapeutic failure on, intolerance to, or contraindication to atorvastatin and rosuvastatin **AND**
- Medical record documentation that non-pharmacologic therapies are in place including cholesterol lowering diet, exercise, and weight management strategies **AND**
- Medical record documentation of one of the following:
  - Member is currently on and adherent to (taking at least 90% of the prescribed doses over the past three months) ezetimibe in combination with a maximally tolerated dose of a statin and LDL-C remains above goal **OR**
  - Intolerance or contraindication to ezetimibe **OR**
  - Member is currently on and adherent to (taking at least 90% of prescribed doses over the past three months) a maximally tolerated dose of a statin **OR** the patient is statin- intolerant **AND** an LDL-C is more than 20% above goal **AND**
- Medical record documentation that Repatha is not being used in combination with another PCSK9 inhibitor **AND**
- If requesting Repatha Syringe or Repatha Sureclick 420 mg dose (3 mL), medical record documentation of therapeutic failure on, intolerance to, or contraindication to Repatha Pushtronex **OR**

- If requesting 420 mg every 2 weeks:
  - Medical record documentation of a diagnosis of Homozygous Familial Hypercholesterolemia (HoFH) **AND**
  - One of the following:
    - Medical record documentation that the member has been on 420 mg once monthly for 12 weeks and a clinically meaningful response has not been achieved **OR**
    - Medical record documentation that the member is on lipid apheresis every 2 weeks

Adherence calculations must be supported by claims data or physician attestation if no claims history is available (i.e., if the patient is new to the plan or did not use insurance for their statin prescriptions).

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - Pen/Syringe: 2 mL per 28 days
  - Pushtronex: 3.5 mL per 28 days

**AUTHORIZATION DURATION:** Initial authorizations for Repatha will be approved for a period of 12 months. Reauthorizations will be for a period of 12 months each provided the following criteria are met:

- Medical record documentation of an up to date low density lipoprotein (LDL) cholesterol level since the date of the previous review showing the patient has had a clinically significant response to treatment with a PCSK9 inhibitor **AND**
- Medical record documentation that the patient is not experiencing any significant adverse events related to therapy **AND**
- Claims history and attestation from the provider showing the patient is adherent to PCSK9 therapy **AND**
- Claims history or attestation from the provider that the patient is staying adherent to (filling at least 90% of doses) statin therapy (if statin tolerant) **AND**
- Medical record documentation that Repatha continues to not be used in combination with another PCSK9 inhibitor **AND**
- If requesting Repatha Syringe or Repatha Sureclick 420 mg dose (3 mL), medical record documentation of therapeutic failure on, intolerance to, or contraindication to Repatha Pushtronex **OR**

- If requesting 420 mg every 2 weeks:
  - Medical record documentation of a diagnosis of Homozygous Familial Hypercholesterolemia (HoFH) **AND**
  - One of the following:
    - Medical record documentation that the member has been on 420 mg once monthly for 12 weeks and a clinically meaningful response has not been achieved **OR**
    - Medical record documentation that the member is on lipid apheresis every 2 weeks

Table 1. Diagnostic criteria for the clinical diagnosis of HeFH (WHO)

| | Criteria | Score |
|---|---|---|
| **Family history** | First-degree relative known with premature CAD* and/or first-degree relative with LDL-C >95th percentile | 1 |
| | First-degree relative with Tx and/or children <18 with LDL-C >95th centile | 2 |
| **Clinical history** | Patient has premature CAD* | 2 |
| | Patient has premature cerebral/peripheral vascular disease | 1 |
| **Physical examination** | Tx | 6 |
| | Arcus cornealis below the age of 45 years | 4 |
| **LDL-C** | >8.5 mmol/L (more than ~330 mg/dL) | 8 |
| | 6.5-8.4 mmol/L (~250-329 mg/dL) | 5 |
| | 5.0-6.4 mmol/L (~190-249 mg/dL) | 3 |
| | 4.0-4.9 mmol/L (~155-189 mg/dL) | 1 |
| **Definite FH** | | Score >8 |
| **Probable FH** | | Score 6-8 |
| **Possible FH** | | Score 3-5 |
| **No diagnosis** | | Score <3 |

If a formulary exception is approved Repatha will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

atorvastatin, rosuvastatin, ezetimibe, colesevelam, cholestyramine, colestipol, fenofibrate, fenofibric acid, gemfibrozil

**SECTION: Commercial Drug**
**SUBJECT: Glatopa**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Glatopa for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

A formulary exception for coverage of Glatopa may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of relapsing forms of multiple sclerosis **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to glatiramer acetate 20 mg/mL

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14 (must enter 6240003010E520 & 6240003010E540)

If a formulary exception is approved Glatopa will be paid for under the member's prescription drug benefit

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

glatiramer acetate, fingolimod 0.5 mg, Gilenya 0.25 mg, dimethyl fumarate, Betaseron, Plegridy, Extavia, teriflunomide 14 mg, Avonex, Rebif, Mayzent

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of Orkambi may be made for members who meet the following criteria:

- Medical record documentation that Orkambi is prescribed by a pulmonologist or cystic fibrosis specialist **AND**
- Medical record documentation of patient age greater than or equal to 1 year **AND**
- Medical record documentation of a diagnosis of cystic fibrosis (CF) **AND**
- Medical record documentation that the member is homozygous for the *F508del* CFTR (cystic fibrosis transmembrane conductance regulator) mutation as documentation by a Food and Drug Administration (FDA)-cleared cystic fibrosis (CF) mutation test

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 4 tablets per day, 30 day supply per fill
  - 2 packets per day, 28 day supply per fill

**AUTHORIZATION DURATION**: Initial approval will be for four (4) months and subsequent approvals will be for twelve (12) months. Additional authorizations will require medical record documentation of improvement or stabilization in the signs and symptoms of cystic fibrosis. The medication will no longer be covered if the member experiences worsening of disease.

If a formulary exception is approved Orkambi will be paid for under the member's prescription drug benefit.

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Lonsurf for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

A formulary exception for coverage of Lonsurf may be made for members who meet the following criteria:

**Metastatic Colorectal Cancer**

- Medical record documentation that Lonsurf is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of metastatic colorectal cancer **AND**
- Medical record documentation of previous treatment with fluoropyrimidine-, oxaliplatin-, and irinotecan-based chemotherapy, an anti-VEGF (vascular endothelial growth factor) biological therapy, and if RAS wild-type, an anti-EGFR (epidermal growth factor receptor) therapy **AND**
- Medical record documentation that Lonsurf will be prescribed as a single agent or in combination with bevacizumab

**Metastatic Gastric or Gastroesophageal Junction Adenocarcinoma**

- Medical record documentation that Lonsurf is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of metastatic gastric or gastroesophageal junction adenocarcinoma **AND**

- Medical record documentation of previous treatment with at least two prior lines of chemotherapy that included a fluoropyrimidine, a platinum, either a taxane or irinotecan and if appropriate, HER2/neu-targeted therapy

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 15 mg/6.14 mg tablet: 100 tablets per 28 days
  - 20 mg/8.19 mg tablet: 80 tablets per 28 days

**RE-AUTHORIZATION CRITERIA:** Lonsurf is configured as a prior authorization for new starts only. Lonsurf will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If a formulary exception is approved Lonsurf will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

capecitabine, Stivarga*

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 402.0**

**SECTION: Commercial Drug**
**SUBJECT: Keveyis**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Keveyis for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of Keveyis may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of primary hyperkalemic periodic paralysis, primary hypokalemic periodic paralysis, or related variants **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation that patient's condition was diagnosed by a neurologist with neuromuscular expertise **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to acetazolamide **AND**
- **For hypokalemic periodic paralysis only**: Medical record documentation of therapeutic failure on, intolerance to, or contraindication to spironolactone

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 4 tablets per day, 34 day supply per fill

If a formulary exception is approved Keveyis will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 403.0**

