

The Frank M. and Dorothea Henry Cancer Center

Geisinger

The cancer care NEPA needs

Why leave northeastern Pennsylvania, when new comprehensive cancer care treatment options are right here?

The newly expanded Frank M. and Dorothea Henry Cancer Center offers exceptional care and groundbreaking treatment options, fueled by technology you won't find anywhere else in the world. And it's all in a 140,000-square-foot, four-story, state-of-the-art space that puts everything under one roof.

More space means more for you

At our expanded facility, you'll have access to new services, including:

- CyberKnife® radiation therapy, a non-invasive treatment that delivers precise doses of radiation without damaging surrounding healthy tissue
 - » Our S7 machine is the first of its kind in the world – and it's only here in northeastern Pennsylvania.
- A new breast care center that combines all the services you need in one convenient location
 - » To detect cancer as early as possible, we offer 3D mammography, as well as CT and MRI scans, biopsies and blood tests.
- An 18-bed inpatient unit featuring special accommodations for patients undergoing advanced cancer treatments, private rooms and dedicated space for families to participate in their loved one's care
- An on-site retail pharmacy so you can pick up medications without an extra trip
- Hydra Health gift shop, offering everything from personal care items to cancer care needs

It's innovative cancer care, built around you. And it's open now, right in your own backyard.