**SECTION: Commercial Drug**
**SUBJECT: Ninlaro**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Ninlaro for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

A formulary exception for coverage of Ninlaro may be made for members who meet the following criteria:

- Medical record documentation that Ninlaro is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of a diagnosis of multiple myeloma **AND**
- Medical record documentation that Ninlaro will be used in combination with Revlimid* and dexamethasone **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to at least one prior therapy

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 3 capsules per 28 days

**RE-AUTHORIZATION CRITERIA:** Ninlaro is configured as a prior authorization for new starts only. Ninlaro will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If a formulary exception is approved Ninlaro will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Thalomid, Farydak*, Pomalyst*, Revlimid*

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**SECTION: Commercial Drug**
**SUBJECT: Tagrisso**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Tagrisso for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

A formulary exception for coverage of Tagrisso may be made for members who meet the following criteria:

**Metastatic Non-Small Cell Lung Cancer (NSCLC)**

- Medical record documentation that Tagrisso is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of metastatic non-small cell lung cancer (NSCLC) **AND**
- Medical record documentation of an epidermal growth factor receptor (EGFR) exon 19 deletion, EGFR exon 21L858R mutation, or EGFR T790 mutation **AND**
- Medical record documentation of one of the following:
  - If member has epidermal growth factor receptor (EGFR) exon 19 deletion or exon 21 L858R mutation: Medical record documentation that Tagrisso is being used as first-line treatment **OR**
  - If member has epidermal growth factor receptor (EGFR) T790 mutation positive disease: Medical record documentation of failure on or intolerance to prior tyrosine kinase inhibitor therapy with Iressa (gefitinib), Gilotrif (afatinib), or Tarceva (erlotinib)

**METASTATIC NSCLC AUTHORIZATION DURATION**: Initial approval will be for 12 months or less if the reviewing provider feels it is medically appropriate. Subsequent approvals will be for an additional 12 months or less if the reviewing provider feels it is medically appropriate and will require medical record documentation of continued disease

improvement or lack of disease progression. The medication will no longer be covered if the member experiences unacceptable toxicity or worsening of disease.

**Adjuvant Treatment of Non-Small Cell Lung Cancer (NSCLC)**

- Medical record documentation that Tagrisso is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of non-small cell lung cancer (NSCLC) **AND**
- Medical record documentation that Tagrisso is being used as adjuvant treatment following complete tumor resection **AND**
- Medical record documentation that tumors have an epidermal growth factor receptor (EGFR) exon 19 deletion or exon 21 L858R mutation

**ADJUVANT TREATMENT OF NSCLC AUTHORIZATION DURATION:** Initial approval will be for **12 months**. **Up to two (2)** subsequent approvals will each be for an additional 12 months or less if the reviewing provider feels it is medically appropriate to equal **a total treatment duration of 3 years** and will require medical record documentation of continued disease improvement or lack of disease progression. The medication will no longer be covered if the member experiences unacceptable toxicity or worsening of disease.

Authorization of Tagrisso for adjuvant treatment of Non-Small Cell Lung Cancer (NSCLC) will not exceed the FDA-approved treatment duration of 3 years (36 months). For requests exceeding the above limit, documentation will be required of peer-reviewed literature citing well-designed clinical trials to indicate that the member's healthcare outcome will be improved by dosing beyond the FDA-approved treatment duration.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 tablet per day, 30 day supply per fill

If a formulary exception is approved Tagrisso will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

| 14-15 years | 130 | 55 |
| 16-19 years | 60 | 40 |
| >20 years | 40 | 40 |

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 30 day supply per fill

**AUTHORIZATION DURATION**: Initial approval will be for a period of 3 months or less if the reviewing provider feels it is medically appropriate. Subsequent approvals will be for an additional 12 months or less if the reviewing provider feels it is medically appropriate and will require medical record documentation of continued disease improvement or lack of disease progression.

**NOTE:**

- Perinatal/Infantile-Onset HPP
  - Recommended dosage regimen is 2 mg/kg administered subcutaneously three times per week, or 1 mg/kg administered six times per week. Injection site reactions may limit the tolerability of the six times per week regimen.
  - The dose may be increased to 3 mg/kg three times per week for insufficient efficacy.
- Juvenile-Onset HPP
  - Recommended dosage regimen is 2 mg/kg administered subcutaneously three times per week, or 1 mg/kg administered six times per week. Injection site reactions may limit the tolerability of the six times per week regimen.

If a formulary exception is approved Strensiq will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

Geisinger Health Plan

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 413.0**

**SECTION: Commercial Drug**
**SUBJECT: Buprenorphine Buccal Film**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for buprenorphine buccal films for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).

4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:
   A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
   B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
   C. In accordance with current standards of medical practice;
   D. Not primarily for the convenience of the Member, or the Member's Provider; and
   E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of buprenorphine buccal film may be made for members who meet the following criteria:

- Medical record documentation that buprenorphine buccal films are prescribed by a pain management specialist **AND**
- Medical record documentation of pain severe enough to require daily, around-the-clock, long-term opioid treatment and for which alternative treatment options are inadequate **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to 3 formulary alternatives, one of which must be morphine sulfate ER

**QUANTITY LIMIT:** 2 films per day

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If a formulary exception is approved buprenorphine buccal film will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

A formulary exception for coverage of Vraylar may be made for members who meet the following criteria:

**Schizophrenia or Manic/Mixed Episode associated with Bipolar I Disorder**

- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation that Vraylar is being used for:
  - Schizophrenia **OR**
  - Acute treatment of manic or mixed episodes associated with bipolar I disorder **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to three (3) generic, formulary atypical antipsychotics

**Bipolar Depression**

- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation that Vraylar is being used for the treatment of depressive episodes associated with bipolar I disorder (bipolar depression) **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to quetiapine

**Major Depressive Disorder**

- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of major depressive disorder (MDD) **AND**
- Medical record documentation that the patient is using Vraylar as adjunctive therapy **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to at least a 4-week trial of combination therapy with aripiprazole and an antidepressant **AND**
- Medical record documentation of one of the following:
    - Medical record documentation of therapeutic failure on, intolerance to, or contraindication to at least a 4-week trial of combination antidepressant therapy (such as a selective serotonin reuptake inhibitor [SSRI] and bupropion or a serotonin and norepinephrine reuptake inhibitor [SNRI] and bupropion) **OR**
    - Medical record documentation of therapeutic failure on, intolerance to, or contraindication to at least a 4-week trial of an antidepressant with augmentation therapy (including, but not limited to lithium, valproate, carbamazepine, and lamotrigine)

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 capsule per day

If a formulary exception is approved Vraylar will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Schizophrenia or Manic/Mixed Episode associated with Bipolar I Disorder: aripiprazole, clozapine, olanzapine, paliperidone*, quetiapine, risperidone, ziprasidone

Bipolar Depression: quetiapine, olanzapine/fluoxetine

Major Depressive Disorder:
Selective serotonin reuptake inhibitor (SSRI): citalopram, fluoxetine, paroxetine, sertraline, escitalopram
Serotonin and norepinephrine reuptake inhibitor (SNRI): duloxetine, venlafaxine, desvenlafaxine
Bupropion
Tricyclic Antidepressants: amitriptyline, desipramine, doxepin, imipramine, nortriptyline
Mirtazapine
Augmentation Therapy: lithium, valproate, carbamazepine and lamotrigine

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Venclexta for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

A formulary exception for coverage of Venclexta may be made for members who meet the following criteria:

**CLL or SLL**

- Medical record documentation that Venclexta is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of chronic lymphocytic leukemia (CLL) or small lymphocytic lymphoma (SLL)

**AML**

- Medical record documentation that Venclexta is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of age 75 years or older **OR** medical record documentation of a comorbidity that precludes member from receiving intensive induction chemotherapy **AND**
- Medical record documentation of newly-diagnosed acute myeloid leukemia (AML) **AND**
- Medical record documentation that Venclexta will be used in combination with azacytidine, decitabine, or low-dose cytarabine

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 10 mg tablet: 2 tablets per day, 30 day supply per fill
  - 50 mg tablet: 1 tablet per day, 30 day supply per fill
  - 100 mg tablet, 6 tablets per day, 30 day supply per fill
  - Starter Pack: 42 tablets per 28 days

**RE-AUTHORIZATION CRITERIA:** Venclexta is configured as a prior authorization for new starts only. Venclexta will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If a formulary exception is approved Venclexta will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

CLL/SLL: Imbruvica*, Calquence*, Zydelig*

AML: Daurismo*, Tibsovo*, Idhifa*

*prior authorization required

**SECTION: Commercial Drug**
**SUBJECT: Uptravi**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Uptravi for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of Uptravi may be made for members who meet the following criteria:

- Medical record documentation that Uptravi is prescribed by a cardiologist or pulmonologist **AND**
- Medical record documentation of a diagnosis of World Health Organization (WHO) Group I, functional class II or III pulmonary hypertension **AND**
- Medical record documentation of use in combination with, or failure on, intolerance to, or contraindication to sildenafil and/or an endothelin receptor antagonist (Tracleer [bosentan], Letairis [ambrisentan], or Opsumit [macitentan])

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - Uptravi 200 mcg tablets: 140 tablets per 28 days
  - Uptravi 200-800 mcg tablet starter pack: 200 tablets per 28 days, one (1) fill per 180 days
  - All other strengths: 2 tablets per day, 30 day supply per fill

If a formulary exception is approved Uptravi will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Zepatier for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

6. ***HBV*** – Hepatitis B Virus
7. ***HCV*** – Hepatitis C Virus
8. ***HIV*** – Human Immunodeficiency Virus

**PROCEDURE:**

A formulary exception for coverage of Zepatier may be made for members who meet the following criteria:

- Medical record documentation of age greater than or equal to 12 years of age **OR** weighing at least 30 kilograms **AND**
- Medical record documentation of a diagnosis of hepatitis C infection **AND**
- Medical record documentation of the member's hepatitis C genotype **AND**
- Medical record documentation of a diagnosis of hepatitis C virus (HCV) genotype 1 or 4 infection **AND**
- Medical record documentation of METAVIR liver scoring **AND**
- Medical record documentation of a hepatocellular carcinoma screening in those with cirrhosis (METAVIR score F4) **AND**
- Medical record documentation that the member does not have moderate or severe hepatic impairment (Child-Pugh B or C) **AND**
- Medical record documentation of the member receiving a Food and Drug Administration (FDA) approved medication regimen that is inside the parameters of use approved by the FDA or supported in the widely used compendia available **AND**
- Medical record documentation of appropriate duration of treatment **AND**
- Medical record documentation of previous treatment and treatment response **AND**
- Medical record documentation of any potential drug interactions addressed by the prescriber (such as discontinuation of the interacting drug, dose reduction of the interacting drug, or counseling of the recipient of the risks associated with the use of both medications when they interact) **AND**
- Medical record documentation of receiving the following within the past 6 months:
    - Hepatic function panel

  - Complete blood count including differential
  - Basic metabolic panel **AND**
- Medical record documentation of receiving the following within a reasonable timeframe:
  - Baseline hepatitis C virus (HCV) RNA viral load **AND**
- Medical record documentation of concurrent therapy with appropriate dose and duration of ribavirin **AND**
- Medical record documentation of a negative pregnancy test if member is female of childbearing potential and receiving ribavirin **AND**
- When concurrent ribavirin therapy is indicated and prescribed, medical record documentation for male members that female partner is not pregnant **AND**
- If the member or their partner are of childbearing potential, medical record documentation that the member was instructed to practice effective contraception during therapy with ribavirin and for 6 months following discontinuation of ribavirin therapy **AND**
- If actively abusing alcohol or intravenous (IV) drugs, or has a history of abuse, has documentation of prescriber counseling regarding the risks of alcohol or IV drug abuse, and an offer of a referral for substance use disorder treatment **AND**
- Medical record documentation that member received pre-treatment readiness education about hepatitis C treatment expectations by a health care provider **AND**
- Medical record documentation that the member commits to the documented planned course of treatment including anticipated blood tests and visits, during and after treatment **AND**
- Medical record documentation that member does not have a limited life expectancy of less than 12 months due to non-liver related co-morbid conditions **AND**
- Medical record documentation of completed:
  - Hepatitis B immunization series **OR**
  - Hepatitis B screening (sAb/sAg and cAb/cAg) **AND** Quantitative hepatitis B virus (HBV) DNA if positive for hepatitis B sAg or cAb or cAg **AND**
    - If there is detectable hepatitis B virus (HBV) DNA, will be treated for Hepatitis B **OR**
    - If negative for hepatitis B sAb, is being vaccinated against Hepatitis B **AND**
- Medical record documentation of human immunodeficiency virus (HIV) screening (HIV Ag/Ab) and if confirmed positive by HIV-1/HIV-2 differentiation immunoassay:
  - Is being treated for human immunodeficiency virus (HIV) **OR**
  - If not being treated for human immunodeficiency virus (HIV), the medical record documents the rationale for the beneficiary not being treated **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Mavyret, if clinically appropriate **AND**

- Medical record documentation that member has been evaluated and treated by a contracted Center of Excellence in hepatitis C management

**OR**

- Medical record documentation of a hepatitis C negative recipient receiving a transplant from a hepatitis C positive donor **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Mavyret, if clinically appropriate

**NOTES:**

1. Center of Excellence (COE) requirements do not apply to strategic partner TPA plans (i.e., Northern Light Health).
2. Guidelines can be referenced at www.hcvguidelines.org.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 tablet per day, 28 day supply per fill

**AUTHORIZATION DURATION**: Per AASLD/IDSA guidelines

**APPROVAL LANGUAGE:** Meets criteria, auth x (?) weeks, RX count= (?), (28 day supply/fill), generic only [when applicable]. QL: 1 tab/day (QL for LETTER only)

If a formulary exception is approved Zepatier will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Cabometyx for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

A formulary exception for coverage of Cabometyx may be made for members who meet the following criteria:

**Renal Cell Carcinoma**

- Medical record documentation that Cabometyx is prescribed by an oncologist **AND**
- Medical record documentation of use in combination with nivolumab (Opdivo) for previously untreated advanced renal cell carcinoma **OR**
- Medical record documentation of use as a single agent for relapse or for surgically unresectable advanced or metastatic renal cell carcinoma **AND**
- If the requested dose is 80 mg daily: Medical record documentation that the patient is using Cabometyx in combination with a strong CYP3A4 inducer, including but not limited to, rifampin, phenytoin, carbamazepine, phenobarbital, rifabutin, rifapentine, and St. John's Wort

**Hepatocellular Carcinoma**

- Medical record documentation that Cabometyx is prescribed by an oncologist **AND**
- Medical record documentation of a diagnosis of hepatocellular carcinoma (HCC) **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to sorafenib (Nexavar) **AND**
- If the requested dose is 80 mg daily: Medical record documentation that the patient is using Cabometyx in combination with a strong CYP3A4 inducer, including but not

limited to, rifampin, phenytoin, carbamazepine, phenobarbital, rifabutin, rifapentine, and St. John's Wort

**Differentiated Thyroid Cancer (DTC)**

- Medical record documentation that Cabometyx is prescribed by a hematologist or oncologist **AND**
- Medical record documentation of age greater than or equal to 12 years **AND**
- Medical record documentation of locally advanced or metastatic differentiated thyroid cancer (DTC) **AND**
- Medical record documentation of progression following prior VEGFR-targeted therapy **AND**
- Medical record documentation that radioactive iodine-refractory or ineligible

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - If approved for 20 mg, 40 mg, or 60 mg daily dose: QL 1 per day, 30 day supply per fill
  - If approved for 80 mg daily, dosed as one 20 mg + one 60 mg tablet: QL 1 per day, 30 day supply per fill
  - If approved for 80 mg daily, dosed as two 40 mg tablets daily: QL 2 per day, 30 day supply per fill

**RE-AUTHORIZATION CRITERIA:** Cabometyx is configured as a prior authorization for new starts only. Cabometyx will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If a formulary exception is approved Cabometyx will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

Geisinger

**POLICY NUMBER: 421.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Nuplazid**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Nuplazid for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

A formulary exception for coverage of Nuplazid may be made for members who meet the following criteria:

- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of diagnosis of Parkinson's disease psychosis (defined by illusions, a false sense of presence, hallucinations, or delusions) **AND**
- Medical record documentation that the diagnosis is established by or in consultation with a neurologist **AND**
- Medical record documentation that the psychosis is not due to other conditions (which may include, but are not limited to, another mental disorder or physiological effects of a substance)

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 per day, 30 day supply per fill

**AUTHORIZATION DURATION**: Approval will be given for an initial duration of three (3) months. For continuation of coverage, medical record documentation of clinical improvement or lack of progression in signs and symptoms of Parkinson's disease psychosis on three (3) months of Nuplazid therapy is required.

After the initial three (3) month approval, subsequent approvals for coverage will be for a duration of one (1) year. Reevaluation of coverage will be every one (1) year requiring medical record documentation of continued or sustained improvement in the signs and symptoms of Parkinson's disease psychosis while on Nuplazid therapy.

If a formulary exception is approved Nuplazid will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

none

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Briviact for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

A formulary exception for coverage of Briviact may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of partial-onset seizures **AND**
- Medical record documentation of age greater than or equal to 1 month **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to at least three formulary alternatives, one of which must be levetiracetam **AND**
- Medical record documentation that Briviact is not being used in combination with levetiracetam

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 2 tablets per day or 20 mL per day of oral solution

If a formulary exception is approved Briviact will be paid for under the member's prescription drug benefit.

| Geisinger | POLICY NUMBER: 422.0 |
|---|---|
| POLICY AND PROCEDURE<br>**PHARMACY**<br>MANUAL | SECTION: Commercial Drug<br>SUBJECT: Briviact |

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Patients > 1 month of age: carbamazepine, levetiracetam solution, phenobarbital, phenytoin, pregabalin

Patients > 6 months of age: levetiracetam IR

Patients > 2 years of age: lamotrigine IR, oxcarbazepine, topiramate IR, topiramate ER*

Patients > 3 years of age: gabapentin

Patients > 4 years of age: Aptiom*, lacosamide*

Additional formulary alternatives for patients over certain ages: divalproex (10+), levetiracetam ER (12+), tiagabine (12+), Fycompa* (12+), lamotrigine ER (13+), felbamate (14+), and zonisamide (16+)

*prior authorization required

4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

A formulary exception for coverage of amphetamine tablets (generic Evekeo) or Evekeo ODT may be made for members who meet the following criteria:

**Attention Deficit Hyperactivity Disorder (ADHD) (amphetamine tablets (generic Evekeo) & Evekeo ODT)**

- Medical record documentation of a diagnosis of attention deficit hyperactivity disorder (ADHD) **AND**
- Medical record documentation of age greater than or equal to 3 years **AND**
- **For members greater than or equal to 6 years of age:** Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to three of the following formulary alternatives: dexmethylphenidate immediate release, dextroamphetamine immediate release, dextroamphetamine/amphetamine immediate release, or methylphenidate immediate release
- **For members greater than or equal to 3 years of age:** Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to dextroamphetamine immediate release **AND** dextroamphetamine/amphetamine immediate release

**Narcolepsy (amphetamine tablets (generic Evekeo) Only)**

- Prescription written for Evekeo **AND**
- Medical record documentation of a diagnosis of narcolepsy **AND**
- Medical record documentation of age greater than or equal to 12 years **AND**

- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to dextroamphetamine immediate release, dextroamphetamine/amphetamine immediate release **AND** methylphenidate immediate release

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, if request is for amphetamine tablets (generic Evekeo) add generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - Evekeo ODT 2.5 mg tablet: 2 tablets per day
  - Evekeo ODT 5 mg tablet: 2 tablets per day
  - Evekeo ODT 10 mg tablet: 2 tablets per day
  - Evekeo ODT 15 mg tablet: 2 tablets per day
  - Evekeo ODT 20 mg tablet: 2 tablets per day
  - Amphetamine tablets (generic Evekeo) 5 mg tablet: 3 tablets per day
  - Amphetamine tablets (generic Evekeo) 10 mg tablet: 6 tablets per day

If a formulary exception is approved amphetamine tablets (generic Evekeo) or Evekeo ODT will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

ADHD:

- **For members greater than or equal to 6 years of age:** dexmethylphenidate immediate release, dextroamphetamine immediate release, dextroamphetamine/amphetamine immediate release, methylphenidate immediate release, atomoxetine, guanfacine extended release
- **For members greater than or equal to 3 years of age:** dextroamphetamine immediate release, dextroamphetamine/amphetamine immediate release

Narcolepsy:

dextroamphetamine immediate release, dextroamphetamine/amphetamine immediate release, methylphenidate immediate release

E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of Impavido may be made for members who meet the following criteria:

- Medical record documentation of age greater than or equal to 12 years **AND**
- Medical record documentation that the patient weighs at least 30 kg **AND**
- Medical record documentation that Impavido is prescribed by a board-certified infectious disease specialist **AND**
- Medical record documentation of one of the following, confirmed by testing:
    - Visceral leishmaniasis caused by *L. donovani*
    - Cutaneous leishmaniasis caused by *L. braziliensis* **OR** *L. guyanensis* **OR** *L. panamensis*
    - Mucosal leishmaniasis caused by *L. braziliensis* **AND**
- Medical record documentation of a negative pregnancy test for women of childbearing age **AND**
- Medical record documentation member has been counseled on use of contraception during therapy and for 5 months after **AND**
- Medical record documentation of no history of Sjögren-Larsson-Syndrome **AND**
- If diagnosis is visceral leishmaniasis, medical record documentation of therapeutic failure on, intolerance to or contraindication to Liposomal Amphotericin B

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *QL must be entered within authorization.*

- One-time fill for the following based on weight:
    - **30-44 kg**: 56 capsules per 28 days
    - **45 kg or greater**: 84 capsules per 28 days

**AUTHORIZATION DURATION:** one (1) month

If a formulary exception is approved Impavido will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

ketoconazole, fluconazole, itraconazole*, Nebupent

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 431.0**

**SECTION: Commercial Drug**
**SUBJECT: Taltz**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Taltz for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**
New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

**For treatment of plaque psoriasis**
A formulary exception for coverage of Taltz may be made for members who meet the following criteria:

- Medical record documentation that Taltz is prescribed by a dermatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of moderate to severe plaque psoriasis characterized by greater than 5% of body surface area involved or disease involving crucial body areas such as the hands, feet, face, or genitals **AND**
- Medical record documentation of an intolerance to, contraindication to, or therapeutic failure on a minimum 3 month trial of four (4) preferred formulary biologics for the treatment of psoriasis **AND**
- Medical record documentation that Taltz is not being used concurrently with a tumor necrosis factor TNF blocker or other biologic agent

**AUTHORIZATION DURATION:** Approval will be given for a duration of twelve (12) months. For continuation of coverage, medical record documentation of clinical improvement or lack of progression in signs and symptoms of plaque psoriasis on Taltz therapy is required.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT:** *QLs must be entered within the authorization.*

- 160 mg once, followed by 80 mg at weeks 2, 4, 6, 8, 10, and 12; then 80 mg every 4 weeks
    1. In PA Hub: Add Treat as "Include" Process Modifier, Ignore Misc Handler, enter 3 in max number of claims authorized with a duration of 3 months
        - QL FOR LETTER: Loading dose: 8 mL per 3 months; Maintenance dose: 1 mL per 28 days

**FORMULARY ALTERNATIVES:**

Enbrel*, Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Otezla*, Skyrizi*, Tremfya*, Cosentyx*, Cimzia*, Siliq*

*prior authorization required

**For treatment of pediatric plaque psoriasis**
A formulary exception for coverage of Taltz may be made for members who meet the following criteria:

- Medical record documentation that Taltz is prescribed by a dermatologist **AND**
- Medical record documentation of age greater than or equal to 6 years **AND**
- Medical record documentation that the prescribed dosage is appropriate for the member's weight **AND**
- Medical record documentation of a diagnosis of moderate to severe plaque psoriasis characterized by greater than 5% of body surface area involved or disease involving crucial body areas such as the hands, feet, face, or genitals **AND**
- Medical record documentation of an intolerance to, contraindication to, or therapeutic failure on at least two (2) topical corticosteroids **AND**
- Medical record documentation that Taltz is not being used concurrently with a tumor necrosis factor TNF blocker or other biologic agent

**AUTHORIZATION DURATION:** Approval will be given for a duration of twelve (12) months. For continuation of coverage, medical record documentation of clinical improvement or lack of progression in signs and symptoms of pediatric plaque psoriasis on Taltz therapy is required.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT:** *QLs must be entered within the authorization.*

- 160 mg once, followed by 80 mg every 4 weeks
    1. In PA Hub: Add Treat as "Include" Process Modifier, Ignore Misc Handler, max quantity dispensed 2, max number of claims authorized 1, with a duration of 1 month
        - QL FOR LETTER: Loading dose: 2 mL per 28 days; Maintenance dose: 1 mL per 28 days

**FORMULARY ALTERNATIVES:**

**Low-potency topical corticosteroids:** alclometasone dipropionate 0.5% cream and ointment (Aclovate); desonide 0.05% cream, ointment and lotion (Desowen); fluocinolone acetonide 0.01% cream, solution, body and scalp oil (Synalar/Derma-Smoothe); hydrocortisone 1% and 2.5% cream, ointment, and lotion (Hytone)

**Medium-potency topical corticosteroids:** betamethasone valerate 0.1% cream and lotion (Valisone); fluocinolone acetonide 0.025% cream and ointment (Synalar); flurandrenolide 0.05% cream, ointment, and lotion (Cordran); fluticasone propionate 0.05% cream and lotion (Cutivate); hydrocortisone butyrate 0.1% cream, ointment and solution (Locoid); hydrocortisone valerate 0.2% cream and ointment (Westcort); mometasone 0.1% cream (Elocon); prednicarbate 0.1% cream and ointment (DermAtop); triamcinolone acetonide 0.025% cream, ointment and lotion (Kenalog); triamcinolone 0.1% cream, ointment and lotion (Kenalog); triamcinolone acetonide 0.147 mg/g aerosol (Kenalog Spray)

**High-potency topical corticosteroids:** amcinonide 0.1% cream, ointment and lotion (Cyclocort); augmented betamethasone dipropionate 0.05% cream (Diprolene AF); betamethasone dipropionate 0.05% cream, ointment and lotion (Diprolene); betamethasone valerate 0.1% ointment (Valisone); betamethasone valerate 0.12% foam (Luxiq); desoximetasone 0.25% cream, ointment and 0.05% cream, gel, ointment (Topicort/Topicort LP); ); diflorasone 0.05% cream (Florone/Psorcon); fluocinonide 0.05% cream, ointment, gel and solution (Lidex); fluticasone 0.005% ointment (Cutivate); mometasone 0.1% ointment (Elocon); triamcinolone 0.5% cream and ointment (Kenalog)

**Very high-potency topical corticosteroids:** augmented betamethasone dipropionate 0.05% ointment, gel and lotion (Diprolene); clobetasol 0.05% cream, ointment, scalp lotion, shampoo, foam, spray (Temovate/Clobex/Olux) diflorasone diacetate 0.05% ointment (ApexiCon/Psorcon E), fluocinonide 0.1% cream (Vanos), halobetasol 0.05% cream and ointment (Ultravate)

**For treatment of psoriatic arthritis**
A formulary exception for coverage of Taltz may be made for members who meet the following criteria:

- Medical record documentation that Taltz is prescribed by a dermatologist or rheumatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of moderately to severely active psoriatic arthritis which must include documentation of either active psoriatic lesions or a documented history of psoriasis **AND**
- Medical record documentation of an intolerance to, contraindication to, or therapeutic failure on a minimum 3 month trial of three (3) preferred formulary biologics for the treatment of psoriatic arthritis **AND**
- Medical record documentation that Taltz is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**AUTHORIZATION DURATION:** Approval will be given for a duration of twelve (12) months. For continuation of coverage, medical record documentation of clinical improvement or lack of progression in signs and symptoms of psoriatic arthritis on Taltz therapy is required.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**NOTE:** If member has coexistent plaque psoriasis, the loading dose quantity limit should be entered as outlined under the plaque psoriasis subsection of the Taltz criteria.

**QUANTITY LIMIT:** *QLs must be entered within the authorization.*

- 160 mg once, followed by 80 mg every 4 weeks
    1. In PA Hub: Add Treat as “Include” Process Modifier, Ignore Misc Handler, max quantity dispensed 2, max number of claims authorized 1, with a duration of 1 month
        - QL FOR LETTER: Loading dose: 2 mL per 28 days; Maintenance dose: 1 mL per 28 days

**FORMULARY ALTERNATIVES:**
Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Cosentyx*, Enbrel*, Otezla*, Skyrizi*, Tremfya*, Rinvoq*, Xeljanz/XR*, Cimzia*, Orencia*, Simponi*

*prior authorization required

**For treatment of ankylosing spondylitis**
A formulary exception for coverage of Taltz may be made for members who meet the following criteria:

- Medical record documentation that Taltz is prescribed by a rheumatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of ankylosing spondylitis **AND**
- Medical record documentation of an intolerance to, contraindication to, or therapeutic failure on a minimum 3 month trial of three (3) preferred formulary biologics for the treatment of ankylosing spondylitis **AND**
- Medical record documentation that Taltz is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**AUTHORIZATION DURATION:** Approval will be given for a duration of twelve (12) months. For continuation of coverage, medical record documentation of clinical improvement or lack of progression in signs and symptoms of ankylosing spondylitis on Taltz therapy is required.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT:** *QLs must be entered within the authorization.*

- 160 mg once, followed by 80 mg every 4 weeks
    1. In PA Hub: Add Treat as “Include” Process Modifier, Ignore Misc Handler, max quantity dispensed 2, max number of claims authorized 1, with a duration of 1 month
        - QL FOR LETTER: Loading dose: 2 mL per 28 days; Maintenance dose: 1 mL per 28 days

**FORMULARY ALTERNATIVES:**
Enbrel*, Humira*, adalimumab-FKJP*, Hadlima*, Yusimry*, Cosentyx*, Rinvoq*, Xeljanz/XR*

*prior authorization required

**For treatment of non-radiographic axial spondyloarthropathy**
A formulary exception for coverage of Taltz may be made for members who meet the following criteria:

- Medical record documentation that Taltz is prescribed by a rheumatologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of non-radiographic axial spondylarthritis **AND**
- Medical record documentation of at least one of the following:
    - C-reactive protein (CRP) level above the upper limit of normal (10 mg/dL) **OR**
    - Sacroiliitis on magnetic resonance imaging (MRI)

**AND**

- Medical record documentation of an intolerance to, contraindication to, or therapeutic failure on a minimum 3 month trial of three (3) preferred formulary biologics for the treatment of non-radiographic axial spondylarthritis **AND**
- Medical record documentation that Taltz is not being used concurrently with a tumor necrosis factor (TNF) blocker or other biologic agent

**AUTHORIZATION DURATION:** Approval will be given for a duration of twelve (12) months. For continuation of coverage, medical record documentation of clinical improvement or lack of progression in signs and symptoms of non-radiographic axial spondyloarthropathy on Taltz therapy is required.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: 1 mL per 28 days

**FORMULARY ALTERNATIVES:**
Cosentyx*, Cimzia*, Rinvoq*

*prior authorization required

If a formulary exception is approved Taltz will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

6. ***HBV*** – Hepatitis B Virus
7. ***HCV*** – Hepatitis C Virus
8. ***HIV*** – Human Immunodeficiency Virus

**PROCEDURE:**

A formulary exception for coverage of Epclusa and sofosbuvir/velpatasvir may be made for members who meet the following criteria:

- Medical record documentation of age greater than or equal to 3 years **AND**
- Medical record documentation that proper weight-based dosing is being prescribed **AND**
- Medical record documentation of a diagnosis of hepatitis C infection **AND**
- Medical record documentation of a diagnosis of hepatitis C virus (HCV) genotype 1, 2, 3, 4, 5, or 6 infection without cirrhosis or with compensated cirrhosis or in combination with ribavirin in patients with decompensated cirrhosis (if eligible) **AND**
- Medical record documentation of METAVIR liver scoring or cirrhosis assessment by a non-invasive test **AND**
- Medical record documentation of a hepatocellular carcinoma screening in those with cirrhosis (METAVIR score F4) **AND**
- Medical record documentation of the member receiving a Food and Drug Administration (FDA) approved medication regimen that is inside the parameters of use approved by the FDA or supported in the widely used compendia available **AND**
- Medical record documentation of appropriate duration of treatment **AND**
- Medical record documentation of previous treatment and treatment response **AND**
- Medical record documentation of any potential drug interactions addressed by the prescriber (such as discontinuation of the interacting drug, dose reduction of the interacting drug, or counseling of the recipient of the risks associated with the use of both medications when they interact) **AND**

- Medical record documentation of receiving the following within the past 6 months:
  - Hepatic function panel
  - Complete blood count including differential
  - Basic metabolic panel **AND**
- Medical record documentation of receiving the following within a reasonable timeframe:
  - Baseline hepatitis C virus (HCV) RNA viral load **AND**
- Medical record documentation of concurrent therapy with appropriate dose and duration of weight-based ribavirin, if indicated **AND**
- Medical record documentation of a negative pregnancy test if member is female of childbearing potential and receiving ribavirin **AND**
- When concurrent ribavirin therapy is indicated and prescribed, medical record documentation for male members that their female partner is not pregnant **AND**
- If the member or their partner are of childbearing potential, medical record documentation that the member was instructed to practice effective contraception during therapy with ribavirin and for 6 months following discontinuation of ribavirin therapy **AND**
- If actively abusing alcohol or intravenous (IV) drugs, or has a history of abuse, has documentation of prescriber counseling regarding the risks of alcohol or IV drug abuse, and an offer of a referral for substance use disorder treatment **AND**
- Medical record documentation that member received pre-treatment readiness education about hepatitis C treatment expectations by a health care provider **AND**
- Medical record documentation that the member commits to the documented planned course of treatment including anticipated blood tests and visits, during and after treatment **AND**
- Medical record documentation that member does not have a limited life expectancy of less than 12 months due to non-liver related co-morbid conditions **AND**
- Medical record documentation of completed:
  - Hepatitis B immunization series **OR**
  - Hepatitis B screening (sAb/sAg and cAb/cAg) **AND** Quantitative hepatitis B virus (HBV) DNA if positive for hepatitis B sAg or cAb or cAg **AND**
    - If there is detectable hepatitis B virus (HBV) DNA, will be treated for Hepatitis B **OR**
    - If negative for hepatitis B sAb, is being vaccinated against Hepatitis B **AND**
- Medical record documentation of human immunodeficiency virus (HIV) screening (HIV Ag/Ab) and if confirmed positive by HIV-1/HIV-2 differentiation immunoassay:
  - Is being treated for human immunodeficiency virus (HIV) **OR**
  - If not being treated for human immunodeficiency virus (HIV), the medical record documents the rationale for the beneficiary not being treated **AND**

- Medical record documentation of a therapeutic failure on, intolerance to Mavyret, if clinically appropriate **AND**
- Medical record documentation that member has been evaluated and treated by a contracted Center of Excellence in hepatitis C management **AND**
- If member is greater than or equal to 18 years or weighs greater than or equal to 30 kilograms and the request is for 200/50 mg or 150 mg/37.5 mg strength, medical record documentation of why 400/100 mg tablets cannot be used

**OR**

- Medical record documentation of a hepatitis C negative recipient receiving a transplant from a hepatitis C positive donor **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Mavyret, if clinically appropriate

**NOTES:**

1. Center of Excellence (COE) requirements do not apply to strategic partner TPA plans (i.e., Northern Light Health).
2. Treatment naïve, genotype 3 patients with compensated cirrhosis require NS5A RAS Y93H testing for velpatasvir.
3. Sometimes sofosbuvir-velpatasvir is preferred over Mavyret in cases when patients have decompensating features such as portal hypertension, low platelets, encephalopathy, etc. Also, when members are on estrogen-based contraceptives.
4. Sofosbuvir-velpatasvir is pangenotypic, although advised to get Genotype, it is not always necessary and do not have to list this in denial rationale.
5. Per the prescribing information, treatment duration for liver or kidney transplant recipients is 12 weeks. Please refer to guidelines at www.hcvguidelines/org.

**MEDISPAN AUTHORIZATION LEVEL:** GPI-14, if request is for sofosbuvir/velpatasvir 400/100 include generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - Tablets: one (1) tablet per day, 28 day supply per fill
  - 150/37.5 mg packets: one (1) packet per day, 28 day supply per fill
  - 200/50 mg packets: two (2) packets per day, 28 day supply per fill

**AUTHORIZATION DURATION:** According to IDSA/AASLD Guidelines (longer treatment duration is recommended when ribavirin ineligible)

| Geisinger | POLICY NUMBER: 434.0 |
|---|---|
| POLICY AND PROCEDURE<br>PHARMACY<br>MANUAL | SECTION: Commercial Drug<br>SUBJECT: Epclusa and Sofosbuvir/Velpatasvir |

**APPROVAL LANGUAGE:** Meets criteria, auth x (?) weeks, RX count= (?), (28 day supply/fill), generic only [when applicable]. QL: 1 tab/day (QL for LETTER only)

If a formulary exception is approved Epclusa or sofosbuvir/velpatasvir will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Mavyret*

*prior authorization required

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Title: Associate Vice President, Managed Care Pharmacy Services

Date: March 1, 2024

Devised: 11/21/16
Revised: 3/1/17 – annual review, removed Unicode characters, defined abbreviations
Revised: 6/2/17 – removed fibrosis/liver manifestations requirement, added METAVIR scoring.
Revised: 10/10/17 – changed AND to OR after regimen approved by FDA or compendia
Revised: 11/27/17 – updated failure to specifically Mavyret, updated FA, updated signature
Revised: 1/18/18 – updated age format & FA, removed prescriber, added Hep B & HIV criteria
Revised: 1/22/18 – added Hep B vaccination series
Revised: 3/1/18 – annual review, updated Hep B/HIV criteria to match DHS
Revised: 12/28/18 – added HCV positive transplant indication/FA criteria, added COE
Revised: 3/1/19 – annual review, defined abbr.

Revised: 7/23/19 – added TPA COE exclusion, renamed to generic
Revised: 3/1/20 – annual review, added GHP Kids
Revised: 7/29/20 – updated age to 6 years and added weight, updated ribavirin to weight based, removed eGFR requirement, updated auth duration to guideline based
Revised: 3/1/21 – annual review, updated logo, added MediSpan approval level, removed St Lukes & AtlantiCare, updated QL statement, clarified policy to Epclusa 200/50 and generic 400/100
Revised: 11/23/21 – removed strengths from policy title etc., updated age to 3 years, added proper weight based dosing, added criteria requiring 400/100 tablets, added NS5A RAS Y93H note, updated to GPI-14, added QL for 100/50 tabs and packets, updated FA
Revised: 3/1/22 – annual review, updated referenced policies & covered LOBs
Reviewed: 3/1/23 – annual review
Revised: 7/25/23 – removed genotype criterion, prior treatment criterion, generic Harvoni from FA; updated diagnosis criterion, METAVIR scoring criterion, baseline labs within 6 months, HCV RNA within reasonable timeframe, notes, signature title; added approval language; moved concurrent ribavirin criterion, criterion for use of 200/50 or 150/37.5
Reviewed: 3/1/24 – annual review

Geisinger

**POLICY NUMBER: 435.0**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**SECTION: Commercial Drug**
**SUBJECT: Bevespi Aerosphere**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Bevespi Aerosphere for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of Bevespi Aerosphere may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of chronic obstructive pulmonary disease (COPD) **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to Anoro Ellipta

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If a formulary exception is approved Bevespi Aerosphere will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

Anoro Ellipta, fluticasone/salmeterol, Wixela Inhub, Atrovent, Breo Ellipta, Incruse Ellipta, Serevent Diskus, Spiriva, Trelegy Ellipta

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of Ocaliva may be made for members who meet the following criteria:

- Medical record documentation of a diagnosis of primary biliary cholangitis (primary biliary cirrhosis) **AND**
- Medical record documentation that Ocaliva is prescribed by a board-certified gastroenterologist, hepatologist, or liver transplant specialist **AND**
- Medical record documentation that Ocaliva is not being used in members with complete biliary obstruction **AND**
    - Medical record documentation of contraindication to or intolerance to UDCA (ursodiol tablets, Urso Forte, or Urso 250) **OR**
    - Medical record documentation of inadequate biochemical response* to an appropriate dose** of UDCA (ursodiol tablets, Urso Forte, or Urso 250) for at least 1 year **AND** that Ocaliva will be prescribed in combination with UDCA

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: one (1) tablet per day, 30 day supply per fill

**AUTHORIZATION DURATION**: Initial approval will be for a period of six (6) months. The following documentation is required for reauthorization:

- Medical record documentation of monitoring liver function tests, including alkaline phosphatase and bilirubin **AND**
- Medical record documentation of high density lipoprotein-cholesterol (HDL-C) **AND**

- Medical record documentation of a positive response to Ocaliva based on reduction in alkaline phosphatase and bilirubin

If approved, reauthorization will be for one (1) year. Reevaluation will be every one (1) year requiring medical record documentation of continued or sustained improvement of primary biliary cholangitis defined by alkaline phosphatase and bilirubin levels.

***Note**: Inadequate response: ALP greater than or equal to 1.67 times the upper limit of normal (ULN) and/or if total bilirubin was between 1 and 2 times the ULN.

ULN for females: ALP is 118 U/L and bilirubin is 1.1 mg/dL.
ULN for males: ALP is 124 U/L and bilirubin is 1.5 mg/dL.

****Note**: Appropriate dose of UDCA: 13 to 15 mg/kg/day in 2 to 4 divided doses.

If a formulary exception is approved Ocaliva will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of aspirin/omeprazole may be made for members who meet the following criteria:

- Medical record documentation of aspirin, component of aspirin/omeprazole, being used for secondary prevention of cardiovascular and/or cerebrovascular events as evident by one of the following:
  - History of ischemic stroke or transient ischemia of the brain due to fibrin platelet emboli
  - Previous myocardial infarction or unstable angina pectoris
  - Diagnosis of chronic stable angina pectoris
  - History of prior revascularization procedure (coronary artery bypass graft or percutaneous transluminal coronary angioplasty) when there is a pre-existing condition for which aspirin is already indicated **AND**
- Medical record documentation of risk of developing aspirin associated gastric ulcers as evident by one of the following:
  - Medical record documentation of age greater than or equal to 55 years
  - Medical record documentation indicating a history of gastric ulcers **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to omeprazole, pantoprazole, lansoprazole, **AND** rabeprazole with concurrent use of aspirin

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: one (1) tablet per day

If a formulary exception is approved aspirin/omeprazole will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

omeprazole, pantoprazole, lansoprazole, rabeprazole, esomeprazole, aspirin 81 mg

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

Geisinger

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 441.0**

**SECTION: Commercial Drug**
**SUBJECT: GoNitro**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for GoNitro for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of GoNitro may be made for members who meet the following criteria:

- Medical record documentation of a reason why the patient cannot use nitroglycerin sublingual tablets **AND** nitroglycerin translingual spray

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12

If a formulary exception is approved GoNitro will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

nitroglycerin sublingual tablets, nitroglycerin translingual spray

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

A formulary exception for coverage of Rubraca may be made for members who meet the following criteria:

**Ovarian Cancer**

- Medical record documentation that Rubraca is prescribed by an oncologist or hematologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of a diagnosis of recurrent epithelial ovarian, fallopian tube, or primary peritoneal cancer **AND** medical record documentation of Rubraca being used as maintenance treatment after a complete or partial response to platinum-based chemotherapy **OR**
- Medical record documentation of a diagnosis of a deleterious BRCA mutation (germline and/or somatic)- associated recurrent epithelial ovarian, fallopian tube, or primary peritoneal cancer **AND** medical record documentation of Rubraca being used as maintenance treatment after a complete or partial response to platinum-based chemotherapy

**Prostate Cancer**

- Medical record documentation that Rubraca is prescribed by an oncologist or hematologist **AND**
- Medical record documentation of age greater than or equal to 18 years **AND**
- Medical record documentation of deleterious *BRCA* mutation (germline and/or somatic)-associated metastatic castration-resistant prostate cancer (mCRPC) **AND**
- Medical record documentation of prior treatment with androgen-receptor directed therapy and a taxane-based chemotherapy **AND**
- Medical record documentation that a gonadotropin-releasing hormone (GnRH) analog will be used concurrently **OR** member has had bilateral orchiectomy

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY: four (4) tablets per day, 30 day supply per fill

**NOTE**: For Ovarian Cancer, the Food and Drug Administration approved test is BRACAnalysis CDx, FoundationOne CDx, FoundationFocus CDxBRCA Assay (see http://www.fda.gov/CompanionDiagnostics)

**RE-AUTHORIZATION CRITERIA:** Rubraca is configured as a prior authorization for new starts only. Rubraca will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If a formulary exception is approved Rubraca will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

For Breast Cancer: Lynparza*

3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

A formulary exception for coverage of Emflaza may be made for members who meet the following criteria:

- Medical record documentation that Emflaza is prescribed by a neurologist or pediatric neurologist **AND**
- Medical record documentation of interdisciplinary team involvement including, but not limited to, neurology, pulmonology, and cardiology **AND**
- Medical record documentation of a diagnosis of Duchenne muscular dystrophy (DMD), confirmed by genetic testing **AND**
- Medical record documentation of age greater than or equal to 2 years **AND**
- Medical record documentation of a therapeutic failure on, intolerance to, or contraindication to prednisone

**MEDISPAN AUTHORIZATION LEVEL:** GPI-10

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
  - 6 mg tablet: 2 tablets per day
  - 18 mg tablet: 1 tablet per day
  - 30 mg tablet: 2 tablets per day
  - 36 mg tablet: no quantity limit
  - 22.75 mg/mL: no quantity limit

**NOTE:** Emflaza tablets may be crushed and served immediately after mixing with applesauce.

If a formulary exception is approved Emflaza will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**
prednisone

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**

**THIS POLICY WILL BE REVISED AS NECESSARY AND REVIEWED NO LESS THAN ANNUALLY.**

**POLICY AND PROCEDURE**
**PHARMACY**
MANUAL

**POLICY NUMBER: 447.0**

**SECTION: Commercial Drug**
**SUBJECT: Kisqali**

**Applicable line of business:**

| | | | |
|---|---|---|---|
| Commercial | X | Medicaid | |
| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for Kisqali for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.
5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:

A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
C. In accordance with current standards of medical practice;
D. Not primarily for the convenience of the Member, or the Member's Provider; and
E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

A formulary exception for coverage of Kisqali may be made for members who meet the following criteria:

**Kisqali as Initial Endocrine Therapy**

- Medical record documentation that Kisqali is prescribed by an oncologist **AND**
- Medical record documentation of diagnosis of hormone-receptor (HR) positive, HER2-negative, advanced or metastatic breast cancer **AND**
- Medical record documentation that Kisqali is being prescribed as initial endocrine therapy **AND**
- Medical record documentation that Kisqali will be used in combination with an aromatase inhibitor or fulvestrant **AND**
- Medical record documentation of one of the following:
  - Medical record documentation of postmenopausal status **OR**
  - Medical record documentation of pre/perimenopausal status or member is male **AND** that member will be treated with a luteinizing hormone-releasing hormone (LHRH) agonist AND

**Kisqali Following Disease Progression on Endocrine Therapy**

- Medical record documentation that Kisqali is prescribed by an oncologist **AND**
- Medical record documentation of diagnosis of hormone-receptor (HR) positive, HER2-negative, advanced or metastatic breast cancer **AND**

- Medical record documentation that Kisqali is being prescribed after disease progression following endocrine therapy **AND**
- Medical record documentation that Kisqali will be used in combination with fulvestrant **AND**
- Medical record documentation of one of the following:
    - Medical record documentation of postmenopausal status **OR**
    - Medical record documentation of pre/perimenopausal status **AND** that member will be treated with a luteinizing hormone-releasing hormone (LHRH) agonist

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12 (must include 2153107050B7 & 2199000260B7), number of claims authorized = 1, enter for the remainder of the calendar year

**QUANTITY LIMIT:** *No QLs need to be entered within the authorization unless the requested quantity exceeds the QL.*

- QL FOR LETTER ONLY:
    - Kisqali 200 mg per day: 21 tablets per 28 days
    - Kisqali 400 mg per day: 42 tablets per 28 days
    - Kisqali 600 mg per day: 63 tablets per 28 days
    - Kisqali/Femara 200 mg per day co-pack: 49 tablets per 28 days
    - Kisqali/Femara 400 mg per day co-pack: 70 tablets per 28 days
    - Kisqali/Femara 600 mg per day co-pack: 91 tablets per 28 days

**RE-AUTHORIZATION CRITERIA:** Kisqali is configured as a prior authorization for new starts only. Kisqali will no longer be covered if it is identified that the member is not receiving appropriate follow-up care from the prescribing specialist or if the member has greater than or equal to a 90 day break in therapy.

- Medical record documentation that the member is receiving appropriate follow-up care from the prescribing specialist

If a formulary exception is approved Kisqali will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

| Medicare | | ACA | X |
| GHP Kids | X | Self-Insured | X |

**POLICY:**

Geisinger Health Plan (GHP) administers a pharmacy benefit through the use of a formulary. The formulary is developed and applied according to the processes outlined in Pharmacy Policy 2.0 Geisinger Health Plan (GHP) Formulary Application and Recalls, Pharmacy Policy 3.0 Geisinger Health Plan (GHP) Formulary Exception, and Pharmacy Policy 143.0OT Formulary Development by the Pharmacy & Therapeutics Committee. The results of this process determine the development and application of criteria for non-formulary products or prior authorization criteria for certain formulary medications. This specific policy explains how coverage decisions are determined for topiramate extended release sprinkle capsules (generic Qudexy) for GHP members who have prescription drug benefits, including Commercial, ACA, GHP Kids, and Self-Insured plans, unless a specific limitation or exception exists. Additional policies that may be referenced as part of a coverage decision include:

- Policy 9.0 Brand
- Policy 487.0 Quantity Limit Exceptions

**REQUIRED DEFINITIONS:**

1. ***Attachment*** – a supporting document that is developed and maintained by the policy writer or department requiring/authoring the policy.
2. ***Exhibit*** – a supporting document developed and maintained in a department other than the department requiring/authoring the policy.
3. ***Devised*** – the date the policy was implemented.
4. ***Revised*** – the date of every revision to the policy, including typographical and grammatical changes.
5. ***Reviewed*** – the date documenting the annual review if the policy has no revisions necessary.

**ADDITIONAL DEFINITIONS:**

1. ***Formulary*** – a continually updated list of prescription medications that represents the current covered drugs under the Plan.
2. ***Non-formulary products*** – those medications that are not included in the Formulary.
3. ***Healthcare provider*** – a person who is licensed, certified or otherwise regulated to provide health care services under the laws of the Commonwealth of Pennsylvania (i.e., physician, physician's assistant, certified registered nurse practitioner).
4. ***NCQA*** – National Committee for Quality Assurance.

5. ***Medically Necessary or Medical Necessity*** – covered services rendered by a provider that the Health Plan determines are:
    A. Appropriate for the symptoms and diagnosis or treatment of the Member's condition, illness, disease or injury;
    B. Provided for the diagnosis, or the direct care and treatment of the Member's condition, illness, disease or injury;
    C. In accordance with current standards of medical practice;
    D. Not primarily for the convenience of the Member, or the Member's Provider; and
    E. The most appropriate source or level of service that can safely be provided to the Member. When applied to hospitalization, this further means that the Member requires acute care as an inpatient due to the nature of the services rendered or the Member's condition, and the Member cannot receive safe or adequate care as an outpatient.

**PROCEDURE:**

New members to the plan already established on therapy may be eligible for continuity of care coverage as long as there is medical record documentation that the safety and effectiveness of use for the prescribed indication is supported by Food and Drug Administration (FDA) approval or adequate medical and scientific evidence in the medical literature.

An exception for coverage of topiramate extended release sprinkle capsules (generic Qudexy) may be made for members who meet the following criteria:

**Seizure Disorders**

- Medical record documentation of a diagnosis of partial onset seizures, primary generalized tonic-clonic seizures, or Lennox Gastaut Syndrome **AND**
- Medical record documentation of age greater than or equal to 2 years **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication three formulary alternatives, one of which must be topiramate immediate release

**Migraine Headache Prophylaxis**

- Medical record documentation of use for prophylaxis of migraine headaches **AND**
- Medical record documentation of age greater than or equal to 12 years **AND**
- Medical record documentation of therapeutic failure on, intolerance to, or contraindication to three formulary alternatives, one of which must be topiramate immediate release

**MEDISPAN AUTHORIZATION LEVEL:** GPI-12, generic only

If an exception is made, topiramate extended release sprinkle capsules (generic Qudexy) will be paid for under the member's prescription drug benefit.

Reviewer should refer to the process and procedure in Pharmacy Policy 3.0 (Geisinger Health Plan (GHP) Formulary Exception) for additional information.

**FORMULARY ALTERNATIVES:**

**Seizure Disorders**: carbamazepine, divalproex, felbamate, valproic acid, topiramate immediate release, lamotrigine, levetiracetam, oxcarbazepine, phenytoin, zonisamide, gabapentin, tiagabine, phenobarbital, pregabalin

**Migraine Prophylaxis**: topiramate immediate release, propranolol, timolol, divalproex delayed release, divalproex extended release, amitriptyline, atenolol, metoprolol, nadolol, venlafaxine, sodium valproate

**THIS POLICY WILL BE MAINTAINED IN COMPLIANCE WITH THE STANDARDS OF NCQA AND ANY OTHER APPLICABLE STATE AND FEDERAL REGULATORY ENTITIES.**
